COURSE_DESCRIPTION: Security has become a large issue with web development, and threads often provide significant performance gains over multi-core systems. During this course, you will explore software security, encryption, and how to use threads. Work with thread variables and keys. Recognize thread priorities. Use mutexes to access shared data. Conclude by spotting potential code execution timing bugs, also known as race conditions in software, and how they can cause deadlocks between threads.

COURSE_DESCRIPTION: This final course in the specialization provides an introduction on types of the construction projects as well as the main concern of the productivity challenge in the construction industry. Through case studies, you will learn the industry characteristics and its unique environment that led to such productivity performance as well as touch base on other several examples of challenges we are facing internally in the industry. In the 2nd part of the course, Professor Odeh will give an overview of 10 mega trends that are making us change the way we think about construction. Furthermore, Professor Odeh will discuss the main role of three levels on what needs to be done: an industry collaborative effort and role; a government role; and last but not least a company role. In this discussion, Professor Odeh will also touch base on several technological and innovative trends that are rising in our construction industry. By the end of this course, you will be able to: -Understand the overall history of construction industry -Analyze the optimal ways to respond to the opportunities and challenges brought by current industrial trends such as aging infrastructure, climate change, sustainability trends and tools, the rise of urbanization, and an aging/shrinking workforce -Recognize the importance of collaborating with governments and public officials in pursuit of industry transformation -Comprehend the rising technological trends in the AEC industry and give examples of how to apply technology to the construction industry

COURSE_DESCRIPTION: Discover how penetration testing exposes weaknesses in security. During this course, you will learn all about the CompTIA PenTest+ exam. Begin by getting to know your audience and the rules of engagement for penetration tests. Next, compare resources, requirements, and budgets. Observe how to conduct an impact analysis and trace remediation timelines. Learn how to review disclaimers and confirm engagement support resources; consider technical constraints, and examine contracts and agreements, such as statements of work. Evaluate environmental differences between clients. Finally, learn why it is important to get written authorization instead of an oral agreement, before the execution of a penetration test.

COURSE_DESCRIPTION: Jeder kann von mehr Kreativität profitieren. Ob Sie im Marketing und in der Werbung, im Management oder in der Softwareentwicklung tätig sind, alle Profis müssen in der Lage sein, originelle Ideen zu entwickeln, und bereit sein, völlig neu und auch mal "quer" zu denken. Manchmal ist es aber gerade dieser Druck, kreativ sein zu müssen, der den freien Lauf der Ideen hemmt und im Ergebnis zur Prokrastination führt. Dieser Kurs befasst sich mit dem Zusammenhang zwischen Prokrastination und Kreativität. Sie lernen, dass das optimale Maß an Prokrastination Ihre Kreativität fördert und Sie bei Ihrer Tätigkeit effektiver machen kann. Darüber hinaus lernen Sie, Kreativitätsverstärker einzusetzen, die Ihnen über Zeiten hinweghelfen, in denen Sie zu Aufschiebeverhalten neigen.

COURSE_DESCRIPTION: In modern enterprise environments, organizations need to be proactive and prepare for unforeseen circumstances, perform detection, and assemble automatic investigation and mitigation strategies. Fortunately, IT professionals can rely on robust tools like the kind found in Microsoft 365 environments. Through this course, learn about endpoint protection in Microsoft 365 environments. Explore endpoint security, manage security baselines and policies, and work with firewall and attack surface reduction policies. Next, examine account protection policies, encrypted disk security, antivirus policies, endpoint detection, and response policies. Finally, learn about firewall rule management and how to configure Microsoft Defender for Endpoint, monitor devices, and investigate and respond to threats. This course is part of a series preparing learners for the MD-101: Managing Modern Desktop exam.

COURSE DESCRIPTION: By the end of this project, you will be able to interact with the Linux command line, find out the path of the directory you're working in and change your directory to any other directory by applying some basic commands like cd and pwd. Moreover, You will be able to list, create and delete folders and files across your Linux system. Finally you will be able to apply different techniques to manipulate files and directories by creating, reading and Moving them using touch, copy, mkdir, and rm commands and finally to use the SED and AWK commands . The command line is more powerful, flexible and helpful with Building Repeatable Data Processes. Also it is less resource-intensive because when you're working with limited computing resources or simply want to maximize your speed, using the command line is virtually always going to be better than using a GUI because using a GUI means resources must be dedicated to rendering the graphical output. -This guided project is for people who are interested in learning Linux from Scratch. -Beginners who want to use Linux command line for basic tasks but don't know where to start. -Linux enthusiasts who don't know how to use the command line. -People thinking about a career as a Linux system administrator or engineer, but need the basics first.

COURSE DESCRIPTION: As the world and technology changes, companies are constantly looking for ways to transform. Building digital dexterity sets the stage for a successful and sustaining digital transformation. In this course, you'll learn about building digital dexterity in your organization to ensure it's ready to embrace new opportunities. You'll learn what digital dexterity is and why you want your organization to achieve it. You'll also be introduced to the four characteristics of a digital organization and how they interact and sustain each other. Then you'll dive into the strategies to build the characteristics: a digital-first mindset, digitized organizational practices, the human capabilities of an empowered digital

workforce, and the resources to support it all. Finally, you'll understand how to get started moving through the stages of digital transformation with dexterity.

 COURSE_DESCRIPTION: The course is awarded The Best Free Online Courses of All Time, and Best Online Courses of the Year (2021 Edition) by Class Central (<http://www.classcentral.com>). --- Information systems (IS) are important assets to business organizations and are ubiquitous in our daily lives. With the latest IS technologies emerging, such as Big Data, FinTech, Virtual Banks, there are more concerns from the public on how organizations maintain systems' integrity, such as data privacy, information security, the compliance to the government regulations. Management in organizations also need to be assured that systems work the way they expected. IS auditors play a crucial role in handling these issues. In the course "Information Systems Auditing, Controls and Assurance", you will explore risks of information systems, and how to mitigate the risks by proper IS Controls. You will also get familiar with the IS Audit procedures and how they are applied during the IS development throughout the Systems Development Life Cycle (SDLC). Finally, you will get to observe how we can make the system changes more manageable using formal IS Management practices, such as Change Management Controls and Emergency Changes. The conversations between the course instructor - Prof. Percy Dias, and the IS auditing practitioner will give you a concrete idea on how IS auditors perform their duties, the qualities to become IS auditors and future prospects of IS auditing industry. This course is suitable for students and graduates from Information Systems, Information Technology and Computer Science, and IT practitioners who are interested to get into the IS auditing field. It is also a good starting point for learners who would like to pursue further studies for IS audit certifications - such as Certified Information Systems Auditor (CISA).

COURSE_DESCRIPTION: Discover how to implement data pipelines using Python Luigi, integrate Spark and Tableau to manage data pipelines, use Dask arrays, and build data pipeline visualization with Python in this 10-video course. Begin by learning about features of Celery and Luigi that can be used to set up data pipelines, then how to implement Python Luigi to set up data pipelines. Next, turn to working with Dask library, after listing the essential features provided by Dask from the perspective of task scheduling and big data collections. Learn about implementation of Dask arrays to manage Numpy application programming interfaces (APIs). Explore frameworks that can be used to implement data exploration and visualization in data pipelines. Integrate Spark and Tableau to manage data pipelines. Move on to streaming data visualization with Python, using Python to build visualizations for streaming data. Then learn about the data pipeline building capabilities provided by Kafka, Spark, and PySpark. The concluding exercise involves setting up Luigi to implement data pipelines, Spark and Tableau integration, and building pipelines with Python.

COURSE_DESCRIPTION: BGP is configured quite differently from interior gateway protocols and there are many unique aspects to its operation. In this course, you'll learn about BGP synchronization and operation, as well as how peer groups allow you to gather many different settings for your neighbors and apply them all at once. You'll also see how assigning parameters using session profiles and policy profiles can be used instead of peer groups. Next, you'll explore why you should try and avoid having to clear BGP sessions and just refresh the route information instead. Finally, you'll examine the different timers that control BGP operations. This course is one of a series that prepares you for the 300-410: Implementing Cisco Enterprise Advanced Routing and Services (ENARSI) certification exam.

COURSE_DESCRIPTION: In this 16-video course, learners can explore various deployment advisor utilities and Windows 10 deployment options available for deploying Windows 10 operating system while preparing for the MS-101: Microsoft 365 Mobility and Security exam. Key concepts covered here include using Microsoft 365 deployment advisor and Windows Analytics deployment advisor; determining best approaches for deploying Windows 10; and recognizing Windows 10 deployment scenarios, including modern deployments, dynamic provisioning, and traditional deployment options. Next, learn about dynamic provisioning when configuring the existing operating system; learn traditional deployment options; and learn to describe servicing by using Windows as a Service (WaaS) and servicing tools, such as Windows Update and Windows Server Update Services. Learn how to manage Windows 10 updates with WaaS; learn identity and access management technologies in Windows 10; and receive an overview of Windows Defender Advanced Threat Protection. Then see how describe how to secure information in an organization; plan Windows 10 deployments; describe methods for managing updates using WaaS; and plan for identity and access management and enhancing security of a deployment.

COURSE_DESCRIPTION: In 2020 the world will generate 50 times the amount of data as in 2011. And 75 times the number of information sources (IDC, 2011). Being able to use this data provides huge opportunities and to turn these opportunities into reality, people need to use data to solve problems. This Specialization, in collaboration with Tableau, is intended for newcomers to data visualization with no prior experience using Tableau. We leverage Tableau's library of resources to demonstrate best practices for data visualization and data storytelling. You will view examples from real world business cases and journalistic examples from leading media companies. By the end of this specialization, you will be able to generate powerful reports and dashboards that will help people make decisions and take action based on their business data. You will use Tableau to create high-impact visualizations of common data analyses to help you see and understand your data. You will apply predicative analytics to improve business decision making. The Specialization culminates in a Capstone Project in which you will use sample data to create visualizations, dashboards, and data models to prepare a presentation to the executive leadership of a fictional company.

COURSE_DESCRIPTION: Der Einsatz von Big Data kann mit erheblichen Vorteilen für Ihr Unternehmen einhergehen, zum Beispiel mit niedrigeren Betriebskosten, besserer Entscheidungsfindung und der Entwicklung von innovativen Produkten. Sie müssen aber wissen, wie Sie Ihre Daten effektiv identifizieren, erheben, analysieren und einsetzen, um wirklich von ihnen profitieren zu können. In diesem Kurs wird Ihnen der Analyseprozess vermittelt. Auch werden die gängigsten allgemeinen und fortschrittlichen Analysemethoden vorgestellt, wozu auch das Data-Mining gehört. In diesem Kurs werden auch verschiedene gängige Big-Data-Werkzeuge und die zugehörigen Anwendungen vorgestellt sowie Punkte, die bei der Durchführung von Analysen mit Big Data in Ihrem Unternehmen zu beachten sind.

COURSE_DESCRIPTION: Explore how statistical analysis can turn raw data into insights, and then examine how to use the data to improve business intelligence, in this 10-video course. Learn how to scrutinize and perform analytics on the collected data. The course explores several approaches for identifying values and insights from data by using various standard and intuitive principles, including data exploration and data ingestion, along with the practical implementation by using R. First, you will learn how to detect outliers by using R, and how to compare simple linear regression models, with and without outliers, to improve the quality of the data. Because today's data are available in diversified formats, with large volume and high velocity, this course next demonstrates how to use a variety of technologies: Apache Kafka, Apache NiFi, Apache Sqoop, and Wavefront (a program for simulating two-dimensional acoustic systems) to ingest data. Finally, you will learn how these tools can help users in data extraction, scalability, integration support, and security.

COURSE_DESCRIPTION: There are many specialized charts and other advanced features available in Plotly Chart Studio, which can be used to give life to your data. These include Box and Violin plots to analyze the distribution of values, Candlestick charts to analyze tradeable assets' performance, and map charts to visualize geographical data. In this course, you'll learn how to work with these chart types, as well as funnel, treemaps, and sunburst charts. You'll also practice sharing plots and charts with collaborators and viewers. Beyond this, you'll learn how to create a dashboard to group related charts. You'll generate curves, namely a moving average and a fitted curve, to augment some of your charts. You'll then finish my writing some Python code and using it to generate charts from a Python application.

COURSE_DESCRIPTION: Scrum is one of the most popular Agile methodologies used today, because it helps organizations deliver quality in an environment of constantly changing requirements. In this course, you'll learn how Scrum works as an Agile approach to empower teams to deliver quality working software that is valuable to customers. You'll learn how to identify the following features of Scrum and their benefits in modern software development: backlog refinement, planning, sprint review, and retrospective. You'll recognize the key responsibilities of the scrum roles of product owner, scrum master, and developer, and how they support the Scrum paradigm. And finally, you'll learn how the product and sprint backlogs support the sprint process.

COURSE_DESCRIPTION: Testing is a critical part of software development. This course will explore the built-in unit testing features of Ruby, as well as how to use Cucumber and behavior driven development (BDD) to help with testing Ruby code. Begin by learning how to describe unit testing. Next, create and run a test unit. From there you will identify assertion types, assert numerical values, strings with patterns, and objects. As you progress, you will learn how to install Cucumber, create a scenario project with it, and setup step definitions to run a test. Finally, as an exercise, you will use unit tests and behavior driven development to verify code functionality.

COURSE_DESCRIPTION: To become proficient in data science, users have to understand edge computing. This is where data is processed near the source or at the edge of the network while in a typical cloud environment, data processing happens in a centralized data storage location. In this 7-video course, learners will explore the implementation of IoT (Internet of Things) on prominent cloud platforms like AWS (Amazon Web Services) and GCP (Google Cloud Platform). Discover how to work with IoT Device Simulator and generate data streams with MQTT (Message Queuing Telemetry Transport). You will next examine the approaches and steps involved in setting up AWS IoT Greengrass, and the essential components of GCP IoT Edge. Then learn how to connect a web application to AWS IoT by using MQTT over WebSockets. The next tutorial demonstrates the essential approach of using IoT Device Simulator, then on to generating streams of data by using the MQTT messaging protocol. The concluding exercise involves creating a device type, a user, and a device by using IoT Device Simulator.

COURSE_DESCRIPTION: A security professional must be familiar with risk management concepts to be able to apply them effectively. Use this course to explore the management of risks to tangible and intangible assets. Get familiar with the details of vulnerability and risk assessment, countermeasure selection and implementation, and risk frameworks. This course will also help you examine the monitoring, measuring, and reporting of risk and delve further into threat modeling and supply chain risk management (SCRM). You'll have an understanding of risk management fundamentals and how to apply them after completing this course. Moreover, you can also use this course to prepare for the CISSP exam.

COURSE_DESCRIPTION: Project risk, communication, and iteration planning are key elements of Agile projects. They determine ways to avoid disastrous results and enact successful delivery. In this course, you'll learn about the risk management process, likelihood and impact assessments, risk response strategies, risk actions, and the risk philosophy of Agile. Then you'll discover the triple constraint approach to risk management and how the Agile approach compares to Waterfall in this respect, information radiators, the task board, burn-down and burn-up charts, and Agile communication principles and the daily stand-up meeting. Then, you'll explore communication planning, iteration capacity and planning, detailed iteration tasks, and backlog grooming. Finally, you'll delve into the daily rhythm of work, command and control, business acceptance, the iteration review, and the iteration retrospective. This course was originally created by Global Knowledge (GK).

COURSE_DESCRIPTION: C++ supports many different programming paradigms including object-oriented programming, functional programming, and template programming. As a result, the C++ type system is quite complex and it can get quite complicated to figure out the correct type for a variable. Learn how to use the auto keyword to request that the compiler infer the type of a variable from its context. Discover how to use the typeid() function to get a type info object for every variable and to verify that the auto keyword has worked as intended. Next, explore enums and identify the differences between C-style and C++-style enums. Learn about input and output streams, in particular the cin and cout streams used in C++. Finally, discover how to use I/O manipulators to control the appearance of objects on these streams. After completing this course, you'll be able to utilize the auto keyword to infer the type of a variable and deploy I/O manipulators to correctly format data on input and output streams.

COURSE_DESCRIPTION: Explore how to plan, configure, and manage send connectors and receive connectors in this 22-video course, designed to help in preparation for the MS-200 Planning and Configuring a Messaging Platform certification exam. Learners begin the course by examining receive connectors, including default receive connectors, local address bindings, and remote addresses. Then you will explore receive connector usage types, authentication mechanisms, and permission groups. Next, learners examine scenarios for custom receive connectors and demonstrate how to modify the SMTP (simple mail transfer protocol) banner and allow anonymous relay. Then you will move on to examine send connectors, including usage types, network settings, address spaces, permissions, and scope. Also covered in this course are key considerations for implementing custom receive connectors, including the widely used Exchange Server default connectors. Finally, the course gives practical demonstrations of how to create Internet mail and outbound mail send connectors; how to configure proxy outbound mail send connectors; and how to enable protocol logging.

COURSE_DESCRIPTION: Webex ist eine Kommunikationsplattform, die Gespräche, Meetings, Notizen und Dateiverwaltung vereint. Erfahren Sie, wie Sie die Desktop-Applikation von Webex für Windows 10 finden, kennenlernen und sich mit Ihren Anmeldedaten anmelden können. Dieser Kurs, der mit der Webex-Version 41.9.0.20091 aufgenommen wurde, gibt Ihnen außerdem einen Überblick über die Webex-Oberfläche und stellt Ihnen alle Werkzeuge vor, die Ihnen für die Kommunikation mit Ihren Mitarbeitern zur Verfügung stehen. Verwenden Sie zum Beispiel die Suchleiste, um die gewünschten Informationen zu finden. Als nächstes erfahren Sie, wie Sie Ihre persönlichen Informationen anpassen können, indem Sie Ihr Profil, Ihre Statussichtbarkeit und Ihre Verfügbarkeit bearbeiten. Webex ermöglicht es Benutzern auch, die Applikationseinstellungen anzupassen, indem sie ihre Benachrichtigungen und Geräteeinstellungen ändern. Wenn Sie keinen Zugriff auf die Desktop-Applikation haben, erfahren Sie schließlich, wie Sie Webex über einen Browser aufrufen und nutzen können.

COURSE_DESCRIPTION: Transform or disappear, the Darwinism of IT: In order to adapt to a digital world, a two-speed IT is needed. Despite the importance of IT in today's digital world, Chief Information Officers (CIOs) often struggle to get their voices heard by executive committees. Faced with this challenge, IT departments are being forced to reinvent themselves to adapt their companies to the fast paced evolution of technology. The Boston Consulting Group has developed a business approach that allows IT to shed off its appearance of a heavy cost center and to adopt a new, more realistic persona as a quality service provider, partnering with users and the management. Would you be a professional, a student in engineering, a student in a business schools or would you just be interested in digital transformation and its implications on IT, Learn with three BCG experts why and how to manage an IT department as a business in order to transform a company and adapt it to a digital world. Join the conversation: #2SpeedIT

COURSE_DESCRIPTION: Scripting languages can be used by penetration testers to help automate the execution of common tasks and increase the depth and scope of testing coverage. In this course, you'll learn the basic concepts of scripting and software development. Explore logic constructs concepts such as loops and conditionals, as well as the following operators; Boolean, string, and arithmetic. Discover other basic concepts of scripting including data structures, libraries, classes, procedures, and functions. You then explore how to analyze a script or code sample for use in a penetration test. Discover shells, programming languages, and exploit codes, and learn how to identify opportunities for automation. This course is one of a collection that helps prepare learners for the CompTIA PenTest+ (PT0-002) certification exam.

COURSE_DESCRIPTION: In this project, you will explore the pivot-table tactics applied in Google Sheets to create crosstabs and conduct a preliminary exploratory-analysis of the data within the report. You will also conduct Pearson's correlation testing and determine how best to visually present those results so that you can aid the audience's discovery of insights from the data story. To do this you will work in the free-to-use spreadsheet software Google Sheets. We rarely have an unlimited amount of time to find the actions in our data, so it is key to leverage tools that expedite that process. Crosstab reports can accelerate the analysis process because they present select slices of data in a matrix format making it easier to visualize patterns and explore similarities and differences between categories or variables. By the end of this project, you will be able to perform correlation testing, interpret the test statistics, and apply pivot table tactics to create crosstab reports that will communicate the data story using any spreadsheet software. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Technicians need to familiarize themselves with the vast array of cable options and connector types. Discover the most common cables and adapters encountered when working with computers and mobile devices. Explore Ethernet cable types, the differences between shielded twisted pair (STP) and unshielded twisted pair (UTP) cabling, and the basics of fiber optic and coaxial cabling. Next, learn the speed and transmission limitations of various network cables. Discover different video cables and learn about using Lightning and Thunderbolt cables. Then, examine Universal Serial Bus (USB) cables and the differences between USB, USB-C, USB2.0, and USB3.0. Explore serial peripheral cables and hard drive cables such as SATA (Serial AT Attachment), IDE (Integrated Drive Electronics), and SCSI (Small Computer System Interface). Finally, learn to differentiate between adapters such as DVI to HDMI, USB to Ethernet, and DVI to VGA and explore how computers utilize several types of connectors and converters. This course will prepare learners for the CompTIA A+ Core 1 (220-1101) certification exam.

COURSE_DESCRIPTION: Throughout the Coaching Skills for Managers specialization, we've discussed many topics for improving coaching conversations with our employees. It is now time to put all of that theory and discussion into practice and examine great examples of common coaching conversations! Note: This course builds on all previous courses in the Coaching Skills for Managers specialization. It is highly recommended that students complete or be familiar with the topics covered in those courses before taking this course. In particular, you should be familiar with the coaching strategies and tools discussed in previous courses (such as the 5 whys technique, resisting what is, among others), and should have a full understanding of the Thought model and the various components of it: circumstances, thoughts, feelings, actions, and results. By the end of this course, you will be able to demonstrate appropriate and effective strategies when engaging in coaching conversations with those that you lead. By exploring and analyzing common coaching scenarios that are acted out in this course, you will have a great sense of what works well and not so well during such a conversation. Specifically, you'll be able to better differentiate between a developmental coaching approach and a directive management style, discuss new strategies and techniques for dealing with both mind set and skill set gaps, describe how to use the feedback loop effectively in a conversation, and demonstrate the use of good questioning techniques and the thought model to not only help an employee identify issues, but help the employee really change their thinking. The final assignment is all about actually having a coaching conversation with another person where you can apply everything you've learned in this course and throughout the Coaching Skills for Managers specialization. Again, it is highly recommended students complete the other courses in the specialization before taking this one. This peer review assignment, in particular, will be difficult to complete without knowledge of the topics covered in these courses. After going through the course materials and completing the assessments, you will be able to have more effective one-on-one coaching meetings with those you manage and deepen your understanding of the essential practice of coaching conversations.

COURSE_DESCRIPTION: This course explores how to use MongoDB, a cross-platform document-oriented database that has become a popular tool for data wrangling and data science. MongoDB is a NoSQL (not only structured query language) that uses JSON (Javascript Object Notation) like documents with schemata. One advantage of MongoDB is the flexibility of how it stores data. You will learn how to perform MongoDB actions related to data wrangling by using Python with the PyMongo library. You will learn how to perform basic CRUD (create, read, update, delete) operations on a MongoDB document. Next, learn how to use the find operation to select documents from a collection, and to use query operators to match document criteria. You will learn how to select documents using a specified criterion, similar to a WHERE clause in an SQL statement. Finally, this course demonstrates how to use the mongoimport tool to import from JSON or CSV, and mongoexport to export data from a MongoDB collection to JSON or CSV (comma separated values).

COURSE_DESCRIPTION: Self Driving cars have caught the attention of the automotive world in terms of operational efficiency and value they bring by automating driving. In fact, new age car makers such as Tesla who have reached highest market capitalization in Auto industry in year 2021, have developed technology which is well ahead by few years of traditional known automotive car makers. Technology which powers Self Driving car includes sophisticated algorithms such as deep reinforcement learning and that's what we shall leverage to build your first self driving car on AWS DeepRacer platform. By the end of this course, not only you shall learn how to build your first self driving car but you could also participate in Amazon's DeepRacer League. Please note: As part of this course, you would need your AWS Account to complete the course. It would be charged as per your usage of AWS DeepRacer service. However, if you are using AWS DeepRacer for the first time, at the time of creating this course - AWS provides 10 hours of free hours to train or evaluate the model and 5 GB of storage during the first month. Overall you need to use this service within the first 1 month post which you shall be charged.

COURSE_DESCRIPTION: In this Challenge Lab, you will create branching logic in Python. First, you will define an if statement that evaluates whether a number is even or odd by using the modulo operator, and then you will generate different outcomes based on the result of the evaluation. Next, you will determine whether a value is part of a list by using an if else statement, and then you will return different values based on the evaluation of the conditions in the if else statement. Finally, you will evaluate a condition in an if statement by using the logical and operator, and then you will evaluate a different condition in an if statement by using the logical or operator. Note: Once you begin the challenge lab, you will not be able to pause, save, or exit and then return to your challenge lab. Please ensure that you have set aside enough time to complete the challenge lab before you start.

COURSE_DESCRIPTION: This is the second course in the Google Project Management Certificate program. This course will show you how to set a project up for success in the first phase of the project life cycle: the project initiation phase. In exploring the key components of this phase, you'll learn how to define and manage project goals, deliverables, scope, and success criteria. You'll discover how to use tools and templates like stakeholder analysis grids and project charters to help you set project expectations and communicate roles and responsibilities. Current Google project managers will continue to instruct and provide you with hands-on approaches for accomplishing these tasks while showing you the best project management tools and resources for the job at hand. Learners who complete this program should be equipped to apply for introductory-level jobs as project managers. No previous experience is necessary. By the end of this course, you will be able to: - Understand the significance of the project initiation phase of the project life cycle. - Describe the key components of the project initiation phase. - Determine a project's benefits and costs. - Define and create measurable project goals and deliverables. - Define project scope and differentiate among tasks that are in-scope and out-of-scope. - Understand how to manage scope creep to avoid impacting project goals. - Define and measure a project's success criteria. - Complete a stakeholder analysis and explain its significance. - Utilize RACI charts to define and communicate project team member responsibilities. - Understand the key components of project charters and develop a project charter for project initiation. - Evaluate various project management tools to meet project needs.

COURSE_DESCRIPTION: Build a toolkit of communication skills that will give you the knowledge and confidence to be an effective engineering leader. Engineers who want to advance in their profession need to be effective communicators. They need to clearly communicate complex ideas and technical project plans. They also need to be strong persuaders. Engineers who are good communicators get recognized by their supervisors and by their clients. In this three-course Specialization, you will practice designing and giving strong, persuasive presentations; you will learn how to communicate across cultures, genders, and generations, how to create your personal brand and leadership presence, how to hold effective meetings with global teams; you will learn how to handle difficult conversations, and how to handle crisis communication; you will also learn writing skills immediately applicable in your daily activities. Courses are taught by faculty from the Rice Center for Engineering Leadership (RCEL). RCEL is focused on developing engineering leaders within Rice University at the undergraduate, master's and PhD levels. It is home to one of a very few academically approved Certificates in Engineering Leadership.

COURSE_DESCRIPTION: Stakeholders play a crucial role in software development projects, but understanding who stakeholders are, what their roles and interests are, and communicating effectively with stakeholders can be challenging. Key concepts covered in this 13-video course include the importance and elements of communication in software projects; learning how to define and identify stakeholders; and learning how to describe different types of stakeholders for software projects. First, learners observe how to specify types of stakeholders involved in a project, including their rights, responsibilities, ethical, and oversight obligations; learn how to gain access to stakeholders and its importance; and begin to understand challenges associated with stakeholder communication and how to overcome them. Next, learn to identify how Agile projects affect stakeholder communication; learn concepts of stakeholder engagement, how it is displacing stakeholder communication, and how to plan for engagement; and learn how to improve communication through active listening, and how customer feedback can be constructively obtained. Finally, learn different strategies for working with stakeholders to improve their participation; and examine best practices used to improve stakeholder communication.

COURSE_DESCRIPTION: This course is for entrepreneurial managers who are looking for tools and techniques to introduce exciting, innovative products or services to market quickly and informed by high-quality customer insights. It is applicable to a range of organizations from small-medium sized enterprises through to corporates, and across a range of industrial segments. The problem this course helps address is the constant pressure managers face to be innovative and introduce novel products and services for their customers. However, many creative ideas get 'stuck' in the boardroom or are subject to intra-organizational tensions or group think. This course provides methodologies to break through these challenges. We build on the widely known concept of design thinking but update it and apply it to advance business strategy and entrepreneurship. Over five weeks you will learn what 'design strategy' is, how it differs from traditional design thinking and business strategy, and how it can be used to improve existing products or services in your business, or introduce breakthrough ideas. We will also provide an exclusive, deep-dive into the practical application and impact of these strategies in one of Australia's newest, most innovative financial institutions, UBank, and the global re-insurance giant, Swiss Re. Through conversations with their Senior Executive Leadership Teams, including UBank's CEO, we will explore how they have embedded innovation through design thinking. By the end of this course, you will have a set of tools to inform product design and development for your own start-up, or to extend the product roadmap of an established organization.

COURSE_DESCRIPTION: Data security involves more than understanding the skills and techniques necessary to keep information safe. Once you have identified policies and procedures and considered security challenges and best practices, what are your next steps? Through this course, consider the best means to implement, sustain, and enforce good data security practices across your teams and projects. How does the experience level of a particular team affect data security considerations? Define use cases for inexperienced, mixed experience, and highly experienced project teams. Identify the components that make up each type of team, and learn to recognize best practices for each type of team as they relate to data security. After course completion, you'll be able to consider the specifics of each team when identifying the best ways to apply data security to their work.

COURSE_DESCRIPTION: One of the main tasks of computer applications is to process lists of data. Java lists of data can be processed using looping statements. In this course, you will learn the various methods for performing looping in Java programming language. First, you will learn about the various types of looping statements available in Java such as enhanced for loops, for loops, while loops, and do-while loops. Next, you will learn about the best practices to follow when performing looping. Finally, you will learn about the break and continue statement. Finally, you'll learn how to apply all of these looping methods. This course is one of a collection of courses that prepares learners for Oracle's 1Z0-811: Java Certified Foundations Associate certification.

 COURSE_DESCRIPTION: Learners can explore the prominent machine learning elements that are used for computation in artificial neural networks, the concept of edge detection, and common algorithms, as well as convolution and pooling operations, and essential rules of filters and channel detection, in this 10-video course. Key concepts covered here include the architecture of neural networks, along with essential elements used for computations by focusing on Softmax classifier; how to work with ConvNetJS as a Javascript library and train deep learning models; and learning about the edge detection method, including common algorithms that are used for edge detection. Next, you will examine the series of convolution and pooling operations used to detect features; learn the involvement of math in convolutional neural networks and essential rules that are applied on filters and channel detection; and learn principles of convolutional layer, activation function, pooling layer, and fully-connected layer. Learners will observe the need for activation layers in convolutional neural networks and compare prominent activation functions for deep neural networks; and learn different approaches to improve convolution neural networks and machine learning systems.

COURSE_DESCRIPTION: Big data and artificial intelligence get most of the press about computational social science, but maybe the most complex aspect of it refers to using computational tools to explore and develop social science theory. This course shows how computer simulations are being used to explore the realm of what is theoretically possible. Computer simulations allow us to study why societies are the way they are, and to dream about the world we would like to live in. This can be as intuitive as playing a video game. Much like the well-known video game SimCity is used to build and manage an artificial city, we use agent-based models to grow and study artificial societies. Without hurting anyone in the real world, computer simulations allow us explore how to make the world a better place. We play hands-on with several practical computer simulation models and explore how we can combine hypothetical models with real world data. Finally, you will program a simple artificial society yourself, bottom-up. This will allow you to feel the complexity that arises when designing social systems, while at the same time experiencing the ease with which our new computational tools allow us to pursue such daunting endeavors.

COURSE_DESCRIPTION: Making decisions in today's world, a world increasing in complexity, with broad changes and uncertainty, creates the need of approaches that allow us to discern the real problems and the causes that create them. Identifying these problems, in most cases, requires challenging the assumptions on which we base our judgments, regarding the world and its realities. Critical thinking could be defined, as "that way of thinking - on any subject, content or problem - in which the thinker improves the quality of his thinking by seizing the inherent structures of the act of thinking and by subjecting them to intellectual standards". Critical thinking helps making decisions within a company, selecting the best action for the organization. In this course of critical thinking the students will learn the tendencies, approximations and assumptions on which their reflections are based, and the conditions and the outcomes derived from their ways of thinking. This reflective thought is the active, careful and persistent examination of all beliefs in the light of the fundamentals that support them and their conclusions. The reasoned decisions that the world requires, occur in many different areas, especially in business decisions, related to strategies, in the solution of problems in organizations, in the solution of social problems and in corporations' social and ethical responsibility. In this online course the approaches will be oriented to analyze the critical thinking required in these areas.

 COURSE DESCRIPTION: By the end of this guided project, you will be fluent in creating Program Risk Management artefacts for the Planning Phase for diverse programs. You will utilise a logical diagramming plan in an agile environment to develop the solution. This will enable you to identify and classify the required components for risk planning. Furthermore, it will help develop a structural model for learning about the field of Program

Management. If you are interested in building up the knowledge leading to this guided project, the following is the link to: [Developing Programme Management Blueprint with ClickUp] <https://www.coursera.org/projects/program-blueprint> [Advanced Programme Planning Phases Framework in ClickUp] <https://www.coursera.org/projects/program-advanced-planning> This Guided Project is essential for individuals wanting to learn about the field, or looking to transition into working in Program Management. This guided project is designed to engage and harness your visionary and exploratory abilities. You will use proven models in an agile environment with ClickUp to engage in a hands-on learning experience.

COURSE_DESCRIPTION: Diversität, Chancengleichheit und Inklusion sind nicht nur Initiativen und Programme - sie sind eine kulturelle DNA, die ein Unternehmen vollständig verändern, das Geschäft vorantreiben und positive Ergebnisse für die Mitarbeitenden, das Unternehmen und die Gemeinschaft erzielen kann. Dieser Kurs soll Führungskräften und Personalverantwortlichen ein Instrumentarium an die Hand geben, mit dem sie von den ersten Kontakten an eine diverse, gerechte und inklusive Mitarbeiter- und Führungserfahrung gestalten können. Er bietet praktische Beispiele dafür, wie man Inklusion in jeden Aspekt der Mitarbeitererfahrung einfließen lassen kann. In diesem Kurs lernen Sie die Schlüsselemente zur Entwicklung einer DEI-Scorecard als ersten Schritt kennen, um systemische DEI sicherzustellen. Vorgestellt werden auch Strategien zur Schaffung einer inklusiven Erfahrung bei der Talentakquise, einschließlich der Verwendung einer inklusiven Sprache und geschlechtsneutraler Anreden, sowie Techniken, die es Talenten ermöglichen, sich gleichberechtigt zu entwickeln und voranzukommen. Sie werden auch lernen, wie Sie die DEI-Führung in Verbindung mit Beschäftigtengruppen demokratisieren können und wie Sie Inklusion in Richtlinien, Prozessen und Systemen gewährleisten. Als Teil Ihrer DEI-Arbeit empfehlen wir Ihnen, www.lawanaharris.com/assessment zu besuchen und eine Selbsteinschätzung vorzunehmen, um Ihre Stärken und Schwächen im Bereich DEI zu ermitteln.

COURSE_DESCRIPTION: Classification models are used to categorize data into a fixed number of discrete classes or categories. The KNIME Analytics Platform allows you to load, explore, pre-process, and use your data to train classification models with little to no code. In this course, explore classification models and the metrics used to evaluate their performance. Next, construct a KNIME workflow to load and view the data for a classification model. You will clean data, impute missing values, and cap and floor outlier values in a range. Then you will identify and filter correlated variables and you will convert categorical data to numeric values and express numeric variables. Finally, train several different classification models on the training data, evaluate them using the test data, and select the best model using hyperparameter tuning. Upon completing this course, you will have the skills and knowledge to train, clean, and process your data and to use that data to train classification models and perform hyperparameter tuning.

COURSE_DESCRIPTION: Machine learning (ML) is widely used across all industries, meaning engineers need to be confident in using it. Pre-built libraries are available to start using ML with little knowledge. However, to get the most out of ML, it's worth taking the time to learn the math behind it. Use this course to learn how distances are measured in ML. Investigate the types of ML problems distance-based models can solve. Examine different distance measures, such as Euclidean, Manhattan, and Cosine. Learn how the distance-based ML algorithms K Nearest Neighbors (KNN) and K-means work. Lastly, use Python libraries and various metrics to compute the distance between a pair of points. Upon completion, you'll have a solid foundational knowledge of the mechanisms behind distance-based machine learning algorithms.

COURSE_DESCRIPTION: This course focuses on using the Neo4j ETL tool to automate the migration from a relational database to a Neo4j graph and redefining a graph data model with the APOC library. Start by setting up a relational database with multiple tables for entities as well as relationships between entities. Discover how relationships are modeled in tabular structures and what needs to happen for their translation into graphs. Use the Neo4j ETL tool to map the relational tables to a set of nodes and relationships. You will see where the tool can save you work, and what its limitations are. Finally, learn about some of the options available in the Neo4j's APOC library to re-factor your graph data model. This will include redefining the properties in nodes as well as modeling relationships with multiple properties as nodes with simpler relationships.

COURSE_DESCRIPTION: In this 19-video course, you will discover advanced React features such as lists and keys, including lists without keys, unique keys for lists, and correct key usage, and other topics. Learners begin with a look at the error that occurs when list elements are rendered without keys, then study the unique keys for list elements. Learn about the right usage of keys in components; how to render components using conditional evaluation; how to perform conditional rendering using variables; and how to evaluate conditions by using inline logical operators. Explore how to perform rendering with ternary operators; the use of local state in components; and the disadvantages of storing local state. Learn about removing state from lower-level components, and lifting state up to higher-level components. Delve into code reuse by using inheritance and code reuse by using composition. Examine how to use composition to customize child elements and how to create special components using composition. Explore the use of global properties without context, and finally, the use of context to specify global properties.

COURSE_DESCRIPTION: Discover how to meet regulatory compliance needs by planning and implementing data retention, deletion, and archiving policies. Explore how data events can be analyzed and used for troubleshooting problems. This course can be used in preparation for the (ISC)2 Certified Cloud Security Professional (CCSP) exam. The key concepts in this course include: how to configure Azure cloud storage data retention policies; how to enable Azure storage account soft deletion; how to configure Azure storage account blob archiving; and how to configure an Azure immutable blob storage access policy. You will also learn about the standards and best practices when using eDiscovery and its purpose to find information that is stored in a digital manner for use with legal proceedings; how to filter Azure resource management activity events; and how to create Azure log queries. Finally, learn how to use the various capabilities of security information and event management (SIEM) such as data aggregation, correlation, alerting, compliance, retention, and forensic analysis.

COURSE_DESCRIPTION: Most organizations depend on data visualization to help drive business decisions. Using the correct charts and graphs helps communicate the right information and identify patterns and trends within your data. You'll begin this course by identifying the importance of data visualization and its application in curating data that is easy to digest, understand, and interpret. Next, you'll discover best practices for visualizing data and the significance of creating user-centered visuals. You'll then explore different presentation types such as comparison, composition, distribution, trends, and relationship, and learn how to map your charts to these categories. Finally, you'll investigate the use cases for popular charts such as line charts, pie charts, histograms, scatter plots, and others. You'll also recognize when to use specialized charts such as Gantt charts, sunburst charts, and Sankey diagrams.

COURSE_DESCRIPTION: The Business Implications of AI: Full course is a continuation of the nano-course. Throughout the course content, the following main questions will be answered: * How shall we, as leaders, understand it from a corporate strategy point of view? * What is it and how can it be used? * What are the crucial strategic decisions we have to make, and how to make them? * What consequences can we expect if we decide on doing AI projects and what kind of competencies do we need? * Where shall we start, and what could be a good second as well as a third step? * What implications for the organization can we expect? These are the questions answered in this course. If you want to deep-dive even more into how artificial intelligence is changing the business landscape, with face-to-face training, group activities, and hands-on exercises, register for the live course <https://professionalschool.eitdigital.eu/business-implications-of-ai>

COURSE_DESCRIPTION: By the end of this project, you will create a simple functioning pong game using C++. In this project, you will be able to define class ball and paddle. Also, you will be able to draw the game map. Moreover, you will be able to create a game manager class which has the implementation function to move the paddle using the keyboard and another function to do the logic of the game and the direction of the ball when hitting either the ball or the paddle. In this project we'll use codeblocks IDE which is an open source IDE and it's very simple to write our code in , which will help us implement all the needed functions and classes that is necessary to build our game Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Sobald Sie Ihre Excel PivotTables erstellt haben, müssen Sie wissen, wie Sie die darin enthaltenen Daten verwalten und mit ihnen arbeiten können. In diesem Kurs lernen Sie, wie Sie Excel PivotTables analysieren, berechnen, zusammenarbeiten und die Zeitachse verwenden können. Zu den wichtigsten Konzepten, die in diesem Kurs behandelt werden, gehören die Bearbeitung der Quelldaten und die Einrichtung von Feldern in einer PivotTable, die Verwendung von vordefinierten Formatvorlagen und Formatierungswerkzeugen zum Ändern des Erscheinungsbildes einer PivotTable sowie das Kopieren und Verschieben einer PivotTable innerhalb einer Arbeitsmappe. Außerdem lernen Sie, wie Sie mit Sortierwerkzeugen die Anzeige von Daten ändern, Filterwerkzeuge zum Ein- und Ausblenden von Daten verwenden und mit Werten für Vergleichsberechnungen arbeiten. Schließlich erfahren Sie, wie Sie häufige PivotTable-Probleme in Excel 365 beheben können.

COURSE_DESCRIPTION: With continuous integration and continuous deployment (CI/CD), software developers can better address organizational needs and more quickly deliver their software solutions. Jenkins is a commonly deployed tool they can use for creating and maintaining that CI/CD process. In this course, discover how to use Jenkins to support building, deploying, and automating your projects. Learn how to install Jenkins with Ubuntu. Explore the build process using Jenkins and learn how to build software artifacts. Review testing frameworks and plugins used by Jenkins and how to automate testing. Finally, explore automated deployment and deployment as a post-build step. On completing this course, you'll be able to install and configure Jenkins to build, test, and deploy your software development projects.

COURSE_DESCRIPTION: If your manager's approval isn't quite enough to motivate you to put in that extra effort you need to get ahead, then maybe you're ready to work on your personal accountability. Everyone must answer to an inner manager - an internal voice that tells you whether the job is done as well as you can do it. Choosing personal accountability means earning the approval of that inner manager. In this course, you'll learn the behaviors of accountable professionals, including stating commitments clearly and following through. You'll also learn how some very common behaviors, like making excuses and blaming others, work against accountability. The elements of an action plan for developing personal accountability are provided. Finally, you'll learn how the members of a team can improve their accountability together.

COURSE_DESCRIPTION: In this 11-video course, learners explore how to use log files, Windows Analytics, and other cloud-based tools to monitor device health and security in Windows 10. Begin the course by examining the importance of monitoring the health of devices with Device Health-the idea behind which is to proactively monitor devices to identify those crashing most frequently. You will then learn how to add the Device Health solution, and examine the importance of enrolling devices in Windows Analytics. This leads into enrolling a device into a Device Health solution and identifying crashing devices and driver-induced OS (operating system) crashes under Device Reliability. Then examine the next aspect of the Device Reliability solution, which is App Reliability, locating app usage and behavior information. Learn how to monitor Login Health and view Windows Information Protection details and review several different data types that become available in terms of analysis when using the Device Health service. The concluding exercise involves monitoring device health and security with Device Health solution and Windows Information Protection information. This is one course in a series to prepare for the MD-101: Managing Modern Desktops certification exam.

COURSE_DESCRIPTION: Welcome to the MOOC "Doing Business in Europe"! Europe is a major world trade partner as well as a place where to acquire significant business experience. This is the reason why this MOOC has been designed with the view to explaining and guiding you in doing business in Europe. Do you really know Europe? How should you consider and approach the European continent? What business lessons can be drawn in a European perspective? With a dozen contributions from academics in the various domains of management (marketing, supply chain, finance, human resources management or strategy) and as many testimonials from business leaders operating in Europe, this course will help you enrich your knowledge and business competences within the European context. The MOOC is divided into 5 topics corresponding to 5 major issues when doing business in Europe: 1. Approaching the European market(s) 2. Innovating in Europe 3. Investing in Europe 4. Building the value chain 5. Integrating the diversity There are no prerequisite for this course. At the end of the coursework, participants will be able to understand how to design a European-scale development strategy. Please enroll and thank you in advance for choosing this course!

COURSE_DESCRIPTION: Mobile device accessories, ports, and connectivity features allow for a variety of different connections as well as the enabling of additional mobile device features. As an IT industry professional, you will be called upon to configure those accessories and network connections, as well as provide application support in various situations. In this course, discover how to set up and configure Universal Serial Bus (USB). Explore key features of lightning and serial connectors, as well as near-field communication, Bluetooth, and hotspot connectivity options. Examine how global positioning system (GPS) services and cellular location services work. Lastly, explore the benefits of implementing mobile device management (MDM) and mobile application management (MAM) solutions. After completing this course, you will be able to set up and configure network connections and mobile device accessories. This course will prepare learners for the CompTIA A+ Core 1 (220-1101) certification exam.

COURSE_DESCRIPTION: Tableau is widely recognized as one of the premier data visualization software programs. For many years access to the program was limited to those who purchased licenses. Recently, Tableau launched a public version that grants the ability to create amazing data visualizations for free. Account members can also share and join projects to collaborate on projects that can change the world. In this project, we will learn how to create an account, create an Interactive Graph in Tableau and share it with others. Learning to use this in-demand tool has applications in Marketing, Finance, Operations, Sales, and many other business functions. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Tagtäglich bringen Menschen ihre Ideen oder Ansichten hervor. Doch das Herzstück einer jeden großen Veränderung ist ein Argument, mit dem jemand andere überzeugte. Die Grundlage eines Arguments ist es, einen Standpunkt auszudrücken und ihn mit genügend Beweisen zu stützen, um jemanden davon zu überzeugen, ein Fazit zu akzeptieren. Wie können Sie feststellen, was die Fakten sind, was die Meinung ist und wie Sie zur Wahrheit in einer Sache vordringen? Zum kritischen Denken gehören das Identifizieren, Konstruieren und Bewerten von Argumenten, denn nur so können Sie logische Schlussfolgerungen ziehen und Probleme lösen. Dieser Kurs vermittelt, wie Sie Argumente in den richtigen Situationen einsetzen und woran Sie ein wirkungsvolles Argument erkennen. Außerdem lernen Sie, die gängigen logischen Fehlschlüsse zu erkennen, die ein Argument entkräften können, und wie Sie Argumentationsfähigkeiten gegen manipulative Argumente anwenden können.

COURSE_DESCRIPTION: Cloud computing uses an ongoing operating expense (OPEX) model as opposed to the capital expenditure (CAPEX) model required to host IT equipment and services entirely on-premises. Use this course to learn how to set up various AWS cost management strategies. Begin by reviewing these strategies before practicing using tags for cost tracking. Next, analyze costs using the Cost Explorer tool and identify underutilized resources. Moving on, configure AWS budgets, EC2 spot instances, and EC2 as well as RDS reserved instances. Lastly, configure an AWS savings plan and work with consolidated billing. By the end of this course, you'll be able to set up cost-saving strategies for all your AWS services. Furthermore, this course will help you prepare for the AWS Certified SysOps Administrator - Associate exam, SOA-C02.

COURSE_DESCRIPTION: Building a RESTful API service to perform create, read, update, and delete (CRUD) operations is an integral part of building microservices with Spring Boot. In this course, you'll learn how to build a RESTful API service to perform CRUD operations. You'll use Advanced REST Client to test your API service, and wire up a MySQL database using JPA, Spring Data, and Hibernate. You'll then add a front end to your application using the Thymeleaf template engine. Finally, you'll build RESTful microservices in Spring Boot, integrate with a relational database to store your data, set up a front end for your application, and add caching for common requests.

COURSE_DESCRIPTION: >>> By enrolling in this course you agree to the End User License Agreement as set out in the FAQ. Once enrolled you can access the license in the Resources area <<< This course, Applied Artificial Intelligence with DeepLearning, is part of the IBM Advanced Data Science Certificate which IBM is currently creating and gives you easy access to the invaluable insights into Deep Learning models used by experts in Natural Language Processing, Computer Vision, Time Series Analysis, and many other disciplines. We'll learn about the fundamentals of Linear Algebra and Neural Networks. Then we introduce the most popular DeepLearning Frameworks like Keras, TensorFlow, PyTorch, DeepLearning4J and Apache SystemML. Keras and TensorFlow are making up the greatest portion of this course. We learn about Anomaly Detection, Time Series Forecasting, Image Recognition and Natural Language Processing by building up models using Keras on real-life examples from IoT (Internet of Things), Financial Marked Data, Literature or Image Databases. Finally, we learn how to scale those artificial brains using Kubernetes, Apache Spark and GPUs. IMPORTANT: THIS COURSE ALONE IS NOT SUFFICIENT TO OBTAIN THE "IBM Watson IoT Certified Data Scientist certificate". You need to take three other courses where two of them are currently built. The Specialization will be ready late spring, early summer 2018 Using these approaches, no matter what your skill levels in topics you would like to master, you can change your thinking and change your life. If you're already an expert, this peep under the mental hood will give your ideas for turbocharging successful creation and deployment of DeepLearning models. If you're struggling, you'll see a structured treasure trove of practical techniques that walk you through what you need to do to get on track. If you've ever wanted to become better at anything, this course will help serve as your guide. Prerequisites: Some coding skills are necessary. Preferably python, but any other programming language will do fine. Also some basic understanding of math (linear algebra) is a plus, but we will cover that part in the first week as well. If you choose to take this course and earn the Coursera course certificate, you will also earn an IBM digital badge. To find out more about IBM digital badges follow the link ibm.biz/badging.

COURSE_DESCRIPTION: By the end of this project, learners will know how to start out with GeoDa to use it for spatial analyses. This includes how to access and download the software, import multiple layers, and a basic overview of GeoDa. Spatial analysis, as a type of data analysis, has been getting increasingly important. The beginnings are often dated back to John Snow's cholera outbreak maps from the mid-1800s. In 2003, Dr. Luc Anselin at the University of Chicago developed GeoDa, together with his team, to provide free software that digitizes old school pin maps. Today, it is used in various fields to plan cities and infrastructure, create crime maps, emergency management, and visualize finds at archaeological sites. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: The research kitchen is a unique format that we have developed extra for you: curious learners interested in competitive strategy and organization design yearning for a first glimpse into the world of research. It is voluntary and "just for fun" - so please, go on and have a look! Different to other courses of our specialization Competitive Strategy and Organization Design it is comprised of brief paper sessions rather than modules. For a change, you will experience the instructor Tobias Kretschmer at the whiteboard of his very own institute at LMU Munich. Here he will summarize key findings of recent research papers on topics relating to the three courses Competitive Strategy, Advanced Competitive Strategy and Strategic Organization Design. Topics that researchers today are working on to enhance the knowledge of tomorrow. We hope you enjoy this innovative format and possibly even find some inspiration and motivation for your own future research.

COURSE_DESCRIPTION: Discover the basics of using Dynamics 365, the cloud-based CRM tool from Microsoft. Start by exploring the features for general navigation before learning how to sign in, navigate the module using the Sales and Sales Hub interfaces, and browse your sales records. In Microsoft Dynamics 365, each view is made up of specific data sets, or records. You will learn how to access these records in order to start managing and developing your different customer accounts and deals. The course covers how to perform different actions, such as edit, bulk edit, and create customized views.

COURSE_DESCRIPTION: In this 22-video course, learners discover how Azure AD serves as a central cloud-based identity provider. Examine creating and managing Azure AD users with graphical user interface (GUI) and command-line tools, and how to enable multifactor authentication (MFA). This course is one of several courses preparing learners for AZ-104 Microsoft Azure Administrator certification exam. Key concepts covered here include the role Azure AD plays in cloud authentication; how to use the portal to explore Azure AD; and how to use command-line interface (CLI) to navigate between Azure AD tenants. Next, learn how to use PowerShell to navigate Azure AD; manage Azure AD guest user accounts; and create Azure AD users through bulk create. Learn how MFA hardens user sign-in security, then how to enable and test Azure AD user MFA, enable users to reset their own passwords, and restore deleted Azure AD users. Assign licenses to users; configure banned passwords; and add Azure AD licensed features. Finally, assign an existing Azure subscription to a different Azure AD tenant; and configure Azure AD smart lockout feature.

COURSE_DESCRIPTION: Thriving in the Information Age compels organizations to deploy information as an actual business asset, not as an IT asset or merely as a business byproduct. This demands creativity in conceiving and implementing new ways to generate economic benefits from the wide array of information assets available to an organization. Unfortunately, information too frequently is underappreciated and therefore underutilized. This first course in the two-part Infonomics series provides a non-technical perspective on and methods for understanding and taking advantage of information's unique economic characteristics. Starting with dissecting whether the information is or isn't an asset or even property, students will begin to appreciate the challenges and opportunities with treating it as one. Then the course examines how information behaves in the context of various familiar micro-economic concepts, and what can be gleaned from this to improve the way information is managed and leveraged. This leads to exploring the various ways information can generate economic benefits-or be monetized, including how various styles of business analytics can increase information's potential and realized value for organizations.

COURSE_DESCRIPTION: In this course, explore cost management tools such as Amazon Web Services (AWS) Budgets and cost explorer, as well as reserved and spot instances. Discover how to centrally manage desktops and apps using WorkSpaces and AppStream. This course can be used in preparation for the AWS Certified Solutions Architect-Professional SAP-C01 certification exam. Firstly, explore AWS charges using the cost explorer tool, then use the AWS command-line interface (CLI) and Microsoft Powershell to retrieve AWS charges. Learn to create AWS cost and usage cloud budgets. Discover how to enable the S3 bucket requester pays option for S3 requests and transfers to be paid by the data requester. Then you will configure spot instances and reserved instances to reduce EC2 instance costs. Learn about Amazon WorkSpaces, and how any type of device can access a cloud-based desktop. Learners will create an Amazon WorkSpace, connect to it, modify settings, and create a custom image. Discover AppStream and the benefits of streaming apps to users. Configure an AppStream image, an AppStream fleet and stack, and then connect to AppStream apps.

COURSE_DESCRIPTION: Die meisten Unternehmen wissen nicht wohin mit so vielen Daten. Diese Daten sind jedoch nur so wertvoll wie die Qualität der Verfahren, die zu ihrer Auswertung eingesetzt werden. Wie sammelt man also scheinbar verstreute Daten aus verschiedenen Quellen und verwandelt sie in verständliche und für alle nutzbare Erkenntnisse? Power BI, der Business-Analyse-Service von Microsoft, ist eine Möglichkeit. Nutzen Sie diesen Kurs, um genau zu verstehen, was mit Datenanalyse gemeint ist, einschließlich spezifischer Aufgaben und Arbeitsaufgaben. Finden Sie heraus, wie die Funktionen von Power BI diese Aufgaben effizient und effektiv unterstützen können. Außerdem erhalten Sie Einblick in die Schritte zum Ablegen der Zertifizierungsprüfung PL-300, die Datenanalysekompetenzen mit Power BI prüft. Nach Abschluss des Kurses werden Sie ein klares theoretisches Verständnis davon haben, wie Power BI zur Ausführung von Datenanalysen dient.

COURSE_DESCRIPTION: Will Artificial Intelligence soon be surpassing humans? This is rapidly becoming one of the central questions of our time -- but it is the wrong question. In this course, we will provide a non-technical look at where AI has come from, and where it is going. We will see that there is no reason to expect that AI will be surpassing humans. Instead, what we are learning to create with AI is the illusion of intelligence. AI has actually been discussed for centuries, in fields like philosophy, linguistics and cognitive science. We will show that these perspectives help to shed light on current developments in AI, including impressive recent systems like GPT-3.

COURSE_DESCRIPTION: ***Wir möchten Sie darüber informieren, dass die Spezialisierung "Data Engineer, Big Data and ML on Google Cloud auf Deutsch" am 10. November 2020 geschlossen und nicht mehr angeboten wird.*** In diesem einwöchigen On-Demand-Intensivkurs erhalten Teilnehmer eine praxisorientierte Einführung in das Entwerfen und Erstellen von Modellen für das maschinelle Lernen (ML) mithilfe der Google Cloud Plattform. In Präsentationen, Demos und praxisorientierten Labs lernen die Teilnehmer ML- und TensorFlow-Konzepte kennen und entwickeln ML-Modelle, die sie anschließend auswerten und produktionsreif machen. ZIELE In diesem Kurs werden die folgenden Fähigkeiten vermittelt: • Anwendungsfälle für maschinelles Lernen erkennen • ML-Modelle mit TensorFlow erstellen • Skalier- und bereitstellbare ML-Modelle mit Cloud ML erstellen • Bedeutung der Datenverarbeitung und der Kombination von Features verstehen • Fortgeschrittene ML-Konzepte in Modelle einbinden • Trainierte ML-Modelle produktionsreif machen VORAUSSETZUNGEN Für maximale Lernerfolge sollten die Teilnehmer folgende Voraussetzungen erfüllen: • Abschluss des Kurses "Google Cloud Plattform Fundamentals: Big Data & Machine Learning" ODER entsprechende Erfahrung auf dem Gebiet • Grundkenntnisse in gängigen Abfragesprachen wie SQL • Kenntnisse in Datenmodellierung, Extraktion, Transformation und Ladeaktivitäten • Entwicklung von Anwendungen mit einer

gängigen Programmiersprache wie Python • Vertrautheit mit maschinellern Lernen und/oder Statistik Hinweis zum Google-Konto: • In China sind Google-Dienste derzeit nicht verfügbar.

COURSE_DESCRIPTION: Web APIs have quickly grown in popularity over the past few years and Visual Studio provides out of the box templates and tooling that make for a very pleasant development experience. In this course, you'll learn about web API Routes, the pipeline, content negotiation, and documentation, beginning with router and centralized routes in ASP.NET, attribute routing, specifying data types, and how to create custom constraints. Then you'll explore the pipeline and how to navigate it, action filters, and the role of message handlers. Then you'll discover content negotiation, media types, media type formatters, and how to manually run content negotiation. Finally, you'll learn about web API versioning, Swagger and the Open API Initiative, and how to automatically generate rich documentation. This course was original created by Global Knowledge (GK).

COURSE_DESCRIPTION: Statistical experiment design and analytics are at the heart of data science. In this course you will design statistical experiments and analyze the results using modern methods. You will also explore the common pitfalls in interpreting statistical arguments, especially those associated with big data. Collectively, this course will help you internalize a core set of practical and effective machine learning methods and concepts, and apply them to solve some real world problems. Learning Goals: After completing this course, you will be able to: 1. Design effective experiments and analyze the results 2. Use resampling methods to make clear and bulletproof statistical arguments without invoking esoteric notation 3. Explain and apply a core set of classification methods of increasing complexity (rules, trees, random forests), and associated optimization methods (gradient descent and variants) 4. Explain and apply a set of unsupervised learning concepts and methods 5. Describe the common idioms of large-scale graph analytics, including structural query, traversals and recursive queries, PageRank, and community detection

COURSE_DESCRIPTION: Microsoft Power BI ist eine leistungsstarke und vielseitige Visualisierungstechnologie, die bei der Datenanalyse, insbesondere bei der Analyse von Geschäftsdaten, weit verbreitet ist. Business-Analysten können mit diesem Dienst interaktive Berichte erstellen und veröffentlichen, die sich an Führungskräfte und/oder Kollegen richten. Machen Sie sich in diesem Einführungskurs mit den Besonderheiten der Datenvisualisierung vertraut. Sie lernen verschiedene Arten von Visualisierungen und ihre Anwendungsfälle kennen, von Standarddiagrammen bis hin zu solchen für Sonderfälle. Sie erhalten einen Überblick über die Struktur von Power BI kennen und erfahren, wie sie bei der Datenvisualisierung hilft. Dann untersuchen Sie die Berichterstellung in Power BI. Am Ende dieses Kurses haben Sie die Theorie hinter der Datenvisualisierung in Power BI

verstanden und können Diagramme in Power BI erstellen und formatieren. Dies ist einer von vier Lernpfaden, die zur Vorbereitung auf die Prüfung PL-300: Datenanalyse mit Microsoft Power BI dienen.

COURSE_DESCRIPTION: Develop your entrepreneurial mindset and skill sets, learn how to bring innovations to market, and craft a business model to successfully launch your new business. The Entrepreneurship Specialization examines the entrepreneurial mindset and skill sets, indicators of innovation opportunities, critical steps to bring innovations to the marketplace, and innovation strategies to establish and maintain a competitive advantage. Fundamentals of new venture financing are explored with attention to capital structures for new ventures, term sheets and how to negotiate them, and the differences between early-stage versus later-stage financing. You will develop an understanding of how to develop winning investor pitches, who and when to pitch, how to avoid common mistakes, and how to 'get to the close'. In the final Capstone Project, you will apply the tools and concepts from the specialization courses by crafting a comprehensive, customer-validated business model, and creating a business plan and investor pitch.

COURSE_DESCRIPTION: The 5G core network is where a lot of the magic involved with 5G takes place. This next-generation technology's core network delivers network services to connected devices in a way never implemented before. Understanding the operation of this core network and its components, services, and methods of deployment is an integral part of gaining a deeper understanding of 5G as a whole. Use this course to examine the 5G core network and what makes it so groundbreaking. Investigate the various modes of 5G deployment, diving deeper into the architecture itself

and exploring the role that virtualization plays in all of this. Upon completion of this course, you'll have an appreciation of the revolutionary nature of the 5G core network in comparison to previous generation mobile communication core networks.

COURSE_DESCRIPTION: Being able to monitor data processes to ensure they are operational and working correctly is a crucial part of running your business. Azure provides the Azure Monitor service and the Azure Log Analytics service to perform this function. In this course, you'll learn about the features of the Azure Monitor tools and the concepts of continuous monitoring and visualization. Next, you'll examine how to create metric charts using the Azure Monitor, as well as how to collect and analyze Azure resource log data and perform queries against the Azure Monitor logs. You'll explore how to create and share dashboards that display data from Log Analytics, create Azure Monitor alerts, and use the Azure Data Factory Analytics solution to monitor pipelines. You'll learn how to send the Azure Databricks logs to the Azure Monitor and use the dashboard to analyze the Azure Databricks metrics. Finally, you'll learn how to enable monitoring for Azure Stream Analytics and configure alerts, and also query Azure Log Analytics and filter, sort, and group query results. This course is one in a collection that prepares learners for the Microsoft Data Engineering on Microsoft Azure (DP-203) exam.

COURSE_DESCRIPTION: Welcome to this project-based course Data Manipulation with dplyr in R. In this project, you will learn how to manipulate data with the dplyr package in R. By the end of this 2-hour long project, you will understand how to use different dplyr verbs such as the select verb, filter verb, arrange verb, mutate verb, summarize verb, and the group_by verb to manipulate the gapminder dataset. Also, you will learn how to combine different dplyr verbs to manipulate the gapminder dataset to get the desired result. Note, you do not need to be an expert data analyst, data

scientist or statistical analyst to be successful in this guided project, just a familiarity with the R language will suffice. If you do not have a prior experience with R, I recommend that you should take the Getting Started with R project before taking this project.

COURSE_DESCRIPTION: Exceptions are errors that occur while your application is running. They may be caused by program logic, unexpected user input, or a host of other reasons. If left unhandled, your applications may behave in unexpected ways. In this course, you'll learn how to add error handling code to an application and how to use try-catch and try-catch finally blocks. You'll also learn how to catch exceptions thrown by the .NET framework, throw exceptions from your own methods, and define custom exception types. In .NET, you can share code across multiple projects by placing the code inside a class library. A class library is a collection of classes and other types compiled into a dynamic link library. In this course, you'll also learn how to create a DLL and call code in that DLL from your executable. You'll learn about assemblies and how a .NET DLL differs from a Windows DLL. You'll examine how to create and work with class libraries. This course was originally created by Global Knowledge (GK).

COURSE_DESCRIPTION: Većina novih vođa ne shvaća koliko se njihova uloga razlikuje od uloge pojedinačnog davatelja. Često imaju pogrešne predodžbe o tome što obuhvaćaju zadatke vođe, i mogu se iznenaditi kad saznaju da se vještine i metode potrebne za uspjeh pojedinačnog davatelja prilično razlikuju od onih potrebnih za uspjeh vođe. Na ovom se tečaju opisuju neki mitovi o vođenju i odgovarajuće istinite tvrdnje kako bismo pojasnili što vođi zaista rade. Na njemu se i ukazuje na tipične zahtjeve i ograničenja vođinog posla. Konačno, opisuju se strategije za nošenje s uobičajenim pogreškama osoba koje su po prvi puta vođe.

COURSE_DESCRIPTION: The business world is full of data. Using this data strategically presents a company with serious competitive advantages. The tricky part is making sense of the data and then communicating what it means. Data visualization (or data viz, for short) provides actionable insights out of what can be complex sets of data. In this course, you'll learn the considerations for creating data visualizations and how to relay your message using data visualization tools. You'll learn how to communicate clearly using data visualizing techniques. And you'll gain insight into how to use key design best practices to ensure your visualizations are clearly and accurately telling the story you want them to.

COURSE_DESCRIPTION: Data can come our way in multiple forms and from multiple file types. It's likely that at some point you will be faced with a data set that includes categories and subcategories under one heading or under headings with nested subheadings. Cutting through the file structure can seem like a time-consuming task, so it is critical to leverage VLOOKUP and HLOOKUP to pull out the needed data quickly. In this course you will understand how lookup tables work and apply VLOOKUP and HLOOKUP formulas to quickly extract data by treating a section of your spreadsheet as a lookup table. You will do this as we work side-by-side in the free-to-use software Google Sheets. By the end of this course, you will understand use cases for using vertical and horizontal lookup to extract data when data sets have categories configured with multiple levels. You will also be able to confidently apply VLOOKUP and HLOOKUP formulas to grab data in any spreadsheet software. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Die Enterprise Security Architecture for Reliable ICT Services (ESARIS) ist die Sammlung von Verfahren, Standards und Arbeitshilfen für die Absicherung aller ICT-Services, die T-Systems für Kunden bereitstellt. ESARIS baut auf den existierenden Prozessen des IT-Service-Managements und der internen Unternehmensorganisation auf und ist auf den Bedarf von T Systems als großem ICT-Dienstleister zugeschnitten.

Die vorliegende Schulung richtet sich an Mitarbeiter und Mitarbeiterinnen im Tätigkeitsbereich "Service Design and Implementation". Die in den ESARIS Sicherheitsstandards beschriebenen technischen und prozessoralen Sicherheitsmaßnahmen dienen auch als Grundlage für "Service Design and Implementation". ICT-Services basieren auf vordefinierten Elementen; Neuentwicklungen führen ggf. Zu neuen vordefinierten Elementen für deren spätere Verwendung. Die Schulung zeigt, wie die ESARIS-Standards in der Lösungsentwicklung und in der Realisierung sowie bei der Definition und Implementierung von Prozessen genutzt werden. Auf die Integration von Fremdleistungen wird eingegangen. Lösungen sollen vordefinierte Elemente nachnutzen: Entsprechend wird das Standardisierungskonzept von ESARIS erklärt und es wird umrissen, wie man solche Informationen in der ESARIS-Bibliothek finden kann.

COURSE_DESCRIPTION: Einige grundlegende Konzepte für das Supply Chain Management (SCM) können das Liefer- und Kostenmanagement erheblich verbessern und gleichzeitig die Wertschöpfung für Kunden steigern. In diesem Kurs lernen Sie die Komponenten einer Lieferkette und die Hauptziele von SCM kennen, z. B. Kostensenkung und Lieferoptimierung. Sie erfahren, wie Organisationen SCM-Strategien kombinieren. Außerdem werden Sie die Komponenten der Lieferkette, einschließlich der Rolle des Lieferanten, untersuchen und die wichtigsten Faktoren behandeln, die sich auf die Effizienz auswirken. Sie betrachten außerdem die Merkmale des Service Supply Chain Managements und erfahren mehr über verwandte Strategien.

COURSE_DESCRIPTION: To work as a DevOps technical support engineer, you need a basic understanding of the growing number of version and source control tools. In this course, you'll explore the history of source control systems, examine how project management without source control differs from PM with source control, and recognize the control mechanisms used by Dev and Ops teams when working with control systems. You'll then identify the different types of source control systems and when to use them, and distinguish between cloud and cloudless version control systems. Next, you'll recognize the best practices for implementing version control in DevOps, and how to improve and measure the effectiveness of source control systems. Finally, you'll list the features of a source code repository and the primary source code repository providers.

COURSE_DESCRIPTION: Welcome to the Advanced Linear Models for Data Science Class 2: Statistical Linear Models. This class is an introduction to least squares from a linear algebraic and mathematical perspective. Before beginning the class make sure that you have the following: - A basic understanding of linear algebra and multivariate calculus. - A basic understanding of statistics and regression models. - At least a little familiarity with proof based mathematics. - Basic knowledge of the R programming language. After taking this course, students will have a firm foundation in a linear algebraic treatment of regression modeling. This will greatly augment applied data scientists' general understanding of regression models.

COURSE_DESCRIPTION: This course is designed to quite literally 'make a science' out of something at the heart of society: social networks. Humans are natural network scientists, as we compute new network configurations all the time, almost unaware, when thinking about friends and family (which are particular forms of social networks), about colleagues and organizational relations (other, overlapping network structures), and about how to navigate delicate or opportunistic network configurations to save guard or advance in our social standing (with society being one big social network itself). While such network structures always existed, computational social science has helped to reveal and to study them more systematically. In the first part of the course we focus on network structure. This looks as static snapshots of networks, which can be intricate and reveal important aspects of social systems. In our hands-on lab, you will also visualize and analyze a network with a software yourself, which will help to appreciate the complexity social networks can take on. During the second part of the course, we will look at how networks evolve in time. We ask how we can predict what kind of network will form and if and how we could influence network dynamics.

COURSE_DESCRIPTION: Maintaining cloud applications requires awareness of many operational concerns. Being able to effectively monitor and evaluate data to deliver great application experiences while identifying opportunities to optimize spending is key. Through this course, examine the practices and tools used to meet monitoring, cost, and compliance requirements when managing cloud-native applications. Learn how to audit activity in cloud environments and the benefits of cloud provider compliance services. Next, explore resource usage metering and measuring and event-driven approaches to proactively manage operational issues. Finally, discover how to add observability to applications and optimize spending with cost analysis tools. After course completion, you'll be able to outline how to fulfill cloud cost, monitoring, and compliance requirements.

COURSE_DESCRIPTION: In traditional software development, security teams are often included as an afterthought, which can lead to expensive rewrites, redesigns, and reconfigurations. By engaging and involving your security team throughout your DevOps process, you can build higher quality, more secure software solutions. In this course, learn ways to ensure better resiliency of the DevOps pipeline by introducing security best practices into your processes from the get-go. Explore how to apply analytics to your pipeline, learn about automating configuration management, and gain practical tips on using Terraform and Ansible. On completing this course, you'll be able to better secure your DevOps process, automate your security testing, and apply analytics to your CI/CD pipelines.

COURSE_DESCRIPTION: In this guided project you will learn how to develop a schedule for your project. You will combine your project activities (activity list), their relationships (precedence) and their duration estimates to produce a project schedule. We will start by considering the list of the activities necessary to create our project scope, by decomposing the lowest elements of our WBS (see guided project: Develop a WBS), the relationships of the activities in a project precedence network diagram (there is another Guided Project for Developing the precedence Network Diagram), the estimate for the activities duration (And yes there another GP for Estimation the activity Durations). We will use ProjectLibre, an open source project scheduling swr to develop our project schedule. The concept are the same, if you are using another project scheduling tool. You will enter different type of tasks, different kind of relationships, and task durations, customize the calendar to your environment and produce a project schedule. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: This course covers the bedrock of Exception Handling in Java, the try-catch-finally code structure. Participants will cover the class hierarchies in exception handling; the stream and file processing; and how Java's support for exceptions and streams is built around complex class structures. You will learn how code might result in exceptions that are enclosed within a try block. Because this code structure could result in a signal to Java that normal programming might be disrupted and will cause the code evaluation to be short-circuited, the course explores details of catch blocks, including the use of multiple catch blocks; the use of the pipe operator (- operator) to chain different exceptions within the same catch block; and how catch blocks must be arranged for related exceptions. The last part of exception handling is the 'finally block.' This keyword (finally) is used to ensure the correct release of resources, such as file handles, no matter what handled or unhandled exceptions might arise within the try block.

COURSE_DESCRIPTION: This channel includes three separate Bootcamps. Here is a description for each: Agile Project Management Target audience: anyone preparing for the PMI-ACP exam This course is called Agile Project Management (rather than PMI-ACP Exam Prep) because some participants want Agile training but don't want to get certified. However, this course is benchmarked against the PMI-ACP and serves as a good exam prep. Session 1: Introduction to the Agile Principles and Mindset Session 2: Stakeholder Engagement and Value-driven Delivery Session 3: Product Backlog Prioritization and Agile Teams and Tools Session 4: Adaptive Planning, Problem Detection, and Continuous Improvement How to access: Click on the Agile Project Management: field and choose Agile Project Management Agile Toolkit (Value-stream Mapping) Target audience: anyone managing agile projects or participating on a product development team Course description: In this Bootcamp, you'll learn about value stream mapping - creating visual representations of the material and information flows that lead to a product or service being created. Value stream mapping makes it easier to identify where inefficiencies are occurring, and their causes. You'll also learn about creating a future-state value stream map and eliminating sources of waste and process blocks. How to access: Click on the Agile Project Management: field and choose Agile Toolkit (Value-stream Mapping) Agile Toolkit - Product Backlog Target audience: anyone managing agile projects or participating on a product development team Course description: In this Bootcamp, you'll learn about creating and managing a product backlog. - a to-do list of all the features and functionality a product should

contain. The product backlog is also considered an artifact in agile and Scrum product development. How to access: Click on the Agile Project Management: field and choose Agile Toolkit: Product Backlog

COURSE_DESCRIPTION: In diesem Kurs werden verschiedene Word 365-Funktionen für die Arbeit mit Diagrammen untersucht. Sie lernen, wie Sie ein Diagramm mit Formen erstellen, den Fülleffekt einer Form ändern und eine benutzerdefinierte Form erstellen. Sie erfahren auch, wie Sie den Auswahlbereich verwenden und Elemente auf einer Seite anordnen können. Als Nächstes befasst sich dieser Kurs mit der Erstellung eines Zeichenbereiches, mit dem Sie eine Gruppe von Objekten leichter verschieben können. Außerdem lernen Sie, wie Sie eine SmartArt-Grafik einfügen und ändern können. Schließlich lernen Sie, wie Sie eine SmartArt-Grafik formatieren können, damit sie sich von anderen abhebt.

COURSE_DESCRIPTION: The fourth course in the Salesforce Sales Operations Professional Certificate - Reports, Dashboards, and Customer Success in Salesforce - is for anyone who is curious about entry level sales roles that require foundational skills in Salesforce, the sales operations specialist role specifically, how to use tools in Salesforce to improve customer service at a business, how to leverage data in Salesforce to improve the overall performance of a sales team, and the path to becoming a Salesforce administrator. This fourth course goes into more depth on how a sales operations specialist would use Salesforce Service Cloud to support a variety of different customer service needs. You will learn the basics of effective customer support, and you will leverage a variety of new tools available in the Salesforce Service Cloud to effectively manage customer relationships. This course also goes into more depth on how a sales ops specialist would use Salesforce Reports and Dashboards to support a variety of needs from a sales team manager to track, improve, and forecast the overall performance of a sales team. You will learn how to use filters to produce custom reports in Salesforce, and then discover how to visualize that data effectively through the use of charts and dashboards. For this course, it is recommended (but not required) that you have some background knowledge of sales and CRM, as well as an understanding of the basics of Salesforce platform navigation. If you're a total beginner with these concepts, you can still be successful in this course - however, it might require some additional work on your part. By enrolling in this course, you are taking the next step to kickstarting your career in Salesforce. Congratulations on continuing this exciting journey!

COURSE_DESCRIPTION: In this 19-video course, explore Azure key vaults and how they can contain secrets, keys, and certificates, which are used to secure other resources such as VM disks and databases. Examine the key vault access policy and how it controls access to key vault contents in this course, which can be used in preparation for the AZ-500 Microsoft Azure Security Technologies certification exam. Begin by learning about the purpose of Azure key vaults; recognize how cryptography secures data; identify the public key infrastructure (PKI) certificate lifecycle, and recognize how to differentiate between the secure sockets layer (SSL) and transport layer security (TLS). You will learn how to create a key vault using the graphical user interface (GUI); using the command-line interface (CLI), and using PowerShell. Learn how to configure a key vault access policy; create keys using the GUI, the CLI, and PowerShell. Also, create secrets by using the GUI, the CLI, and using PowerShell. Then move on to key vault certificate creation by using the GUI, the CLI, and PowerShell.

COURSE_DESCRIPTION: Excel offers a set of tools that allows you to explore more in detail data analysis and complex formulae. In this 8-video course, you will learn how to use different formulae to make calculations when you have multiple conditions imposed. You will also become able to forecast data by using the NPER function. Key concepts covered in this course include how to import, edit, and update data from a text file; how to import, edit and update data from a .csv file; and how to use the LOOKUP, MATCH, and INDEX functions to extract data. Next, you will learn how to run multiple conditions without nesting other functions; examine how to calculate averages by using one or more conditions; and learn how to calculate the smallest and the largest numbers that meet one or more criteria. Finally, learn how to count cells that meet one or more criteria; and how to calculate the number of periods to pay a loan and forecast loan approval that meet one or more criteria. In order to practice what you have learned, you will find the Word document named Excel 2019 for Windows: Managing Data Exercise as well as the associated materials in the Resources section.

COURSE_DESCRIPTION: Cloud security combines technologies, policies, controls, and services to help protect cloud infrastructure, resources, and data. In this course, you'll explore the history of IT security and learn how it evolved to include cloud technologies. Discover common security threats such as cloud misconfigurations, unauthorized access, limited cloud visibility, insider threats, malware infections, and account hijacking. Explore how built-in security controls can attempt to mitigate security attacks and review cloud security data breaches from recent years, including how they were discovered and mitigated and the cost associated with resolving them. Lastly, explore how enterprises can plan for various security scenarios and why leaders should make security a key feature of their products and services.

COURSE_DESCRIPTION: Cross tabulation or x-tab reports present select slices of data in a matrix format making it easier to visualize patterns and explore similarities and differences between categorical variables. In this project, you will gain hands-on experience cutting through the noise in a data set by creating crosstab reports to methodically compare the differences between groups. You will also understand how cutting through the group differences will aid in gaining insights that a business can use for decision-making. By the end of this project, you will be able to further your business intelligence goals by confidently creating cross tabulation reports to cut through the complexity of survey data to highlight only

meaningful group differences. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: By the end of this project, you will create a dashboard with a query formula using Google sheets. You will be able to summarize a large sheet of data and organize it in a visually appealing dashboard. Dashboards are an analytics tool used to visualize Big Data across all industries. These dashboards provide critical reporting and metrics information and are integral in Business Performance Management. Dashboards display real-time key metrics and performance indicators, guiding decisions and better navigating the surrounding landscape. Whether you need to create quarter reports or create reports which require a significant amount of upkeep and modification to meet differing and sometimes competing requirements this dashboard is for you. Throughout the project you will be able to acquire the basics of query formula to build your dashboard. You will be able to organize your data source using data validation and conditional formatting. Finally you will be able to form your dashboard with charts, spark lines and score cards. This dashboard will help you advance in your job and stand out in your company. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Welcome to AWS Fundamentals: Addressing Security Risk! This course will give you an overview of security best practices when developing and managing applications on AWS. The course, created by AWS experts and delivered by AWS Solutions Architects, uses video lectures, hands-on exercise guides, demonstrations, and quizzes to dive deep on concepts about security on AWS. You will learn about the concept of "least privilege" and the AWS Shared Responsibility Model, as well as view demonstrations of Amazon GuardDuty, AWS Secrets Manager, and cross-account access. We encourage IT professionals and leaders who are interested in learning about best practices for securing an AWS environment and applications developed on AWS to enroll in this course. Before taking this course, we recommend you complete AWS Fundamentals: Going Cloud Native

(<https://www.coursera.org/learn/aws-fundamentals-going-cloud-native>). Class forums will also allow you to ask questions and interact with AWS training instructors.

COURSE_DESCRIPTION: Discover how to prepare, control, and clean up data before you start working with it to ensure that you get the most out of your analyses in Tableau Desktop in this 10-video course. Learners begin by observing how to manage data types for columns in Data Source page, then take a look at unioning data, and using unions to combine data from different locations and appending values in a single table. Tableau works best with clean data, so next you will explore how to work with data interpreter to identify data anomalies and clean up data. Learn how to split data fields using the split and custom split in the Tableau Data Source Page; use the pivot tool to prepare data for extraction into the Tableau Data Engine, and filter data at the data source level. Delve into managing data sources in a Tableau workbook; replace data sources from the Data Source Page and worksheet view in Tableau Desktop, and refresh live data sources. The course concludes by helping learners discover how to append data to extracts.

COURSE_DESCRIPTION: This course serves as a quick introduction to the concepts around graph databases, their use cases, and gives you a glimpse into the Neo4j graph database. Explore a theoretical overview of graphs, including how information is stored as nodes and edges, and how graph databases emphasize the connections between entities. Learn about a specific graph database, Neo4j, which is among the most mature and widely used out in the market. Practice the installation and setup of such a database, and look into the UI-based applications available to interact with it - namely the Neo4j Desktop and Neo4j browser. Moving on, examine some basic database administration tasks such as creating a local database and connecting to a remotely hosted one. Finally, delve into the fundamentals of querying a Neo4j database using its own Cypher query language. Upon completion you'll be able to recognize the strengths and use cases for graph databases and to set up and use Neo4j Desktop

COURSE_DESCRIPTION: Cloud computing services incur ongoing monthly charges, which are categorized as operating expenses (OPEX). AWS provides many ways to reduce monthly charges across all AWS services, along with powerful tools to analyze monthly charges. In this course, explore AWS Compute Optimizer and learn when to use various cost savings strategies. Next, configure the S3 Requester Pays option and work with Elastic Compute Cloud (EC2) instance reservations and spot instances. Then, tag resources for cost allocation purposes using the console, the CLI, and PowerShell. Analyze AWS charges using the Cost Explorer tool. Finally, create cost and usage budgets in order to track monthly expenditures and to be alerted when a certain threshold cost is reached. This course can be used to prepare for exam SOA-C02, AWS Certified SysOps Administrator - Associate.

COURSE_DESCRIPTION: Die einzige Kommunikation, die unsere frühesten Vorfahren kannten, war nonverbal! Die primitiven Bereiche unseres Gehirns sind noch immer so vernetzt, dass sie automatisch reagieren, wenn wir Angst haben, uns bedroht fühlen, angeekelt, überrascht oder glücklich sind. Doch die Fähigkeit unseres Gehirns, auf effektive, nonverbale Weise zu reagieren und zu kommunizieren, hat sich im Laufe der Zeit ebenso weiterentwickelt wie unser Verständnis der damit verbundenen Vorgänge. In diesem Kurs erfahren Sie, wie sehr Einstellung, Körperhaltung, Gesten, Gesichtsausdruck und Tonfall unsere Kommunikation beeinflussen.

COURSE_DESCRIPTION: Begin your journey in IBM Cloud with this introductory course! You will learn about the many offerings and services on IBM Cloud that make it the most open and secure public cloud for developers and enterprises. This self-paced course begins with an introduction to the IBM Cloud platform which covers topics such as data center locations and configuring identity and access management. You will then discover the various Infrastructure-as-a-Service (IaaS) options available on IBM Cloud. Next, you will learn about the deployment options on IBM Cloud; this includes topics such as Containers, Kubernetes, and OpenShift. You will also become familiar with eight of the most popular collection of services IBM Cloud has to offer such as Databases, Artificial Intelligence and Watson, Blockchain, Internet of Things, and many others. In addition to instructional videos, you will also see demos of various IBM Cloud features and services in action, as well as perform hands-on labs to gain practical experience with IBM Cloud at no charge. This course is of interest to anyone who wants to be a cloud practitioner and use Cloud skills as developers, architects, consultants, system engineers, network specialists, and many other roles. The material also serves the needs of those who perform the tasks of advising, building, moving, and managing cloud solutions. No prior cloud experience is necessary!

COURSE_DESCRIPTION: This course is intended for the Bachelor and Master's students, who like practical programming and making IoTs applications! In this course, we will talk about two components of a cyber-physical system, namely hardware and operating systems. After completing this course, you will have knowledge of both hardware components and operating systems. You are able to plan and use embedded operating systems in resource-constraint devices for Internet-of-Things (cyber-physical system) applications. In addition, you can use Cooja simulation for designing and simulating wireless sensor network applications. The course offers 4 modules, each with a graded quiz in the end and finally, one peer-reviewed programming assignment. In case you have no experience with C programming, please check a practical course like: <https://www.coursera.org/learn/arduino-platform>. The course is actually quite fun at the end when you play around with Cooja simulation for IoTs applications. So you can create and simulate your own design for sensor network applications. A lot of features and examples of Contiki and Cooja can be explored via assignments. There are some optional assignments of wireless sensor network applications for students who want to explore more about embedded OS in IoTs applications. - Marco Ramirez /University of Turku - Igor Tcarenko/ University of Turku - Nguyen Gia Tuan /University of Turku Check out our whole curriculum: <http://iot4health.utu.fi/>

COURSE_DESCRIPTION: AI architecture patterns, some of which have been known for many years, have been formally identified as such only in the last couple of years. In this course, you'll identify 12 reusable, standard AI architecture patterns, and 3 AI architecture anti-patterns frequently used to architect common AI applications. You'll learn to differentiate between architecture and design patterns and explore how they're used. Next, you'll examine the structure of an AI architecture pattern, and that of an anti-pattern and its different parts. You'll identify when specific patterns should or can be used, when they need to be avoided, and how to avoid using anti-patterns. You will also learn that even good patterns can become anti-patterns when applied to solve a problem they were not intended for.

COURSE_DESCRIPTION: This guided project is for those who want to learn how to use Julia for linear regression and multiple linear regression. You will learn what linear regression is, how to build linear regression models in Julia and how to test the performance of your model. While you are watching me code, you will get a cloud desktop with all the required software pre-installed. This will allow you to code along with me. After all, we learn best with active, hands-on learning. Special Features: 1) Work with real-world stock market data. 2) Best practices and tips are provided. 3) You get a copy of the jupyter notebook that you create which acts as a handy reference guide. Please note that the version of Julia used is 1.0.4
Note: This project works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Docker has revolutionized deployment. It allows developer to build, manage, and secure apps anywhere with ease. In this course, you'll explore advanced Docker principles and practices, which will enhance your skills in orchestrating multi-containers, microservices, and automated deployments. You'll examine Docker basics, common misconceptions, and the benefits of using multiple Docker containers. You'll then examine why microservices are needed, service and application decentralization, and how Docker multi-containers work. You'll learn about common design patterns for managing APIs, delimitation of services, and testing and monitoring. Finally, you'll examine multi-Docker deployment automation and associated best practices.

COURSE_DESCRIPTION: This course is designed to introduce students, working professionals and the community to the exciting field of cybersecurity. Throughout the MOOC, participants will engage in community discourse and online interaction. Participants will gain knowledge and understanding of cybersecurity and its domains. They will engage with expertly produced videos, gain insight from industry experts, participate in knowledge assessments, practice assessing their environmental awareness, and gain access to materials that address governance and risk management, compliance, business continuity and disaster recovery, cryptography, software development security, access control, network security, security architecture, security operations, and physical and environmental security. Learning will be assessed using strategies aligned to knowledge and understanding. You do not need prior experience in IT security to do well in this course. All you need is a willingness to learn. We will point you to relevant open and free resources to assist you. At the end of this course, you will have the option of applying for undergraduate level course credit at Kennesaw State University (dependent on admission to Kennesaw State University as a degree seeking or a non-degree seeking student). More information is available in final module "Receive Course (undergraduate) Credit at Kennesaw State University".

COURSE_DESCRIPTION: Welcome to Character Setup and Animation, the fourth course in the Unity Certified 3D Artist Specialization from Unity Technologies. The courses in this series will help you prepare for the Unity Certified 3D Artist exam, the professional certification for entry- to mid-level Unity artists. 3D artists are critical to the Unity development pipeline. They are a bridge between the programmers writing the application code and the designers or art directors who define the application's aesthetics and style. In these courses, you will be challenged to complete realistic art implementation tasks in Unity that are aligned to the topics covered on the exam. In courses 4 and 5, you will work on a sci-fi themed 3D adventure game. You'll import assets and create effects that are more stylish and cartoony than the realistic kitchen in the previous courses. For this course, you will first import the assets for the main character, then get her animations working with an Animator Controller. Next, you'll create a procedural camera to follow her movements using Unity's Cinemachine system. Finally, you'll learn how to use Unity's Collaborate service for

effective version control, and you'll wrap up the course with a peer reviewed project. This is an intermediate course, intended for people who are ready for their first paying roles as Unity 3D artists, or enthusiasts who would like to verify their skills against a professional standard. To succeed, you should have at least 1-2 years of experience implementing 3D art in Unity. You should be proficient at importing assets into Unity from Digital Content Creation (DCC) tools, prototyping scenes, working with lighting, and adding particles and effects. You should also have a basic understanding of 2D asset management, animation, and working with scripts. You should have experience in the full product development lifecycle, and understand multi-platform development, including for XR (AR and VR) platforms.

COURSE_DESCRIPTION: There are multiple ways to find or search for elements and Access allows you to adapt your view on fields by sorting and filtering data values. This 6-video course, "Access 2019: Finding and Organizing Data," allows learners to discover how to sort, filter, find, and replace features available in Access 2019. This process will enable you to save time and locate the information you need most within your Access database values. To begin, you will learn how to sort the data in the data tables, and then filter the data in the data tables. Explore how to search and locate data values, which is useful if you have a large number of records in your data table. Also, you will discover how to replace data values. Creating an index in Access can help find a value or record more quickly, which is particularly useful if a data table contains a large number of records; learners will also observe how to edit database indexes. Conclude with a look at finding duplicate values in a database.

COURSE_DESCRIPTION: Kotlin relies on the Java Class Library, and there are several integrated development environments (IDEs) to choose from for developing with Kotlin. This course explores the basics of Kotlin and its tools. You'll begin by learning that Kotlin relies on the Java Class Library, and there are several integrated development environments (IDEs) to choose from to develop Kotlin applications. This course describes the Kotlin language and its features, and shows you the differences and similarities between Kotlin and Java. As you progress, you'll also learn about various Kotlin data types, including variables, constants, strings, and arrays. Explore basic Kotlin syntactical structures, and Kotlin command-line compilers. Identify Kotlin's build tools and their uses. Discover Koans and their purpose in Kotlin. You'll conclude by comparing various Kotlin integrated development environments (IDEs).

COURSE_DESCRIPTION: In this project, we will look at how to work with the AWS S3, which is Amazon's File Storage System, programmatically using AWS's SDK in Python, boto3. We will first look at how to create and modify AWS S3 Buckets using boto3. We will then look at how to create an S3 Bucket, how to download and upload different types of files to S3. We will then look at how to use Multi-part Transfer to upload large files. We will then move on to how to create Pre-signed URLs to provide temporary Access to users. We will then learn how to configure bucket policies. And finally look at how to setup CORS (Cross-Origin Resource Sharing) which enables client web applications to access our S3 bucket. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: In this project-centered course you will build a modern software hierarchy, designed to enable the translation and execution of object-based, high-level languages on a bare-bone computer hardware platform. In particular, you will implement a virtual machine and a compiler for a simple, Java-like programming language, and you will develop a basic operating system that closes gaps between the high-level language and the underlying hardware platform. In the process, you will gain a deep, hands-on understanding of numerous topics in applied computer science, e.g. stack processing, parsing, code generation, and classical algorithms and data structures for memory management, vector graphics, input-output handling, and various other topics that lie at the very core of every modern computer system. This is a self-contained course: all the knowledge necessary to succeed in the course and build the various systems will be given as part of the learning experience. The only prerequisite is knowledge of programming at the level acquired in introduction to computer science courses. All the software tools and materials that are necessary to complete the course will be supplied freely after you enrol in the course. This course is accompanied by the textbook "The Elements of Computing Systems" (Nisan and Schocken, MIT Press). While not required for taking the course, the book provides a convenient coverage of all the course topics. The book is available in either hardcopy or ebook form, and MIT Press is offering a 30% discount off the cover price by using the discount code MNTT30 at <https://mitpress.mit.edu/books/elements-computing-systems>. The course consists of six modules, each comprising a series of video lectures, and a project. You will need about 2-3 hours to watch each module's lectures, and about 15 hours to complete each one of the six projects. The course can be completed in six weeks, but you are welcome to take it at your own pace. You can watch a TED talk about this course by Googling "nand2tetris TED talk". *About Project-Centered Courses: Project-centered courses are designed to help you complete a personally meaningful real-world project, with your instructor and a community of learners with similar goals providing guidance and suggestions along the way. By actively applying new concepts as you learn, you'll master the course content more efficiently; you'll also get a head start on using the skills you gain to make positive changes in your life and career. When you complete the course, you'll have a finished project that you'll be proud to use and share.

COURSE_DESCRIPTION: Efficient project management means planning carefully and controlling the project scope. Scope management requires creating the work breakdown structure (WBS), establishing baseline requirements, and validating and controlling the scope management plan. In this course, you'll explore project scope management, including working with focus groups and facilitating workshops and group creativity sessions to gather project requirements and document them. You'll also learn about using tools like WBS dictionaries, project scope statements, and variance analysis to help avoid scope creep and keep your project on track and on schedule.

COURSE_DESCRIPTION: "Wem kann ich hier vertrauen? " Diese Frage wird am Arbeitsplatz häufiger gestellt, als die meisten von uns wahrhaben wollen. Beziehungen und Vertrauen werden in beruflichen Netzwerken aufgebaut wie eine Mauer - Stein auf Stein. Vertrauen ist ein zentraler Bestandteil positiver Beziehungen. Ohne Vertrauen erhält die Mauer eine ganz neue Bedeutung. Sie wird zur Barriere ohne Zugangstor. In diesem Kurs beschäftigen Sie sich mit dem Thema Vertrauen - was Sie und andere vertrauenswürdig macht, wie Sie Vertrauenswürdigkeit durch Ihr eigenes berufliches Verantwortungsbewusstsein demonstrieren und wie Sie ein Vertrauensdefizit beheben können, nachdem das Vertrauen gebrochen wurde.

COURSE_DESCRIPTION: Für die meisten Fachkräfte gehört das Lösen von Problemen zum Arbeitsalltag. Was als "Problem" wahrgenommen wird, ist in den meisten Fällen jedoch nur ein Symptom einer tiefer liegenden Herausforderung. Und so kann die Behandlung der Symptomatik zwar kurzfristige Linderung schaffen, behebt aber nicht die Kernursachen. Wenn Sie den Umfang eines Problems ins Visier nehmen und die zugrunde liegenden Ursachen beheben, profitieren Sie langfristig von Lösungen, die nachhaltigen Erfolg liefern. In diesem Kurs beschäftigen Sie sich mit dem Vorgehen, die Wurzeln geschäftsbezogener Probleme zu analysieren, beginnend bei der Sammlung sämtlicher Informationen, die nötig sind, um das Problem in seiner Gänze erfassen und seine Auswirkungen nachvollziehen zu können. Sie erfahren, welchen Wert die Grundursachenanalyse bietet, und lernen gängige Hilfsmittel für deren Durchführung kennen. Zudem befassen Sie sich damit, wie Sie eine Problemstellung verfassen, die das Problem präzise definiert und als Grundlage für die Lösungsfindung zur Behebung der Kernursachen dienen kann.

COURSE_DESCRIPTION: Azure serverless compute services remove the need for manual infrastructure management. This course, aimed at developers and project managers, offers explanations and demonstrations on using Azure compute services for serverless projects. Outline the different approaches to managing compute with Azure. Differentiate between Azure compute services and serverless architecture as well as Azure Functions and Azure WebJobs. Explore durable functions for complex stateful function implementation, security strategies for running secure function code, and Azure App Service's role in securing functions. Create back-end compute services, test Azure functions locally, orchestrate long-running workflows as a set of activities, and create, test, and deploy Azure functions with C# and Python. Upon completion of this course, you'll be able to start using Azure compute services in your serverless development and deployment projects.

COURSE_DESCRIPTION: Explore how data classification determines which security measures apply to varying classes of data. This 12-video course classifies data into a couple of main categories, internal data and sensitive data. You will learn to classify data by using Microsoft FSRM (File Server Resource Manager), a role service in Windows Server that enables you to manage and classify data stored on file servers. Learners will explore different tools used to safeguard sensitive information, such as data encryption. You will learn how to enable Microsoft BitLocker, a full volume encryption feature included with Microsoft Windows, to encrypt data at rest. An important aspect of data access governance is securing data that is being transmitted over a network, and you will learn to configure a VPN (virtual private network) using Microsoft System Center Configuration Manager. You will learn to configure a Custom Filtered Log View using MS Windows Event Viewer to track user access to a database. Finally, you will learn to audit file access on an MS Windows Server 2016 host.

 COURSE_DESCRIPTION: This course is for aspiring or active entrepreneurs who wants to understand how to secure funding for their company. This course will demystify key financing concepts to give entrepreneurs and aspiring entrepreneurs a guide to secure funding. Examine the many financing options available to get your new venture funded. Learn the basics of finance, valuations, dilution and non-dilutive funding sources. Understand capital structure for new ventures, term sheets and how to negotiate them, and the differences between early-stage versus later-stage financing. Develop an understanding of how to develop winning investor pitches, who and when to pitch, how to avoid common mistakes that limit the effectiveness of the pitch, and how to 'get to the close'. Key questions answered within the course include: * When to raise outside capital? * What kind of investors invest by stage and where to find them? * What are your fundraising options? * What are the key components of the term sheet? * How to perform company valuations? * How to pitch to investors? * What techniques help the entrepreneur 'get to the close'? With this course, students experience a sampling of the ideas and techniques explored in the University of Maryland's master's degree in technology entrepreneurship, an innovative 100% online program. Learn more at <http://mte.umd.edu/landing>.

 COURSE_DESCRIPTION: In markets, prices act as rationing devices, encouraging or discouraging production and consumption to find an equilibrium. In this course, you will learn to construct demand curves to capture consumer behavior and supply curves to capture producer behavior. The resulting

equilibrium price "rations" the scarce commodity. Additionally, the course examines the ways in which markets are subject government intervention and the impacts of these interventions. You will be able to:

- Explain how different market structures result in different resource allocations
- Model the impact of external shocks to a particular market structure and demonstrate the new equilibrium price and quantity after the impact of this external shock has played out
- Evaluate the efficiency of an equilibrium
- Explain when and why the government might intervene with regulatory authority or antitrust litigation to lessen inefficiencies in some markets
- Describe how information problems can cause inefficient outcomes
- Understand externalities and consider optimal government response to these market failures

This course is part of Gies College of Business' suite of online programs, including the iMBA and iMSM. Learn more about admission into these programs and explore how your Coursera work can be leveraged if accepted into a degree program at <https://degrees.giesbusiness.illinois.edu/idegrees/>.

COURSE_DESCRIPTION: Apache Spark, which is a widely used analytics engine, also helps anyone modeling graphs to perform powerful graph analytics. GraphFrames, a Spark package, aids this process by providing various graph algorithm implementations. Use this course to learn about GraphFrames and the application of graph algorithms on data to extract insights. Explore how GraphFrames complements the Apache Hadoop ecosystem in processing graph data. Getting hands-on, construct and visualize a GraphFrame. Practice querying nodes and relationships in a graph and finding motifs in it. Moving along, work with the breadth-first search and the shortestPaths functions to find paths between graph nodes. And finally, apply the PageRank algorithm to arrive at the most relevant nodes in a network. Upon completion, you'll be able to use GraphFrames to analyze and generate insights from graph data.

COURSE_DESCRIPTION: This is a replay of the Live session on October 22nd at 11 AM Eastern. In this session Barb Waters will discuss why there is a new edition of the PMBOK Guide, what has changed since the last edition, how the Project Management Standard relates to the PMBOK Guide, whether the PMBOK Guide is an exam preparation tool and will it help me pass the PMP exam, and will the PMP exam change now that the new PMBOK Guide is available?

COURSE_DESCRIPTION: Developers need to build software with performance in mind, QA needs to test for performance, and management needs to ensure projects meet performance requirements. Needless to say, organizations need software professionals with performance expertise. Use this course to learn what's involved in performance monitoring and analysis. Explore what's involved in performance monitoring. See how process monitoring fits into the overall field of process engineering. Study application performance monitoring (APM) and database performance monitoring (DPM). And examine some of the most popular tools for both. As you advance, monitor a web application and database using performance monitoring tools. Find out how to identify root causes of performance issues. And investigate the basic components of software performance analysis. Upon completion, you'll be able to start analyzing and monitoring software performance throughout the development process.

COURSE_DESCRIPTION: In this 12-video course, learners explore best practices for good coding along with exercises showcasing related examples. This includes good programming practices for Java, Python, C#, and Javascript. Begin with a look at how to perform software estimation of resources and time. One fundamental practice that learners need to know is how to estimate how long something will take and what resources one needs in place. You will then examine coding best practices, and some specific techniques to improve code, along with good coding examples. Following on from this, observe how to recognize bad coding examples, and examine Java code that is poorly written. Next, you will take a look at bad coding examples in Python, and recognizing bad Python programming; bad C# programming, and bad Javascript programming. This leads into learning about applying good coding examples in Java, in Python, in C#, and Javascript. The two most important takeaways from this course are understanding and recognizing both good and bad code, and the other is having a basic understanding of estimating and allocating resources.

COURSE_DESCRIPTION: In this hands-on introduction to anomaly detection in time series data with Keras, you and I will build an anomaly detection model using deep learning. Specifically, we will be designing and training an LSTM autoencoder using the Keras API with Tensorflow 2 as the backend to detect anomalies (sudden price changes) in the S&P 500 index. We will also create interactive charts and plots using Plotly Python and Seaborn for data visualization and display our results in Jupyter notebooks. This course runs on Coursera's hands-on project platform called Rhyme. On Rhyme, you do projects in a hands-on manner in your browser. You will get instant access to pre-configured cloud desktops containing all of the software and data you need for the project. Everything is already set up directly in your internet browser so you can just focus on learning. For this project, you'll get instant access to a cloud desktop with Python, Jupyter, and Keras pre-installed. Notes: - You will be able to access the cloud desktop 5 times. However, you will be able to access instructions videos as many times as you want. - This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: This course is the first of a series that aims to teach you the foundational skills in Salesforce that will prepare you for a variety of entry-level sales roles, including the sales operations specialist position. This course is designed for beginners. No previous experience in Salesforce, sales, or CRM is necessary to be successful. In this course, you will be introduced to essential concepts like the fundamentals of the sales process. You'll also learn about what Customer Relationship Management (CRM) systems are and what they are used for, you'll dive into Salesforce's main products and their use cases, and you will gain a working knowledge of the key functionalities of the Salesforce Sales Cloud that help support a business's growth. This course is the first step in your learning journey with Salesforce. It will provide you with the foundation you need to go into depth with more advanced Salesforce tools taught later in the certificate, and ultimately launch your new career. Please note that if you already have background knowledge in sales and CRM, or if you want to dive immediately into content that goes into more depth with Salesforce, it is recommended that you start with Course 2 in this certificate: Lead Management in Salesforce.

 COURSE_DESCRIPTION: It often seems like the whole world is on information overload. Each day, we encounter massive amounts of new false, or dubious information, alongside a steady stream of data that may, or may not, be relevant to our needs. As a leader, your critical thinking skills are essential for deciding what is important and making the best decisions for your organization. This course will help you improve your critical thinking skills. You'll learn about the intake, investigate, and act stages of critical thinking, as well as how to use analytical techniques to assess information. Finally, you'll learn the advantages of keeping an open mind through cognitive flexibility.

COURSE_DESCRIPTION: Once SRE metrics have been identified, site reliability engineers (SREs) must know how to perform fault analysis on a system, classify defects, and monitor and report data. In this course, you'll explore the tools and best practices for carrying out these procedures. You'll begin by identifying various fault analysis methods and tools. You'll then classify software defects and bugs with a focus on severity and priority. Next, you'll investigate strategies for monitoring APIs and explore some tools used for this task. You'll then examine in detail several tools for collecting, analyzing, and reporting metric data using a customizable dashboard, including those that comprise the ELK Stack - Elasticsearch, Logstash, and Kibana. Furthermore, you'll explore the data collection tool Beats and the beneficial use cases for Elasticsearch notifications.

COURSE_DESCRIPTION: This project will teach you TypeScript string properties and methods in the TypeScript playground which will make string handling easier. Since text data is commonly used as a "string" in TypeScript, the ability to use and manipulate strings is a core component of TypeScript programming. So in this guided project you are going to learn different string properties and methods which are important for string manipulation operations. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: This course covers business process improvement and data - specifically, how to collect it and classify it. Both of these are critical skills for process improvement. With this data, you can use Lean, Six Sigma, and Lean Six Sigma concepts and practices to measure and improve each stage of your process. This course introduces process control and the basic types of data, such as qualitative and quantitative data, as well as measurement scales. You will learn the elements of a data collection plan, and how to use data collection tools, such as surveys and checklists, to improve process design. This course is aligned to the ASQ Body of Knowledge, and is designed to assist Yellow Belt candidates toward achieving their certification.

COURSE_DESCRIPTION: In order to conduct an effective process improvement initiative within your organization, you'll need to research the process that's currently in place. It's vital that you also implement a robust process control system. This course introduces common Lean tools that can help you when carrying out business process improvement. You'll learn how to use some common tools that Six Sigma has adapted from Lean, such as 5S and value stream mapping. You'll also explore other Lean Six Sigma techniques, such as how to conduct a Failure Modes and Effects Analysis (FMEA), which is used to identify potential failures in a process design and assess the risk they pose.

COURSE_DESCRIPTION: This is the sixth course in the Google Data Analytics Certificate. These courses will equip you with the skills needed to apply to introductory-level data analyst jobs. You'll learn how to visualize and present your data findings as you complete the data analysis process. This course will show you how data visualizations, such as visual dashboards, can help bring your data to life. You'll also explore Tableau, a data visualization platform that will help you create effective visualizations for your presentations. Current Google data analysts will continue to instruct and provide you with hands-on ways to accomplish common data analyst tasks with the best tools and resources. Learners who complete this certificate program will be equipped to apply for introductory-level jobs as data analysts. No previous experience is necessary. By the end of this course, you will: - Examine the importance of data visualization. - Learn how to form a compelling narrative through data stories. - Gain an understanding of how to use Tableau to create dashboards and dashboard filters. - Discover how to use Tableau to create effective visualizations. - Explore the principles and practices involved with effective presentations. - Learn how to consider potential limitations associated with the data in your presentations. - Understand how to apply best practices to a Q&A with your audience.

COURSE_DESCRIPTION: Databases are used for creating and storing virtually any type of data. Data drives business in the twenty-first century, and IT professionals interested in mastering data analytics must understand the key concepts surrounding databases and their uses in almost every facet of business. In this course, you will discover database concepts, beginning with challenges associated with databases, self-driving databases, data warehouses, data marts, and data lakes and lakehouses. Then you will explore the concepts of Online Transactional Processing (OLTP) and Online Analytical Processing (OLAP). You will learn about database schemas and look closely at star and snowflake schemas, which are common in data warehouses. Finally, you will explore slowly changing dimensions that shape the methods analysts use to keep historical and current data. This course can be used to prepare for the DA0-001: CompTIA Data+ exam.

COURSE_DESCRIPTION: By the end of this project, you will have created a Student Profile in Google Docs that will allow you identify student needs and differentiate instruction. We will work together to learn how to use Google Docs as we create a Student Profile template and complete it for a particular student you have in mind. You will be provided with additional resources that will help improve your teaching practice through identification of students needs and ensuring that the appropriate accommodations are put in place to support their academic growth. Teaching is constantly changing. More than ever, it is essential that all teachers have a thorough understanding of the different needs present in their classroom. Once each student is more deeply understood, learning plans can be created to ensure that their school year is successful. This project will further equip you to meet the needs of your students. *You will need a free Google account for this project.

COURSE_DESCRIPTION: In this 18-video course, learners explore the basics of props and state, including similarities and differences. Discover how to work with props, use expressions, transfer props manually and using the spread operator. You will begin with a look at props and state in components and when they are used, and differences between props and state. Then move on to working with props; passing data into components by using props; evaluating expressions to pass data to components, and transferring props from higher to lower-level components manually. Also, discover how to transfer props from higher to lower-level components using the spread operator; dynamically render components based on conditions with props, and specify default values passed in as props. Next, learn how to validate props and access child elements using props.children; use expressions to pass in props values; and specify functions as children of a component. Next, receive an introduction to State; updating State by using this.setState() in a component; wiring up event handlers to update the state of a component; and accessing a component's previous state.

COURSE_DESCRIPTION: A growing number of exciting, well-paying jobs in today's security industry do not require a college degree. This Professional Certificate will give you the technical skills to become job-ready for a Cybersecurity Analyst role. Instructional content and labs will introduce you to concepts including network security, endpoint protection, incident response, threat intelligence, penetration testing, and vulnerability assessment. Cybersecurity is one of the most in-demand career fields. • According to CyberSeek, from June 2019 through May 2020, there were 171,000 openings for Information Security Analysts, but only 125,000 workers currently employed in those positions - an annual talent shortfall of 46,000 workers. On average, cybersecurity roles take 21% longer to fill than other IT jobs. • The U.S. Bureau of Labor Statistics expects 31% hiring growth for Cybersecurity Analysts between 2019 and 2029, growing much faster than average in other careers. You should be comfortable working with computers, be willing to develop new technical skills, and enjoy collaborative problem solving and communicating solutions. By the end of this program, you will have completed a real-world security breach hands-on project and applied concepts through industry tool virtual labs to provide you with the confidence to start a career in cybersecurity. This program is ACE(r) approved - you can earn up to 10 college credits, the equivalent of 2 ½ associate degree-level courses.

COURSE_DESCRIPTION: This is the first course in the four-course specialization Python Data Products for Predictive Analytics, introducing the basics of reading and manipulating datasets in Python. In this course, you will learn what a data product is and go through several Python libraries to perform data retrieval, processing, and visualization. This course will introduce you to the field of data science and prepare you for the next three courses in the Specialization: Design Thinking and Predictive Analytics for Data Products, Meaningful Predictive Modeling, and Deploying Machine Learning Models. At each step in the specialization, you will gain hands-on experience in data manipulation and building your skills, eventually culminating in a capstone project encompassing all the concepts taught in the specialization.

COURSE_DESCRIPTION: Making decisions with data too often comes down to finding a purpose for the data at hand - not finding the right data. If you want to make good decisions with data, start from the decision you need to make and then ask which data you need to make that decision. In this on-demand webinar, MIT SMR authors Bart de Langhe and Stefano Puntoni show how decision-driven data analytics results in better decision-making. They give examples of how data-driven often means answering the wrong question and offer steps for using data in a more effective way.

COURSE_DESCRIPTION: Virtualization has become a foundation for on-premises and cloud computing. Therefore server administrators and data center technicians need to know how to configure virtual machine (VM) CPU and RAM settings. Take this mostly hands-on course to learn what's involved in virtualization. Start by exploring how hypervisors relate to virtual machines (VMs). Distinguish between the two types of hypervisors. And look into hypervisor hardening. Getting hands-on, practice configuring virtual CPUs for VMware and Microsoft Hyper-V VMs. Manage CPU settings for AWS and Azure. And configure memory, or RAM, for VMware Workstation, Microsoft Hyper-V, and AWS and Azure instances in alignment with IT workload requirements. Upon completion, you'll be able to plan and configure the setup for both on-premises and cloud VMs. You'll also be more prepared for the CompTIA Server+ SK0-005 certification exam.

COURSE_DESCRIPTION: Learn why knowledge management is so vital to keeping nuclear power operations running safely and efficiently. Nuclear knowledge is critical now: the previous generation of nuclear personnel is retiring; countries are expanding nuclear programs; ageing nuclear installations may face challenges to ensure they can be operated safely; and there is a growing need for long-term management of radioactive waste and for countries phasing out nuclear programs. Do you work in the field of nuclear energy and realize that knowledge is used inefficiently and even could be lost? In this engineering and physics, you will learn how to use, transfer and preserve knowledge for the further development of nuclear power. The course is designed not only for students of nuclear specialties, but also for the staff of organizations operating in the field of peaceful use of nuclear energy. This course is also designed to meet the recommendations of the International Atomic Energy Agency (IAEA). The course was developed on the basis of IAEA publications on nuclear knowledge management. To take the course you do not need a deep knowledge in nuclear technology. Join us as you start your nuclear knowledge management journey.

COURSE_DESCRIPTION: A critical aspect of risk and security management is having a clear picture of the present threatscape. This involves knowledge of threats actors, exploits, vulnerabilities, and malware along with countermeasures that include various technical, physical, and managerial controls. Take this course to learn to recognize several types of network attacks. Examine various methods for managing network security, from network device placement to configuring access control lists and using firewalls and proxies. Furthermore, learn how to secure network-based security devices as well as routers and switches. Then, delve into content delivery networking, cloud-based load balancers, and intrusion detection and prevention. Upon course completion, you'll know what's involved in both network attacks and countermeasures. You'll also be further prepared for the (ISC)² Systems Security Certified Practitioner (SSCP) 2021 exam.

COURSE_DESCRIPTION: A munkakörülményeiben bekövetkezett - akár pozitív, akár negatív - változás bizonytalanságot, stresszt és szorongást szülhet az ahhoz való alkalmazkodás időszakában. Annak egyértelmű megértése, hogy milyen szervezeti változás zajlik, és Ön mire számíthat ennek kezelése során, lerövidítheti az alkalmazkodás időszakát, így hamarabb visszatérhet a rendes kerékvágásba. Ezen a tanfolyamon tanulmányozhatja a szervezeti változást és az azt tipikusan kiváltó eseményeket. Megismerkedhet továbbá a szervezeti változás három konkrét típusával, a szervezeti változásra adott gyakori reakciókkal, és hogy milyen fázisokra számíthat a szervezeti változással való megbirkózás során.

 COURSE_DESCRIPTION: By the end of this project you will learn how to preprocess your text data for sentimental analysis. So in this project we are going to use a Dataset consisting of data related to the tweets from the 24th of July, 2020 to the 30th of August 2020 with COVID19 hashtags. We are going to use python to apply sentimental analysis on the tweets to see people's reactions to the pandemic during the mentioned period. We are going to label the tweets as Positive, Negative, and neutral. After that, we are going to visualize the result to see the people's reactions on Twitter. Note: This project works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Natural Language Processing (NLP) is a subfield of linguistics, computer science, and artificial intelligence that uses algorithms to interpret and manipulate human language. This technology is one of the most broadly applied areas of machine learning and is critical in effectively analyzing massive quantities of unstructured, text-heavy data. As AI continues to expand, so will the demand for professionals skilled at building models that analyze speech and language, uncover contextual patterns, and produce insights from text and audio. By the end of this Specialization, you will be ready to design NLP applications that perform question-answering and sentiment analysis, create tools to translate languages and summarize text, and even build chatbots. These and other NLP applications are going to be at the forefront of the coming transformation to an AI-powered future. This Specialization is designed and taught by two experts in NLP, machine learning, and deep learning. Younes Bensouda

Mourri is an Instructor of AI at Stanford University who also helped build the Deep Learning Specialization. Łukasz Kaiser is a Staff Research Scientist at Google Brain and the co-author of Tensorflow, the Tensor2Tensor and Trax libraries, and the Transformer paper.

 COURSE_DESCRIPTION: In your role as SysOps Admin, disasters will inevitably affect your IT systems on more than one occasion. However, using AWS, you can effectively plan disaster recovery for your related services and data. In this course, you'll explore which AWS services to configure for this task and how. You'll begin with an overview of AWS backup solutions before running an on-demand backup and restoring data from the backup. You'll then configure S3 bucket cross-region replication, work with EBS volume snapshots, and configure autoscaling. Lastly, you'll explore the benefits of multi-tiered web apps and learn how to deploy a content delivery network using CloudFront. This course is one of a collection of courses that prepares learners for the AWS Certified SysOps Administrator - Associate (SOA-COI) exam.

COURSE_DESCRIPTION: This course is the second course in a two-part series on corporate and commercial law. In this part, we focus on three main topics: business organizations, business financing, and governmental regulation. In the first module, we discuss the characteristics of a number of the most common forms of business entities, such as corporations and LLCs. Module two is devoted to debtor-creditor relationships, including bank financing, debt financing, secured transactions, and bankruptcy. We wrap up the course with two modules that focus on the most important aspects of governmental regulation, including the process by which administrative agencies make rules, and the regulation of anti-competitive behavior and securities transactions.

 COURSE_DESCRIPTION: In this project you will create a guessing game application that pits the computer against the user. You will create variables, static methods, decision constructs, and loops in Java to create the game. Learning Java gives the programmer a wide variety of career paths to choose from. Java was once the property of Sun Microsystems but is now an open-source (free) programming language that is used in web programming, mobile applications, and many desktop applications. Java is a natural choice for object-oriented programming as it contains many existing classes for the programmer to use from its feature-rich API. In addition, Java is truly cross-platform, which means it can be compiled on a Windows system and executed on a Mac or Linux system. Java contains a built-in garbage collector that removes objects no longer needed in the application which reduces memory leak issues. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Loops are one way to perform the same operations repeatedly in a program. For loops are the control structure to use when the repeated operations are performed on a sequence such as a list or a tuple. In this 9-video course, you will explore different ways to iterate over a sequence using for loops. Key concepts covered in this course include how to use for loops to process elements in a list and characters in a string; and how to code for loops to iterate over values in a tuple and the keys and values in a dictionary. Next, learn the function of associating an else block with a Python for loop; include if-else statements and other for loops within a for loop; how to generate a sequence of consecutive integers with the range function; and how to use the range function to iterate over a large range of values and apply it within nested for loops. Finally, observe how to write for loops in order to iterate over 1-dimensional and 2-dimensional sequences.

COURSE_DESCRIPTION: Explore the advantages of the programming language R in this 8-video Skillsoft Aspire course. An essential skill for statistical computing and graphics, R is the tool of choice for data science professionals in every industry and field. It both creates reproducible high-quality analyses, and offers unparalleled graphic and charting capabilities. Learners will examine how to apply classification and clustering methods to data science problems by using R. Key concepts covered in this course include performing the preparatory steps needed to create a classification and decision tree; using the rpart library and ctree library to build a decision tree; and how to perform the preparatory steps needed to carry out clustering. Next, explore use of the k-means clustering method; using hierarchical clustering with the hclust and ctree methods; and applying a decision tree method to a classification problem. Finally, learn to train a decision tree classifier by using the data and a relationship inside of those data.

COURSE_DESCRIPTION: Creating and leading an ethical data-driven organization, when done successfully, is a cultural transformation for an organization. Navigating a cultural shift requires leadership buy in, resourcing, training, and support through creation of boards, policies, and governance. Beyond leadership and organization, it is imperative to engage employees through forums and incentive programs for continual involvement. A strong understanding of ethical organizational policies provides the foundation for consistent monitoring to maintain an ethical culture. In this fifth course of the CertNexus Certified Ethical Emerging Technologist (CEET) professional certificate, learners will develop strategies to lead an applied ethics initiative, champion its crucial importance, and promote an ethical organizational culture. Learners will learn how to develop and

implement ethical organizational policies and a code of ethics. They will also be prepared to evaluate the effectiveness of policies with internal and external stakeholders. This course is the fifth of five courses within the Certified Ethical Emerging Technologist (CEET) professional certificate. The preceding courses are titled Promote the Ethical Use of Data-Driven Technologies, Turn Ethical Frameworks into Actionable Steps, Detect and Mitigate Ethical Risks, and Communicate Effectively about Ethical Challenges in Data-Driven Technologies.

COURSE_DESCRIPTION: Javanista to Java Master is the journey intended for Java developers who aspire to sharpen their skills in Java enterprise frameworks and wish to become master's in enterprise application development. In this journey, you will first learn how to write and run JUnit tests and identify the right situation to construct and use mock object. The journey continues by discovering how Jakarta Enterprise Edition (JEE) offers a straightforward and comprehensive approach to building state-of-the-art enterprise applications that enables you to create rich web-based interfaces using Java Server Faces (JSF) and effectively construct business logic using Enterprise JavaBeans (EJB). Finally, the journey takes you deeper into the Spring framework where you gradually progress from the Spring principles, Inversion of Control and Aspect Oriented Programming to the Database Integration using ORM frameworks such as JPA & Hibernate, Spring Data JDBC, and Spring Data JPA. You will complete this journey with a clear exploration on Spring Batch for processing batch data.

COURSE_DESCRIPTION: One of the most popular backends for mobile applications is Google's Firebase, a cloud-hosted platform specifically for mobile and web application developers that provides a host of scalable and robust services. Begin this course by exploring the ephemeral and application states in your mobile app. Then use the providers package in Flutter to set up and manage the app state using the provider components - the ChangeNotifier, the ChangeNotifierProvider, and the Consumer. Next you will integrate your app with Google Firebase to create and configure your app to connect to the Firebase backend and use Firebase services. Finally, you will build a real-world e-commerce application using Firebase as a backend, store data in the Cloud Firestore NoSQL database, and configure your app to receive real-time updates from Firestore using StreamBuilder widgets. You will set up authentication for your application using Firebase Authentication services, configure login and signup pages, and include functionality for user favorites, cart, and checkout.

COURSE_DESCRIPTION: Databases can be migrated or deployed into Azure as a managed service. Data analytic solutions are provisioned more quickly and easily than they would be on-premises. In this course, you'll learn how to deploy various managed SQL solutions, such as Microsoft SQL Server, MySQL, and PostgreSQL. You'll explore how to deploy SQL Managed Instance. Next, you'll examine how on-premises database solutions can be migrated to Azure, followed by how to deploy NoSQL solutions such as Cosmos DB. Lastly, you'll examine when data analytic solutions such as Synapse, HDInsight, Databricks and Cognitive Services should be used. This course is one of a collection of courses that prepares learners for the AZ-900 Microsoft Azure Fundamentals certification.

COURSE_DESCRIPTION: In this 1.5-hour long project-based course I will show you the basic concepts to create data visualizations in D3.js. You will learn how to use SVGs, select, and bind data in order to create a bar chart. We will be visualizing firecracker injuries in 2019. This data is from the U.S. Consumer Product Safety Commission (CPSC) Fireworks Annual Report. Inspired by recent events this summer we are going to visualize firework injuries in the United States. Firework injury data can be found at U.S. Consumer Product Safety Commission (CPSC) .

COURSE_DESCRIPTION: This course introduces the basics of cyber defense starting with foundational models such as Bell-LaPadula and information flow frameworks. These underlying policy enforcements mechanisms help introduce basic functional protections, starting with authentication methods. Learners will be introduced to a series of different authentication solutions and protocols, including RSA SecureID and Kerberos, in the context of a canonical schema. The basics of cryptography are also introduced with attention to conventional block ciphers as well as public key cryptography. Important cryptographic techniques such as cipher block chaining and triple-DES are explained. Modern certification authority-based cryptographic support is also discussed and shown to provide basis for secure e-commerce using Secure Sockets Layer (SSL) schemes.

COURSE_DESCRIPTION: By the end of this project, you will be fluent in identifying and analyzing customer journeys for new products and services and in deriving opportunities from your analysis, thus generating positive results for your business venture. This project is designed to engage and harness your visionary and exploratory abilities. You will use proven models in strategy and product development with the Miro platform to explore and analyze these customer journeys. This is an important step for individuals or companies wanting to explore new products or services. We will practice critically examining customer segments and products structures that affect the business. You will engage in evaluating, through examples and hands-on practice, making decisions on product orientation. Furthermore, you will assess whether to modify or keep the product structure when entering the market. You will be ready to take an entrepreneurial idea through a scientific and logical process, helping you validate your ideas for a new business or service.

COURSE_DESCRIPTION: The United States social safety net is a complex system with many programs and often difficult eligibility requirements. Many of these programs only deliver in-kind aid (not cash) to people living in poverty, a lot of whom can fall through the cracks and can't make ends meet. Basic income, the idea of providing people with a minimal level of cash support on a consistent basis, remains a point of debate in the United States and beyond. In this Teach-Out, you will join leading experts to explore the emerging idea of basic income and other associated social safety net programs. The Teach-Out will address the following questions: What is basic income? What is the difference between basic income and universal basic income? Why is basic income generating so much interest now? How does basic income work? What are the benefits and the challenges? How might basic income help create an inclusive economy? What is the social safety net? Who does it help and who does it leave out? How do we currently measure poverty and determine who is eligible for safety net programs? How do automation and a changing economy affect the basic income conversation? Note: This Teach-Out originally launched in July 2018. Some of the examples, studies discussed, and perspectives may have changed since we recorded these conversation, but the core content of the Teach-Out remains extremely relevant today. Please enjoy this relaunched version of the Teach-Out, we encourage you to engage in the discussion forums with other learners.

COURSE_DESCRIPTION: When working with data, windows are a handy tool to accumulate data subsets from input streams and perform aggregation operations on this specific data. In this course, you'll learn how to perform stream processing through windowing operations in Faust. You'll start by examining the different windowing operations possible on input streams, including tumbling, sliding, count, session, and global windows. Next, you'll distinguish the three notions of time associated with streaming events: event, ingestion, and processing time. You'll then use Faust window features to perform windowing operations on input streams and emit aggregation results for every window. Finally, you'll use the REST API server, which all Faust applications have, to make streaming code metrics and table data accessible to the user. Once you're done with this course, you'll be able to use windowing operations via Faust and expose metrics using web views.

COURSE_DESCRIPTION: In this 1-hour long project-based course, you will learn how to find dividend growth rate and cost of equity, and use that to find the fair price of a share. This will teach you how to value stocks using Dividend Discount Model (DDM) - one of the most common methods equity research analysts use to value stocks. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions. This course's content is not intended to be investment advice and does not constitute an offer to perform any operations in the regulated or unregulated financial market.

COURSE_DESCRIPTION: This two-part course is designed to help students with very little or no computing background learn the basics of building simple interactive applications. Our language of choice, Python, is an easy-to learn, high-level computer language that is used in many of the computational courses offered on Coursera. To make learning Python easy, we have developed a new browser-based programming environment that makes developing interactive applications in Python simple. These applications will involve windows whose contents are graphical and respond to buttons, the keyboard and the mouse. In part 1 of this course, we will introduce the basic elements of programming (such as expressions, conditionals, and functions) and then use these elements to create simple interactive applications such as a digital stopwatch. Part 1 of this class will culminate in building a version of the classic arcade game "Pong".

COURSE_DESCRIPTION: Meet Jim Barton, the new CEO of Santa Monica Aerospace. Jim's job won't be easy: the company's hemorrhaging cash, struggling to regain investors' trust after an accounting scandal, and striving to transform its culture to become a more global competitor. In this course, you'll travel with Jim as he takes on leadership challenges ranging from strategy execution, to inspiring people, to maintaining an ethical approach. Experts agree that twentieth-century leadership practices are inadequate for the stormy twenty-first-century present. This provocative course equips you with the insights you'll need to rise with the occasion of a rapidly shifting business landscape. The course is based on a book, *Harder Than I Thought: Adventures of a 21st Century Leader*, by Robert D. Austin, Richard L. Nolan, and Shannon O'Donnell, published by Harvard Business Review Press. Purchase of the book is optional. If you want more information about the book or wish to buy it, see <https://hbr.org/product/harder-than-i-thought-adventures-of-a-twenty-first/an/10332-HBK-ENG> or <http://www.amazon.com/Harder-Than-Thought-Adventures-Twenty-First/dp/1422162591> After taking the course, you'll be able to: o Enact your own personal leadership approach, derived from your ongoing evaluation of how Jim Barton has handled his leadership situation, as well as from established leadership concepts and frameworks; o Avoid leadership actions that might have worked in the past, but are not suited to a newly challenging 21st century world; o Navigate treacherous new 21st century leadership challenges, such as greater reliance on specialized workers or the need to respond to external scrutiny in an increasingly transparent world (and many more); o Avoid "slippery slope" ethical failures, and think more clearly about the separation between public and private life for a 21st century leader.

COURSE_DESCRIPTION: Computer hardware technicians must understand the basics of computer power systems, including amps, wattage, voltage, general guidelines for power sizing, and power supply options. Explore key power systems lessons like differentiating between power supply inputs and outputs, identifying the values needed for components, such as overall wattage rating, and determining the amount of power needed based on the number of devices in use. Examine the characteristics of redundant power supplies and modular power supplies. Finally, put your new skills to use solving a problem to determine when to use more or less voltage, how to describe wattage ratings, and how to determine the output of a rail on power supply. This course will prepare learners for the CompTIA A+ Core 1 (220-1101) certification.

COURSE_DESCRIPTION: Learners can explore a foundational overview of DevOps testing, including best practices; key software testing strategies; how software testing has evolved with the adoption of DevOps movement; and key terms and concepts specific to DevOps testing and operations in this 13-video course. Begin by studying key concepts underpinning DevOps software development and deployment, then key principles behind the DevOps movement represented by the acronym CALMS (Collaboration, Automation, Lean, Measurement, and Sharing). Examine the Software Development Life Cycle (SDLC) within a DevOps software development movement, and how Agile started a changing approach to software testing that culminated in DevOps. Explore key concepts of a DevOps pipeline; how DevOps requires a different approach to software testing; testing strategies; and key software testing strategies and techniques in production within DevOps culture. Examine DevOps testing best practices and learn how to use Jira for tracking customer feedback on software use. In the concluding exercise, learners are asked to describe DevOps, the CALMS acronym, and SDLC under DevOps, and list common test strategies and DevOps testing best practice concepts.

COURSE_DESCRIPTION: Kubernetes infrastructure is a combination of multiple resources that includes servers, physical or virtual machines, cloud platforms, and more. Kubernetes architecture and components facilitate dynamic and on-demand provisioning of resources that are required to deploy Kubernetes clusters and their components. In this course, you'll explore the key considerations for Kubernetes deployment and review the pros and cons of the best known approaches for deploying Kubernetes. You'll learn about node features, the recommended approach to provision and add nodes to Kubernetes clusters, and the process of upgrading Kubernetes clusters. Next, you'll explore how to use kubectl commands to view a node's status, configure the default CPU requests and limits for namespaces, set quotas for total amount of memory and CPU for all containers running in a namespace, set quotas for total number of Pods that can run in a namespace, and set minimum and maximum values for CPU resources being used by containers and pods in a namespace. Moving on, you'll use kubeadm and kubectl commands to upgrade cluster control plane nodes from version 1.18.x to version 1.19.x and upgrade kubelet and kubectl on all cluster control plane nodes from version 1.18.x to version 1.19.x. Finally, you'll discover how to upgrade kubeadm, kubelet, and kubectl on all cluster worker nodes from version 1.18.x to version 1.19.x. This course is part of a series that aligns with the objectives for the Certified Kubernetes Administrator exam and can be used to prepare for this exam.

COURSE_DESCRIPTION: In this one-hour, project-based course, you will learn how to create a camera controller for a First Person Shooter game that will work on any computer and virtual machine. This project covers setting up the FPS camera and player, writing C# scripts that will control the player's movement using the keyboard keys, and controlling the camera angle using the mouse. Note: Ordinarily, an FPS camera would use Input.GetAxis() in Unity. This works on all platforms but often breaks when using the Unity editor in virtual machines. This guided project creates a solution which, though more complex, will work on a virtual machine. This project makes use of the sci-fi-themed Unity scene created in Create Power-Ups and Obstacles with C# in Unity, which compliments this guided project. Although that project is not a prerequisite, it's recommended for a more well-rounded understanding of the concepts presented herein.

COURSE_DESCRIPTION: This 7-video course helps learners discover how to implement machine learning scaling techniques such as standardizing and min-max scaling on continuous data and one-hot encoding on categorical features to improve performance of linear regression models. In the first tutorial, you will use Pandas library to load a CSV file into a data frame and analyze its contents by using Pandas and Matplotlib. You will then learn how to create a linear regression model with scikit-learn to predict the sale price of a house and evaluate this model by using metrics such as mean squared error and r-square. Next, learners will examine the application of min-max scaling on continuous fields and one-hot encoding on the categorical columns of a data set. Then analyze effects of preprocessing by recognizing benefits of scaling and encoding data sets by evaluating the performance of a regression model built with preprocessed data. Also, learn how to use scikit-learn's StandardScaler on a data set's continuous features and compare its effects with that of min-max scaling. The concluding exercise involves preprocessing data for regression.

COURSE_DESCRIPTION: Machine learning reinvents industries and runs the world. Harvard Business Review calls it "the most important general-purpose technology of our era." But while there are so many how-to courses for hands-on techies, there are practically none that also serve the business leadership of machine learning - a striking omission, since success with machine learning relies on a very particular project leadership practice just as much as it relies on adept number crunching. By filling that gap, this course empowers you to generate value with ML. It delivers the end-to-end expertise you need, covering both the core technology and the business-side practice. Why cover both sides? Because both sides need to learn both sides! This includes everyone leading or participating in the deployment of ML. NO HANDS-ON. Rather than a hands-on training, this specialization serves both business leaders and burgeoning data scientists with expansive, holistic coverage. BUT TECHNICAL LEARNERS SHOULD TAKE ANOTHER LOOK. Before jumping straight into the hands-on, as quants are inclined to do, consider one thing: This curriculum provides complementary know-how that all great techies also need to master. WHAT YOU'LL LEARN. How ML works, how to report on its ROI and predictive performance, best practices to lead an ML project, technical tips and tricks, how to avoid the major pitfalls, whether true AI is coming or is just a myth, and the risks to social justice that stem from ML.

COURSE_DESCRIPTION: Azure App Services provide cloud-hosted web applications as a managed service. This means cloud technicians are not burdened with deploying the underlying infrastructure to support a web app. In this course, you will begin by deploying a web app into the Azure cloud using both the Azure portal and Microsoft Visual Studio Community Edition. Then, manage deployment slots so that web app changes can be implemented and tested in a staging slot resulting in zero downtime for the production version of the web app. Next, you'll configure a custom DNS domain name for the web app and create a key vault and PKI certificate for enabling an HTTPS web app binding. Finally, you will manage web app configuration settings and enable a content delivery network. This course can be used to prepare for exam AZ-900, Microsoft Azure Fundamentals.

COURSE_DESCRIPTION: In this course, you will learn what the main financial markets and their characteristics are as well as how they are linked to the economy. Our very diversified team of experts will start by teaching you how the price of stocks and bonds are computed and why they move while you will become increasingly aware of the notion of risk and why it matters when measuring an investment's performance. The focus will then move to less popular markets such as gold, emerging markets, real estate, hedge funds and private markets. These will be analyzed with an emphasis on their particular risks and return opportunities as well as how they can help in building efficient portfolios. Finally, the policies of central banks and their impact on financial markets will be presented to you along with the link between the economy and the price of financial assets. All along these different steps, experts from UBS, our corporate partner, will show you how the concepts you just acquired are effectively applied in a leading global bank. This focus on practicality means you will not only understand what is going on in global financial markets but also start to figure out how you can use them to achieve financial goals, be it a client's or your own. Course Director and main teaching contributor: Dr. Michel Girardin, Lecturer in Macro-Finance, University of Geneva

COURSE_DESCRIPTION: This 11-video course focuses on string objects in Java. Participants will learn the basics of string objects, which encapsulate an array of characters used to compose words, sentences, or any other data one wants. The course demonstrates how to initial string objects and shows how the process of initialization influences comparisons of strings. Begin by initializing strings with StringBuilder and StringBuffer objects, which can be used to efficiently alter and construct strings. Then see how Java initializes the StringBuffer to have a certain initial capacity, and learn how to allocate additional capacity as needed. This course features an in-depth study of the difference between the double equal to operator and the .equals method, when comparing object types that include strings. You will also learn how null is a reserved keyword for literal values. Participants will learn how to encapsulate the eight primitive types of variables into objects with the built-in wrapper classes, by using Java's eight wrapper types.

COURSE_DESCRIPTION: This 14-video course explores physical penetration testing, and how to test a business's infrastructure, including IT assets, its data, people, and physical security to locate any exploitable vulnerabilities. In this course, you will learn why lockpicking is essential in cybersecurity, and you will examine different types of locks and lockpick tools. This course demonstrates several types of penetrations, including EM (electromagnetic security vulnerabilities), dumpster diving, and tailgating, and how to protect against these attacks. You will learn about penetration testing types, including network services, web and client applications, Cloud penetration, penetration testing of wireless networks, and social engineering. Learners will explore several penetration tools, including Kali Linux, which comes with tool such as Nmap, Wireshark, and John the Ripper; the Aircrack suite; OpenVas, and several others. You will learn about web app security testing methodologies. Learners will observe the elements of a successful report, and how to document penetration testing results. Finally, this course demonstrates practicing testing skills by using Grier Demo website.

COURSE_DESCRIPTION: In this 14-video course, learners can explore differences between cloud computing and traditional on-premises computing. You will examine AZ-900 Azure Fundamentals, the entry level Microsoft Azure certification that will introduce learners to Azure service offerings, including storage, virtual machines (VMs), databases, and developer solutions. Microsoft Azure lets users leverage the infrastructure of an existing computing environment to reduce, or even in some cases eliminate, on-premises solutions. You will learn that cloud computing depends on virtualization, and hypervisors, the underlying physical server hardware that allows VMs to be deployed and to run. Next, you will examine the components of Microsoft Azure include IaaS (Infrastructure as a Service), which is basic computing and storage services such as VMs and network services. You will learn that Azure includes PaaS (Platform as a Service), which is used for application hosting environment solutions such as web hosting, messaging, and database hosting, and SaaS (Software as a Service) with on-demand applications. Finally, the course compares traditional on-premises IT solutions to their cloud equivalents, and compares on-premises to cloud migration strategies.

COURSE_DESCRIPTION: As a penetration tester, it's vital that you are familiar with advanced methods of conducting offensive security operations against Windows environments. In this course, you'll learn to recognize common post exploitation activities within a Windows environment and how to configure an advanced persistent threat. You'll start by learning how to escalate privileges, use a DLL injection attack, pivot between systems, and crack user credentials. You'll then examine how to use PowerView to enumerate information and use BloodHound to 'walk the dog' and gain domain admin privileges. Finally, you'll learn how to clean up post attack to cover your tracks, create an advanced persistent threat, and use a ransomware attack to lock a system.

COURSE_DESCRIPTION: Forming an effective Six Sigma team for driving improvement projects throughout an organization is essential to Six Sigma success. Teams are vital to Six Sigma and Lean projects that have goals of improving an organization's existing quality, enhancing bottom-line performance, and reducing costs. The methods used to form and develop a Six Sigma team will have a dramatic effect on the team's overall performance. Black Belts need to proactively contribute to the effectiveness of Six Sigma teams to promote positive organizational change. This course explores the variety of team types, roles, and composition, revealing strategies for selecting strong Six Sigma teams whose members bring diverse talents, knowledge, and aptitudes to the team. The course also examines factors critical to team success including management support, clarity of goals, and following ground rules. Acknowledging that today's organizations increasingly rely on virtual teams that cross geographic and cultural barriers, the course equips you with strategies for meeting the unique challenges of virtual teams. This course is aligned with the ASQ Certified Six Sigma Black Belt certification exam and is designed to assist learners as part of their exam preparation. It builds on foundational knowledge that is taught in SkillSoft's ASQ-aligned Green Belt curriculum.

COURSE_DESCRIPTION: In this project you will read weather data from a file and populate a C++ Vector with the file data. The data is then uniquified in a Set data structure and stored in a Map for accessing data by year. C++'s standard template library or STL contains data structures or containers

that are built for efficiency. They are used to store and retrieve data in various formats. A list such as a Vector can be used in place of an array to contain data where the size cannot be determined ahead of time. A List is like a Vector, except elements can be more quickly added and deleted from it, since no shifting needs to occur. A Map is used to quickly look up a value based on a key rather than a numerical index, for example, to look up a phone number based on a key containing a person's name. A Set may be used to remove duplicates from a list, simply by assigning the data to it. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Technicians are required to identify, diagnose, and solve common wired and wireless network-related problems. Due to the many components of a network, this can be challenging at times. Fortunately, there are many common issues to look for that can help resolve issues promptly. Explore how to resolve intermittent wireless connectivity issues and slow network speeds, as well as issues related to jitter and port flapping. Discover methods to improve voice-over-IP (VoIP) phone services and high latency problems. Lastly, explore common examples of external interference that can disrupt a wired or wireless network. This course will prepare learners for the CompTIA A+ Core 1 (220-1101) certification.

COURSE_DESCRIPTION: Vectors are a great basic data structure in R, but they have important limitations on the dimensions and types of data they contain. Matrices, arrays, and lists are powerful R structures that mitigate these limitations. This course will help you distinguish each of these three elements' purpose and show you how to use them. You'll start by using matrices to store two-dimensional data. You'll then differentiate between row-major and column-major matrices. You'll learn how to use arrays and how you can easily create three-dimensional arrays as you can two-dimensional arrays. You'll then move on to the use of lists and how they differ from vectors. After taking this course, you'll be able to identify when and how to use a matrix, a list, and an array.

 COURSE_DESCRIPTION: Computer attacks and data breaches are inevitable. It seems like every day a data breach occurs and the victims of the data breach suffer. Their information is stolen or posted online. The company's or businesses who had the breach go on, learn a little from the attack, and just give credit monitoring out as if nothing happened. What if you could help prevent a data breach in your organization? This is the third course in the Practical Computer Security specialization. This course looks at detection and mitigation of threats and attack vectors and discusses how to use tools and principles to protect information. By the end of the course you should be able to make suggestions on what type of detection and mitigation strategy is right for your systems or business given the known threats and attack vectors. You should be able to discuss what features you want in a firewall, or how cash registers or sensitive data systems should be secured. The project at the end of the course will allow you to apply what you have learned to argue what type of detection and mitigation strategies should have been employed by companies and businesses that have suffered a data breach.

COURSE_DESCRIPTION: This course covers material necessary to take the ISACA CISA (Certified Information Systems Auditor) exam, and you will explore systems planning, testing, integration, and delivery to ensure timely delivery of system changes or entire new solutions for security planning. First, you will explore IT system planning, including the system development life cycle, and learn how technicians can evaluate IT solutions to align with business needs. You will examine how IT solutions will require a feasibility analysis to determine whether those solutions can be used or if a new IT solution must be built. You will see that testing and continuous delivery ensures and maintain the stability and security of the solution. This course covers QA (quality assurance) and why QA needs to be adapted for different organizations, based on compliance with laws and regulations relevant to their business. Finally, this course examines IT solution deployment, including continuous integration and delivery, infrastructure deployment, system migration and data conversion, and how to perform a cloud migration assessment.

COURSE_DESCRIPTION: Content is an eminent example of the features that contributed to the success of wireless Internet. Mobile platforms such as the Snapdragon(tm) processor have special hardware and software capabilities to make acquisition, processing and rendering of multimedia content efficient and cost-effective. In this course, you will learn the principles of video and audio codecs used for media content in iTunes, Google Play, YouTube, Netflix, etc. You will learn the file formats and codec settings for optimizing quality and media bandwidth and apply them in developing a basic media player application. Learning Goals: After completing this course, you will be able to: 1. Explain the tradeoffs between media quality and bandwidth for content delivery. 2. Extract and display metadata from media files. 3. Implement and demonstrate a simple media player application using DragonBoard(tm) 410c.

COURSE_DESCRIPTION: iOS 12 apps should be designed with security in mind. This course focuses on the importance of security and the various built-in iOS 12 security-based features that can help make apps more secure. By taking the course, you will begin by observing how to secure text fields and alerts. You'll learn how to protect iOS apps via touch and face ID. Next, learn how to use built-in hardware encryption to store binary and text files securely on disk. See how to securely store sensitive data via the iOS keychain. Other topics include how to query the iOS Keychain for items that your app has added previously; how to update an item stored in the iOS keychain. Finally, you will learn how to delete iOS keychain items previously stored by an app.

COURSE_DESCRIPTION: Kubernetes doesn't provide any native storage solution for log data, but it can be integrated with existing logging solutions. You can classify Kubernetes logs and manage them at the application and cluster level to enable observability and identify the root cause of issues. In this course, you'll learn how to do just that. You'll kick off by exploring the Logging architecture of Kubernetes clusters, the different log types maintained in Kubernetes clusters, the Kubernetes architecture that helps manage logging at the node and cluster level, best practices for Kubernetes logging, the role of the Resource Metrics pipeline, and the architecture of Metric server. Next, you'll configure a Pod specification with a container to write logs to standard output every 5 seconds and return snapshot logs from various Pod types. Moving on, you'll configure a Pod to write two different log files using different formats, create a Pod with two sidecar containers, and inspect, debug, and get logs from applications. Finally, you'll install the Metric server and use it to manage metrics for Nodes and Pods. You'll view Pod and Node resource metrics, create a Pod with one container, attach a Shell, and then execute commands in it. This course is part of a series that aligns with the Certified Kubernetes Administrator exam's objectives and can be used in its preparation.

COURSE_DESCRIPTION: Visualizing data is used by virtually every discipline these days. It is used for analyzing web traffic to determine peak server load, growth and death rate of populations for biological analysis, analyzing weather patterns over time, stock market trends, and so on. Simply put, Data Visualization brings meaning to numbers that help people understand it. Seeing the data change can draw attention to trends and spikes that may otherwise go unnoticed. Python is an open-source (free) programming language has libraries that can be used to read and make useful graphics to present the data. In this course, you will create an application that reads data from CSV files. You will learn how to visualize the data using various techniques using existing Python libraries. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Triggers and bindings are key components of Azure Functions runtime, enabling you to build event-driven and data-driven apps in the cloud. In this course, you will learn how to use triggers and bindings in Azure Functions to build and run code on demand in response to events and data. Begin by exploring the basics of triggers and bindings and discover how to use HTTP triggers and bindings to build web application programming interfaces (APIs) and serverless applications. Next, focus on advanced topics such as binding extensions, binding expressions, binding return values, and error handling and retries. Then integrate Azure functions with Blob storage, work with Azure Cosmos DB bindings, and manage dependencies in your Azure Functions apps. This course is one of a collection that prepares learners for the AZ-204 Developing Solutions for Microsoft Azure exam.

COURSE_DESCRIPTION: Everyday Parenting gives you access to a toolkit of behavior-change techniques that will make your typical day in the home easier as you develop the behaviors you would like to see in your child. The lessons provide step-by-step instructions and demonstrations to improve your course of action with both children and adolescents. Among many techniques, you will learn how even simple modifications to tone of voice and phrasing can lead to more compliance. The course will also shed light on many parenting misconceptions and ineffective strategies that are routinely used. The key to the course is practice. It is not enough to know the strategies; you have to do them to reap the rewards. Using the techniques on a temporary basis will lead to permanent change. Chances are your parenting is perfectly fine and working the way you would like. But if you have any frustrations with your child or would like improve your effectiveness in changing your child's behavior, these videos will be a very useful guide. Subtitles available in Chinese and Spanish.

COURSE_DESCRIPTION: This course offers a brief introduction to the multivariate calculus required to build many common machine learning techniques. We start at the very beginning with a refresher on the "rise over run" formulation of a slope, before converting this to the formal definition of the gradient of a function. We then start to build up a set of tools for making calculus easier and faster. Next, we learn how to calculate vectors that point up hill on multidimensional surfaces and even put this into action using an interactive game. We take a look at how we can use calculus to build approximations to functions, as well as helping us to quantify how accurate we should expect those approximations to be. We also spend some time talking about where calculus comes up in the training of neural networks, before finally showing you how it is applied in linear regression models. This course is intended to offer an intuitive understanding of calculus, as well as the language necessary to look concepts up yourselves when you get stuck. Hopefully, without going into too much detail, you'll still come away with the confidence to dive into some more focused machine learning courses in future.

COURSE_DESCRIPTION: It's time to use your Gender Analytics skills to tackle a real-world challenge in your capstone project. In the final course in the Gender Analytics Specialization offered by the Institute for Gender and the Economy (GATE) at the University of Toronto's Rotman School of Management, you will practice your Gender Analytics skills in an applied learning project that will take you through the entire process for using gender-based insights to generate innovative solutions. You will be expected to think about the problem using an intersectional gender lens, explore both quantitative and qualitative data, apply human-centered design methodologies to developing prototypes, and plan for roll out in an organization, market or community. This activity provides a hands-on learning opportunity to practice critical skills for Gender Analytics.

COURSE_DESCRIPTION: The basis for education in the last millennium was "reading, writing, and arithmetic;" now it is reading, writing, and computing. Learning to program is an essential part of the education of every student, not just in the sciences and engineering, but in the arts, social sciences, and humanities, as well. Beyond direct applications, it is the first step in understanding the nature of computer science's undeniable impact on the modern world. This course covers the first half of our book Computer Science: An Interdisciplinary Approach (the second half is covered in our Coursera course Computer Science: Algorithms, Theory, and Machines). Our intent is to teach programming to those who need or want to learn it, in a scientific context. We begin by introducing basic programming elements such as variables, conditionals, loops, arrays, and I/O. Next, we turn to functions, introducing key concepts such as recursion, modular programming, and code reuse. Then, we present a modern introduction to object-oriented programming. We use the Java programming language and teach basic skills for computational problem solving that are applicable in many modern computing environments. Proficiency in Java is a goal, but we focus on fundamental concepts in programming, not Java per se. All the features of this course are available for free. It does not offer a certificate upon completion.

COURSE_DESCRIPTION: Once you have an understanding of what compliance is, and why it may be important, it is natural to wonder next, "What should I do about it?" In this course, we'll explore one of the key factors for creating a positive culture of compliance: human psychology. We'll think about what drives us, what makes us pay attention, what distracts, and how all of these pieces help build a strong belief in an organizational culture of compliance. We will examine formal compliance programs, diving into the nuances of how they are applied in practice. We'll also explore the technologies, workflows, policies, monitoring, and training necessary to create a toolkit for designing an effective compliance program.

COURSE DESCRIPTION: Explore scaled Agile frameworks, the differences between them, and their organizational fit. In this 13-video course, examine the organizational implications of scaled Agile frameworks, techniques for choosing one, and how to customize them. Key concepts covered in this course include large-scale Agile framework options and how to recognize the four most popular frameworks-Scaled Agile Framework (SAFe), Disciplined Agile Delivery (DAD), Large-Scale Scrum (LeSS), and Scrum of Scrums (SoS); and characteristics of large-scale Agile frameworks. Next, learn the general organizational fit of large-scale Agile frameworks; learn about the additional roles in each large-scale Agile framework; learn the additional processes in each large-scale Agile framework; and learn the commonly used selection criteria when choosing large-scale Agile frameworks. Finally, learn how to configure and customize SAFe; learn DAD customization, LeSS customization, and SoS customization; and learn newer concepts in Agile framework, such as various newer versions of SAFe, Nexus, Scrum at Scale, and Scrumban.

COURSE_DESCRIPTION: During the Analyze phase of a Lean or Lean Six Sigma improvement project, the team conducts a number of statistical analyses to determine the nature of variables and their interrelationships in the process under study. This can in turn lead to business process improvement. In this course, you'll learn about some of the basic concepts relating to hypothesis testing, and how it can drive process improvement, process control, and process design. You'll also explore how to carry out various types of hypothesis test design, to find and compare means. The course is aligned with ASQ's 2015 Six Sigma Green Belt Body of Knowledge.

COURSE_DESCRIPTION: In this course, will look at industries and economic sectors that neatly define an economy. We will also introduce you to fundamental concepts involved in a company's annual statements such as balance sheets, cash flows and its income statement, plus explore popular fundamental values used to filter vast amounts of corporate stocks. And finally, we'll examine mutual funds and ETFs as alternatives to individual stocks for investing. To facilitate a comprehensive understanding of essential concepts discussed, this course includes a series of practical examples, quizzes, reading materials and a final course project.

COURSE_DESCRIPTION: Blockchain promises to disrupt industries once it will be efficient at large scale. In this course, you will learn how to make blockchain scale. You will learn about the foundational problem of distributed computing, consensus, that is key to create blocks securely. By illustrating limitations of mainstream blockchains, this course will indicate how to improve the technology in terms of security and efficiency. In particular, this course will help you: * understand security vulnerabilities of mainstream blockchains; * design consensus algorithms that tolerate attacks, and; * design scalable blockchain systems.

COURSE_DESCRIPTION: Es ist eine Tatsache, dass sich die Markttrends ständig ändern. Wenn Sie sich nicht an diese Änderungen anpassen, kann dies dazu führen, dass Ihr Unternehmen seine Wettbewerbsfähigkeit verliert - und letztendlich auch die Kunden. Um diese sich verändernden Kräfte nutzen zu können, müssen Unternehmen eine effektive Operations-Management-Strategie implementieren, die den Marktanforderungen entspricht. In diesem Kurs lernen Sie die Bedarfsprognose und das Kapazitätsmanagement kennen, zwei Techniken, mit denen Sie den Betrieb Ihres Unternehmens optimieren können, um Markttrends zu bewältigen und die Herausforderungen von Angebot und Nachfrage zu meistern. Außerdem erfahren Sie mehr über Nachfragemuster, einen Prozess zur Bedarfsprognose und Strategien zur Verwaltung der Kapazität Ihres Unternehmens.

COURSE_DESCRIPTION: Widgets in Flutter can be stateless or stateful. Stateless widgets have properties that do not change, while stateful widgets contain mutable states that can be updated. In this course, you will create Flutter widgets that hold state information in a different object. You will see how you can handle user actions that update state and how Flutter automatically redraws widgets when their state changes. Next, you will build and use a number of different stateful widgets such as counters, checkboxes, and widgets that update state based on a timer. You will share state across multiple widgets by storing state in a parent component, and you will use callbacks to allow child components to change the parent's state. Finally, you will learn to design layouts using the Column and Row widgets in Flutter.

COURSE_DESCRIPTION: In this challenge, you will configure CloudWatch to generate an alarm when memory usage reaches a specific level, and then automatically restart an Amazon Elastic Cloud Compute (Amazon EC2) instance. First, you will create a CloudWatch alarm for memory usage on an EC2 instance, and then you will connect to the console of the EC2 instance by using EC2 Instance Connect. Next, you will install a stress testing tool, and then you will run a stress test to simulate memory usage. Finally, you will monitor the CloudWatch alarm until it is triggered, and then you will verify that the EC2 instance restarts. Note: Once you begin the challenge lab, you will not be able to pause, save, or exit and then return to your challenge lab. Please ensure that you have set aside enough time to complete the challenge lab before you start.

COURSE_DESCRIPTION: When taking this course, you will raise your own self-awareness and gain self-confidence for a better leadership. You will discover a new approach to leadership based on trust and sense. The "Savoir-Relier" leadership, a new approach of leadership, taught to HEC MBA's student and top executives, enables better team leadership and encourages relationships between people in spite of their differences of opinion. You will develop relational skills, self-knowledge and self-awareness on the way to unfold your own leadership style. You'll learn the skills of The Savoir-Relier (SR) methodology for better connecting with yourself or others by going through the following 4 steps for successful leadership: Introspection, Conversation, Resilience and Responsibility toward Value Creation. In this first MOOC of the "Inspirational Leadership" specialization, you will practice the first two steps of the method for successful leadership: Introspection and Conversation. You will get to know yourself better during the Introspection part and get a chance to improve your communication skills in order to better interact with others. You will meet people like you who will share their stories and their experience with Savoir-Relier and why it is so inspiring for them in their life. Together, you'll develop greater self-awareness by developing a leadership self-portrait and going through fun activities to increase your empathy and communication. Leaders from different organizations and participants of the HEC Paris Leadership Certificate, the program from which this course and specialization are inspired, will share with you their insights about what it takes to become a great leader and what they are able to achieve now that they apply The Savoir-Relier methodology. This course is part of the specialization "Inspirational Leadership: Leading with Sense". In the next courses, you'll go through the second two steps of leadership: Resilience and Responsibility toward Value Creation.

COURSE_DESCRIPTION: This session is continuation of ORAN Introduction - Architecture and Integration session but with focus on the two elements that ORAN Alliance introduces. First is RIC - Radio Intelligent Controller that might provide very powerful features to control mobile networks like advance Inter-site Carrier Aggregation, efficient Power saving features as well classic SON features like PCI optimization. Second are united management interfaces, called O1, O1 and OFH. About the speaker Milan Kounek: Milan works in the Access Networks Tribe lead by Dirk Maul and in Access 2 chapter led by Thomas Schweinhuber. His main expertise is Operation and Management systems that assure quality of mobile networks with focus on ORAN, virtualization and automation.

COURSE_DESCRIPTION: By the end of this guided project, you'll create a fully functioning Calculator application using python's popular library Tkinter. You'll be able to create a Graphical User Interface (GUI) in Python from scratch. Throughout the first 3 tasks you'll learn how to create and customize the application window, you'll learn how to create widgets such as buttons and entry boxes, you'll also learn how to modify the widgets and change their color, size and orientation and finally you'll learn how to manage the layout of the widgets and how to place them in the window using three different methods. And in the last 3 tasks, you'll use what you learned to build the graphical user interface of the calculator and get your calculator ready to use. Out of all the GUI methods in Python, Tkinter is the most commonly used method. Python with Tkinter is the fastest and easiest way to create GUI applications. Tkinter widgets can be used to construct buttons, menus, data fields, etc. in a Python application. Once created, these graphical elements can be associated with or interact with features, functionality, methods, data or even other widgets. This guided project is for intermediate programmers who already have general knowledge of Python basics and want to test out their knowledge with a real application and looking forward to developing a software in less than 1 hour. This project can be your portal into software development. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: This course focuses on developing Python skills for assembling business data. It will cover some of the same material from Introduction to Accounting Data Analytics and Visualization, but in a more general purpose programming environment (Jupyter Notebook for Python), rather than in Excel and the Visual Basic Editor. These concepts are taught within the context of one or more accounting data domains (e.g., financial statement data from EDGAR, stock data, loan data, point-of-sale data). The first half of the course picks up where Introduction to Accounting Data Analytics and Visualization left off: using in an integrated development environment to automate data analytic tasks. We discuss how to manage code and share results within Jupyter Notebook, a popular development environment for data analytic software like Python and R. We then review some fundamental programming skills, such as mathematical operators, functions, conditional statements and loops using Python software. The second half of the course focuses on assembling data for machine learning purposes. We introduce students to Pandas dataframes and Numpy for structuring and manipulating data. We then analyze the data using visualizations and linear regression. Finally, we explain how to use Python for interacting with SQL data.

COURSE_DESCRIPTION: Are you a teacher in higher education wanting to get the best out of your students and assessments? Then on behalf of Risbo, Erasmus University Rotterdam, we would like to welcome you to this MOOC on Assessment in Higher Education. In this MOOC we will guide you through the different phases of preparing, creating and evaluating the assessments in your course. After participating in this MOOC, you will be able to: 1. Design an assessment that is constructively aligned (content, level, methods) with the course objectives and activities 2. Apply the quality criteria with respect to validity, reliability and transparency for construction of assessments and assessment items 3. Analyze the assessment output and results, assess the quality of the assessment and make decisions about students' grades accordingly 4. Formulate future improvements for an assessment For the assignments, you will be working with your own teaching materials. For example you will create your own assessment plan for your course. Next to that you will become part of a learning community with teachers from all over the world. We are offering you instructional videos, interviews, animations and checklists. In addition to these, there will be course activities, such as assessments, and discussion prompts. By participating in this MOOC, you will find answers to the following questions: • What is the role of assessment? • How can you select the right methods of assessment for your course? • What is constructive alignment? • How can an assessment plan and matrix help you in the construction of assessments? • Is it possible to make an absolute reliable and valid assessment? • How can the formulation of good assessment questions have an impact on that? • What is the role of feedback? • How can rubrics help with providing feedback? • What are the things to consider when performing an exam or item analysis? What aspects should you look out for? • How do you draw conclusions from an exam analysis and make plans for future improvements? • If good students fail on certain questions, what does this say about the question... or about your teaching? Are you ready for enhancing your teaching skills? Then take this journey with us.

COURSE_DESCRIPTION: By the end of this project, you will create your own Extract, Transform and Load (ETL) process by using Python on Visual Studio Code During the course of this project, you will be using Python over VS code as the main tool to build your very own ETL process from courses and ratings dataset over SQLite3. The learner will copy the data into his own created database, extract specific records, transform them and finally load them onto a new database. ETL process is viewed as the core of any application, as any further step that requires dealing with the data stored such as: data Analytics, data processing or applying any sort of Machine Learning algorithms will inevitably point out to the start point, which is the ETL process. This guided project is for people who are aiming to start their career in the broad field of Data Engineering and the specific field of Data Management. It will also be of interest for people who are keen on enhancing their programming skills using Python. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: This course can also be taken for academic credit as ECEA 5700, part of CU Boulder's Master of Science in Electrical Engineering degree. This course introduces the basic concepts of switched-mode converter circuits for controlling and converting electrical power with high efficiency. Principles of converter circuit analysis are introduced, and are developed for finding the steady state voltages, current, and efficiency of power converters. Assignments include simulation of a dc-dc converter, analysis of an inverting dc-dc converter, and modeling and efficiency analysis of an electric vehicle system and of a USB power regulator. After completing this course, you will: • Understand what a switched-mode converter is and its basic operating principles • Be able to solve for the steady-state voltages and currents of step-down, step-up, inverting, and other power converters • Know how to derive an averaged equivalent circuit model and solve for the converter efficiency A basic understanding of electrical circuit analysis is an assumed prerequisite for this course.

COURSE_DESCRIPTION: In this 1-hour 30 minutes long project-based course, you'll be able to create a connect four game in python using python's popular library Pygame. You will learn about most of pygame's functions and modules. You'll be able to implement the connect four game logic. You'll be able to insert drawings, images and texts into your game. You'll be able to handle events and react to them being activated and finally, you'll be able to take input from the user. Pygame is a set of python modules designed for writing video games. It allows you to create a fully featured game and multimedia programs in the python language. It's also free, highly portable and runs on nearly every platform and operating system. Python is a popular, high-level, general purpose, dynamic programming language. It is versatile, easy to pickup and learn, readable, and well-structured. You can find a library for basically anything you could imagine: from web development, through game development, to machine learning. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Modeling entities in the real world require you to create custom classes to add to the various built-in classes already provided by Java. Creating such custom classes is key to harnessing the power of object-oriented programming (OOP) in Java. This course focuses on defining such custom classes and then creating objects. Make the most of this course by exploring custom classes, the use of constructors, and modifiers such as private and public. You will also learn the idiomatic Java method of working with getter and setter methods as well as conventions in naming, input parameters, and return types from such methods. After completing this course, you'll not only be able to define custom classes to serve as types in your programs but also instantiate and use objects of these custom classes.

COURSE_DESCRIPTION: By the end of this project, you will use React with Express to build a Web Application that consumes JSON data from an existing Express API. Often, a dynamic web application consists of many different technologies and programming languages. Creating a web application with NodeJS, Express, and React allows the developer to use JavaScript throughout the stack with a focus on the logic rather than the language. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: In this 1-hour long project-based course, you will learn how to use the QuerySet methods and the Q objects to query data in Django. You will generate a sample project and create a view that populates the database with sample data. You will then learn the syntax of keyword arguments to construct queries using the QuerySet methods. You will create complex queries using the Q objects, and finally you will learn how to

query across relationships. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Kommunikation ist ein wechselseitiger Prozess - während eine Person Informationen bereitstellt, muss das Gegenüber nicht nur verstehen, was gemeint ist, sondern auch zeigen, dass es für diese Informationen aufnahmebereit ist. Dazu sind ausgeprägte Fähigkeiten zum aktiven Zuhören erforderlich - ein entscheidendes Asset in jedem Geschäftsumfeld. In diesem Kurs arbeiten Sie daran, Ihre Fähigkeiten zum aktiven Zuhören zu verbessern und die richtige aufnahmebereite Denkhaltung für die Kommunikation anzunehmen. Sie lernen, wie Sie die Verhaltensweisen erkennen, die auf Aufnahmebereitschaft hinweisen, und wie Sie die verschiedenen Arten von Zuhörern identifizieren. Außerdem erfahren Sie, wie Sie die richtigen Fragen stellen, um zu gewährleisten, dass Sie verstehen, was kommuniziert wird.

COURSE_DESCRIPTION: In this course, you will explore deploying and managing Azure virtual machines (VMs), adding and encrypting VM disks, and enabling VM custom scripts. Examine Azure VM deployment requirements and how to use the portal, command-line interface (CLI), and PowerShell to deploy Azure VMs. This 22-video course is one of several preparing learners for AZ-104 Microsoft Azure Administrator certification exam. The key concepts covered here include how to add data disks to your Windows VM in the Azure portal; how to add data disks to a Linux VM in Azure PowerShell; and how to add and remove network interfaces from an Azure VM. Learn to resize your VM with Azure portal; move your VM to another resource group, region, or zone; and redeploy a Windows VM and a Linux VM to a new Azure node. Next, learn to use the Custom Script Extension for Windows and Linux; and how to add and configure a data disk for a Windows and Linux VM, and move a VM to a different resource group, and resize a VM.

COURSE_DESCRIPTION: Cognitive modeling can provide additional human qualities to AI systems. It is traditionally used in cognitive machines and expert systems. However, with extra computing power, it can be applied to more profound AI approaches like neural networks and reinforcement learning systems. Knowledge of cognitive modeling applications is essential to any AI developer aspiring to design AI architectures and develop large-scale applications. In this course, you'll examine the role of cognitive modeling in AI development and its possible applications in NLP, image recognition, and neural networks. You'll outline core cognitive modeling concepts and significant industry use cases. You'll list open source cognitive modeling frameworks and explore cognitive machines, expert systems, and reinforcement learning in cognitive modeling. Finally, you'll use cognitive models to solve real-world problems.

COURSE_DESCRIPTION: SOLVING COMPLEX PROBLEMS will teach you revolutionary new problem-solving skills. Involving lectures from over 50 experts from all faculties at Macquarie University, we look at solving complex problems in a way that has never been done before. This specialization uses the framework of Big History which synthesizes knowledge across the sciences and the humanities, and provides a powerful foundation to think and research in new ways. Big History has been embraced as an important global framework by the World Economic Forum (WEF). Presentations at WEF by Professor David Christian, one of the creators of this specialization, have included 'Interdisciplinary Approaches to Solving 21st Century Challenges' (Davos 2012), 'Big History for Big Picture Thinking' (Davos 2014), and 'Big History, Big Decisions' (Tianjin 2014). In 2015, the WEF Annual Meeting in Davos had four sessions devoted to Big History including three interdisciplinary 'Big History, Big Future' panels on cooperation, innovation, and global growth and stability. These interdisciplinary discussion panels were the inspiration for this Solving Complex Problems Specialization.

COURSE_DESCRIPTION: Unabhängig von Ihrem Titel oder Gehalt kann es manchmal eine Herausforderung sein, Ihr Team zu motivieren. Führungskräfte spielen eine wichtige Rolle bei der Schaffung eines motivierenden Umfelds, in dem sie und ihre Teams herausragende Leistungen erbringen können. In diesem Kurs lernen Sie verschiedene Motivationstechniken kennen und wie Sie sie einsetzen können, um Mitarbeiter zu inspirieren und zu ermutigen. Umgekehrt erfahren Sie, wie Motivation untergraben und Mitarbeiter demotiviert werden können. Sie lernen auch die Eigenschaften einer motivierenden Führungskraft und die Maßnahmen kennen, die Unternehmen ergreifen können, um Menschen zu motivieren und Mitarbeiter für ihre Arbeit zu begeistern.

COURSE_DESCRIPTION: The Java programming language is a simple and powerful language to learn. In this course, you will learn Java programming basic and the Java programming style guide. First, you will learn the basic elements of Java including keywords, comments, variables, identifiers, and data types. Next, you will learn the conventions that should be followed when writing Java programs regarding formatting, naming conventions, programming practices, and using Javadoc. Next, you will use the "this" keyword in a Java application to help understand scope. Finally, you will learn about using Java packages including the java.lang package. This course is one of a collection of courses that prepares learners for Oracle's 1Z0-811: Java Certified Foundations Associate certification.

 COURSE_DESCRIPTION: In this course, you will learn how businesses create value for customers. We will examine the process by which Marketing builds on a comprehensive understanding of buyer behavior to create value. You will learn the major elements of the marketing mix -- product policy, channels of distribution, communication, and pricing -- and see how they fit within different analytical frameworks that are useful to managers. This will enhance your understanding of how marketing works in the business world. You will be able to:

- Define marketing and describe how marketing creates value
- Describe the elements of the marketing mix
- Explain how these elements interact to create value for consumers
- Use different analytical frameworks to examine how managers solve business problems
- Evaluate brand extensions
- Develop a marketing plan proposal

 This course is part of Gies College of Business' suite of online programs, including the iMBA and iMSM. Learn more about admission into these programs and explore how your Coursera work can be leveraged if accepted into a degree program at <https://degrees.giesbusiness.illinois.edu/idegrees/>.

 COURSE_DESCRIPTION: Apache Spark is the de-facto standard for large scale data processing. This is the first course of a series of courses towards the IBM Advanced Data Science Specialization. We strongly believe that is is crucial for success to start learning a scalable data science platform since memory and CPU constraints are to most limiting factors when it comes to building advanced machine learning models. In this course we teach you the fundamentals of Apache Spark using python and pyspark. We'll introduce Apache Spark in the first two weeks and learn how to apply it to compute basic exploratory and data pre-processing tasks in the last two weeks. Through this exercise you'll also be introduced to the most fundamental statistical measures and data visualization technologies. This gives you enough knowledge to take over the role of a data engineer in any modern environment. But it gives you also the basis for advancing your career towards data science. Please have a look at the full specialization curriculum: <https://www.coursera.org/specializations/advanced-data-science-ibm> If you choose to take this course and earn the Coursera course certificate, you will also earn an IBM digital badge. To find out more about IBM digital badges follow the link ibm.biz/badging. After completing this course, you will be able to:

- Describe how basic statistical measures, are used to reveal patterns within the data
- Recognize data characteristics, patterns, trends, deviations or inconsistencies, and potential outliers.
- Identify useful techniques for working with big data such as dimension reduction and feature selection methods
- Use advanced tools and charting libraries to:
 - o improve efficiency of analysis of big-data with partitioning and parallel analysis
 - o Visualize the data in an number of 2D and 3D formats (Box Plot, Run Chart, Scatter Plot, Pareto Chart, and Multidimensional Scaling)

 For successful completion of the course, the following prerequisites are recommended:

- Basic programming skills in python
- Basic math
- Basic SQL (you can get it easily from <https://www.coursera.org/learn/sql-data-science> if needed)

 In order to complete this course, the following technologies will be used: (These technologies are introduced in the course as necessary so no previous knowledge is required.)

- Jupyter notebooks (brought to you by IBM Watson Studio for free)
- ApacheSpark (brought to you by IBM Watson Studio for free)
- Python We've been reported that some of the material in this course is too advanced. So in case you feel the same, please have a look at the following materials first before starting this course, we've been reported that this really helps. Of course, you can give this course a try first and then in case you need, take the following courses / materials. It's free...

COURSE_DESCRIPTION: In this 1-hour long project-based course, you will learn the differences between an exception and syntax errors, how to raise an exception, what an AssertionError exception is within Python, how to use the try, except and else clause and how to use the finally clause and any clean-up actions. By the end of this project, you will have an understanding of error and exception handling in python. Once you have a beginner's knowledge of python programming and start coding you may find that something disrupts the normal flow of the program you have built. You may find yourself with errors in your code. This course will provide students with the knowledge behind exception handling in python and show how to write high-quality code to ensure that if your python scripts encounter a situation that it cannot cope with that the right procedures are in place to provide meaningful information and deal with those errors. Thus, ensuring that your code is efficient and robust which is an essential aspect of writing high-quality code. This project will take students through a number of examples demonstrating several of the most useful python exceptions. You will gain an understanding of exception handling in python from the in-depth examples provided.

COURSE_DESCRIPTION: What is the X-Factor? In Cybersecurity, the X-Factor related to unknown and unpredictable human behavior within and outside of your organization. "No one really knows why humans do what they do", (David K. Reynolds), and because of this organizations can be unprepared for malicious, untrained, or even best intentioned behavior that can cause alarm and sometimes irreparable harm. This course will introduce you to the types of training available to reduce the impact of the X-Factor, evaluate its effectiveness, explore the Security Education, Training and Awareness (SETA) program, and learn why it may fail. The course will conclude with information designed to assist you with some critical components for your business security program. Activities focused on hactivism, cyberinsurance, and ransomware will round out your knowledge base. Your team of instructors has prepared a series of readings, discussions, guest lectures, and quizzes to engage you in this exciting topic.

COURSE_DESCRIPTION: Unabhängig von der Geschäftssituation beständig Ergebnisse zu liefern und Ziele zu erreichen, ist alles andere als leicht. Das gelingt eigentlich nur, wenn Sie effektiv mit Ihrer Zeit umgehen. In diesem Kurs erfahren Sie, warum es wichtig ist, Ihre Ziele mit denen des Unternehmens abzugleichen, und Sie lernen, wie Ihnen dabei ein Zielabgleichsformular helfen kann. Sie lernen außerdem, welche Fragen Sie stellen müssen, um Ziele zu präzisieren, und wie anhand dieser Ziele Prioritäten gesetzt und eingehalten werden.

COURSE_DESCRIPTION: Explore the concept of machine learning linear models, classifications of linear models, and prominent statistical approaches used to implement linear models. This 11-video course also explores the concepts of bias, variance, and regularization. Key concepts covered here include learning about linear models and various classifications used in predictive analytics; learning different statistical approaches that are used to implement linear models [single regression, multiple regression and analysis of variance (ANOVA)]; and various essential components of a generalized linear model (random component, linear predictor and link function). Next, discover differences between the ANOVA and analysis of covariance (ANCOVA) approaches of statistical testing; learn about implementation of linear regression models by using Scikit-learn; and learn about the concepts of bias, variance, and regularization and their usages in evaluating predictive models. Learners explore the concept of ensemble techniques and illustrate how bagging and boosting algorithms are used to manage predictions, and learn to implement bagging algorithms with the approach of random forest by using Scikit-learn. Finally, observe how to implement boosting ensemble algorithms by using Adaboost classifier in Python.

COURSE_DESCRIPTION: To become a data science expert, you must master the art of data visualization. This 12-video course explores how to create and use real time dashboards with Tableau. Begin with an introduction to real-time dashboards and differences between real time and streaming data. Next, take a look at different cloud data sources. Learn how to build a dashboard in Tableau and update it in real time. Discover how to organize your dashboard by adding objects and adjusting the layout. Then customize and format different aspects of dashboards in Tableau and add interactivity using actions like filtering. Look at creating a dashboard starter, a prebuilt dashboard that can be used with Tableau Online to connect to cloud data sources. Add extensions to your dashboard such as the Tableau Extensions API (application program interface). Explore how to put together a simple dashboard story, which consists of sheets-each sheet in sequence is called a story point-and how to share a dashboard in Tableau. In the concluding exercise, learners create a dashboard starter.

COURSE_DESCRIPTION: A big part of data analysis is evaluating how data behaves over time. Power BI's DAX language includes time intelligence functions that enable you to aggregate, compare, and manipulate data using time periods. Use this course to learn how to model data using time-based analysis. Begin by creating a date table. Then use DAX time intelligence functions to extract values from a date. Also, learn how to define dates as a hierarchy, which can then be applied in visualizations. Moving along, practice operating on a range of dates that are shifted from the range in the current context by a specified interval. Finally, perform year-to-date and month-to-date computations from the date in the current context. When you're done, you'll be able to apply a variety of time functions to your data. You'll also be further prepared for the DA-100: Analyzing Data with Microsoft Power BI certification exam.

COURSE_DESCRIPTION: In this 12-video course, learners explore how to define data, its lifecycle, the importance of privacy, and SQL and NoSQL database solutions and key data management concepts as they relate to big data. First, look at the relationship between data, information, and analysis. Learn to recognize personally identifiable information (PII), protected health information (PHI), and common data privacy regulations. Then, study the data lifecycle's six phases. Compare and contrast SQL and NoSQL database solutions and look at using Visual Paradigm to create a relational database ERD (entity-relationship diagram). To implement an SQL solution, Microsoft SQL Server is deployed in the Amazon Web Services (AWS) cloud, and a NoSQL solution by deploying DynamoDB in the AWS cloud. Explore definitions of big data and governance. Learners will examine various types of data architecture, including TOGAF (The Open Group Architecture Framework) enterprise architecture. Finally, learners study data analytics and reporting, how organizations can derive value from data they have. The concluding exercise looks at implementing effective data management solutions.

COURSE_DESCRIPTION: By the end of this guided project, you will be fluent in creating wireframe prototypes for Agile projects based on previous project phases. This will enable you to map the product features and add value to how the customer/user will experience the product or service. You will learn how to encapsulate the needs and wants of the customer persona in the product. This is essential for generating positive results for your business venture. Furthermore, this guided project is designed to engage and harness your visionary and exploratory abilities. You will use proven models in Agile Project Management with Miro to shape the development roadmap of products and services. We will practice critically how Epics, User Stories, Personas, and Customer journey phases become valuable input for creating functionality for products and services. Please see the guide for creating a free account with Miro in the Resources section.

COURSE_DESCRIPTION: The tool of choice for data science professionals in every modern industry and field, the programming language R has become an essential skill for statistical computing and graphics. It both creates reproducible high-quality analyses and takes advantage of superior graphic and charting capabilities. In this 10-video Skillsoft Aspire course, you will explore data in R by using the dplyr library, including working with tabular data, piping data, mutating data, summarizing data, combining datasets, and grouping data. Key concepts covered in this course include using the dplyr library to load data frames; selecting subsets of data by using dplyr; and how to filter tabular data using dplyr. You will also learn to perform multiple operations by using the pipe operator; how to create new columns with the mutate method; and how to summarize data using summary functions. Next, use the dplyr join functions to combine data. Then learn how to use the group by method from the dplyr library, and how to query data with various dplyr library functions.

COURSE_DESCRIPTION: Whether you're an employee or contractor, this CompTIA Security+ SY0-601 course will have something you can use to improve the organizational security at your workplace. You'll start by examining security topics related to the hiring to release process, such as background checks and investigations, non-disclosure agreements, acceptable use policy, and onboarding and offboarding. You'll move on to explore further personnel policies, including job rotation, mandatory vacations, separation of duties, clean desk space, and social media usage. You'll then recognize some useful security awareness practices, such as phishing simulations, computer-based training, role-based training, and diversity training techniques. Finally, you'll identify various business agreements, account types, regulations, and governance, such as GDPR, PCI DSS, CIS, NIST, and ISO. This course is part of a series that prepares the learner for the CompTIA Security+ (SY0-601) exam.

COURSE DESCRIPTION: Project Scheduling is an essential aspect of Project Management. In most case, after the Project Schedule has been prepared or during the Project execution, the Project Schedule needs to be crashed. Crashing a Project means to reduce the total duration of the Project. Crashing a Project involves a cost called the Crash Cost. So, while Crashing a Project, we need ensuring that we increase the Project Cost by the least amount. Crashing a Project optimally can be conducted using Linear Programming. As Microsoft Excel has support for Linear Programming, we can use Microsoft Excel to Crash a Project. Using Microsoft Excel for Project Scheduling has 2 more advantages. The first advantage is that the nuances involved in Project Scheduling becomes clear (This is hidden by tools like Microsoft Project). The second advantage is that we do not need additional license for tools like Microsoft Project. Most importantly, we will discuss aspects of Project Scheduling which cannot be conducted using tools like Microsoft Project and Primavera. In this Project, we will use Microsoft Excel to prepare a Project Schedule and then we will see how we can Crash the Project Schedule. This Guided Project was created by a Coursera community member.

COURSE_DESCRIPTION: Git is an indispensable version control tool for software developers. In this course, you'll learn all about working with Git, beginning with committing changes to files, moving and removing files, and ignoring files. Then you'll discover branching and merging, why and how to check out a branch, and how to merge changes from other branches in Git. Finally, you'll explore version history and its purpose, including rebasing a feature branch and combining multiple commits into one, resolving merge conflicts in Git, and resolving conflicts with the command line interface. This course was originally created by Global Knowledge (GK).

COURSE_DESCRIPTION: The Enterprise Security Architecture for Reliable ICT Services (ESARIS) is the collection of procedures, standards and aids for the protection of all ICT services which T-Systems provides to customers. ESARIS builds on existing IT service management processes as well as the internal organization of the company, and is customized to the needs of T-Systems as a large ICT service provider. This training is intended for all employees in the work area "Sales, Deal Management und T&T". The technical and procedural security measures stipulated in the ICT Security Standard are used as the basis for communication, negotiations and contracting. It is important to demonstrate that the customer's requirements are met ("Fulfillment"). Solutions shall reuse pre-defined elements: Consequently, the training explains the ESARIS approach to standardization and relations to the service portfolio management and to service catalogs. The training outlines how such information can be obtained from the ESARIS Library.

COURSE_DESCRIPTION: By the end of this project, you will be able to create an accurate customer problem statement that diagrams the problem that your brand or product will solve for the customer. The power of creating a customer problem statement is that it becomes business intelligence that can maximize business opportunities by solving user experience problems. It does this by expanding upon the knowledge of the customer's user experience by empathizing with the customer and the challenges or needs they must meet as a part of their normal life journey. In your project you will understand the benefits and use cases for customer problem statements while developing your own customer problem statement geared toward solving user experience or UX problems. To do this, you will gain hands-on experience applying design thinking, user experience knowledge, and context from the customer journey to build a visualization of a customer problem statement in the Miro online visual collaboration platform for teamwork. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Various HTTPX features are used to optimize the processing of HTTP requests. This course introduces you to some advanced techniques that use HTTPX to send and process HTTP requests. You'll start by looking at HTTPX streams, which allow the processing of large responses in chunks to reduce the load on memory resources. You'll then examine the HTTP response content that can determine how our application's subsequent actions are defined, including HTTP status codes, HTTP headers, and cookie usage. Next, you'll configure requests to handle redirects on the server side, set timeout values to prevent long waits due to network or server issues, and touch upon the compatibility of the Python Requests library with HTTPX. Finally, you'll focus on an essential feature of HTTPX - sending and asynchronously processing HTTP requests, which can significantly improve app performance.

COURSE_DESCRIPTION: To get the most out of Access 2019, one needs to understand the structure and main elements of a database. In this 9-video course, "Access 2019: Tables, Fields, and Entries," learners can explore tables, primary keys, and relationships, and discover how to format and edit both fields and field properties. Begin by learning the structure and key features of your database such as a table, field, value, query, and form. Then learn how to create a table automatically or manually in a database, and organize, filter, and hide database items. Examine how to insert fields into tables, format database fields, and edit database field properties, as each field in an Access data table has a particular format. In Access, you will often find that data values inserted into different tables are related, so discover how to link data in different tables to help visualize the relationship between records spread across multiple tables. Then move on to observing how to manage data relationships, and finally, to learning how to visualize object dependencies.

COURSE_DESCRIPTION: You may never be sure whether you have an effective user experience until you have tested it with users. In this course, you'll learn how to design user-centered experiments, how to run such experiments, and how to analyze data from these experiments in order to evaluate and validate user experiences. You will work through real-world examples of experiments from the fields of UX, IxD, and HCI, understanding issues in experiment design and analysis. You will analyze multiple data sets using recipes given to you in the R statistical programming language -- no prior programming experience is assumed or required, but you will be required to read, understand, and modify code snippets provided to you. By the end of the course, you will be able to knowledgeably design, run, and analyze your own experiments that give statistical weight to your designs.

COURSE_DESCRIPTION: General categories of IT services in cloud computing include compute, storage, and networking. Explore how these services address business requirements, along with how graphical user interface (GUI) and command line tools are used to manage cloud resources. This course can be used in preparation for the (ISC)2 Certified Cloud Security Professional (CCSP) exam. The key concepts in this course include: the physical aspect of a cloud platform and the related physical architecture; the networking and communication architecture of a cloud platform, including software-defined networking (SDN); how to deploy a Azure cloud virtual network; and how to understand the compute service as it applies to the cloud platform. In addition, learn how to deploy an Azure virtual machine (VM); to define storage and Storage as a Service (STaaS) within a cloud platform; and to deploy an Azure storage account. Finally, learn about cloud resources using the Azure portal; cloud resources using command line tools; and list requirements for logical design, including tenant partitioning and access control.

COURSE_DESCRIPTION: Code and run your first Java program in minutes without installing anything! This course is designed for learners with limited coding experience, providing a solid foundation of not just Java, but core Computer Science topics that can be transferred to other languages. The modules in this course cover functions, recursion, objects, and mutability. Completion of the prior 2 courses in this specialization are recommended. To allow for a truly hands-on, self-paced learning experience, this course is video-free. Assignments contain short explanations with images and runnable code examples with suggested edits to explore code examples further, building a deeper understanding by doing. You'll benefit from instant feedback from a variety of assessment items along the way, gently progressing from quick understanding checks (multiple choice, fill in the blank, and un-scrambling code blocks) to small, approachable coding exercises that take minutes instead of hours.

COURSE_DESCRIPTION: AZ-500 exam candidates must have the knowledge necessary to deploy and manage Microsoft Azure services as well as the ability to apply Azure solutions to meet very specific business requirements. In this course, you will review Azure security topics in the form of scenarios.

First, you will work with user permissions and role-based access control (RBAC) roles and configure Azure conditional access. Next, you will work with Azure VM permissions, you will harden Azure SQL, and you will encrypt virtual machine (VM) disks. Then, you will work with shared access signatures, data classification, Azure Blueprints, and key vaults. Lastly, you will monitor security using Defender and Sentinel. This course can be used to prepare for exam AZ-500, Microsoft Azure Security Technologies.

COURSE_DESCRIPTION: A security professional needs to be acquainted with security architecture and engineering as they determine the design, implementation, monitoring, and securing of systems and networks of an organization. Use this course to explore the fundamentals of security architecture and engineering. Learn more about client-server, databases, and distributed systems, examine IoT, containers, serverless, and microservices, and explore embedded system security and constraints in detail. You'll also get familiar with TPM, HPC, and edge computing security. Upon completion of this course, you'll be able to assess and mitigate the vulnerabilities of modern security architectures, designs, and solutions, as well as understanding the capabilities of securing information systems. Further, you can also use this course to prepare for the CISSP exam.

COURSE_DESCRIPTION: By the end of this project you will create an application that uses the C# List data structure and the C# Linq to process a collection of Employees in a file. Linq, when used with the List data structure, allows the programmer to compare and perform computations on objects without the need to access attributes directly. It simplifies the process of iterating through a list and obtaining data from user-defined objects.
Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

 COURSE_DESCRIPTION: In this course, you'll learn about how the Stream APIs provide ways to work with collections as streams of objects. You'll examine how operations such as filter, map, and foreach can be applied to collections by treating them as streams of data elements. Next, you'll learn how to use both anonymous inner class objects and lambda functions with streams, how to define predicates, and how to chain multiple stream operators together into a single pipeline that ends with a terminal operator returning a result. Next, you'll discover the differences between terminal and non-terminal operations, as well as between two different types of terminal operations - reduce and collect operations. Finally, you'll see how collect operations can be used to perform extremely complex operations on collections with minimal code.

COURSE_DESCRIPTION: If you love games and want to learn how to make them, then this course is your third step down that path. In this course you will learn the fundamentals of game design, including an understanding of level design, game balancing, prototyping, and playtesting, as well as game asset creation techniques. You will continue developing video games using industry standard game development tools, including the Unity 2020 game engine. At the end of the course you will have completed a 3D First-Person Shooter game, and will be able to leverage an array of game development techniques to create your own basic games.

COURSE_DESCRIPTION: In order for cloud environments to operate efficiently you need to use automation and orchestration to keep things running smoothly. In this course, you will learn about the components and features of cloud automation and orchestration. First, you will learn about the features of infrastructure as code, continuous integration and continuous deployment. Next, you will learn about version control and configuration management and how it relates to orchestration and automation. Next, you will learn about the features of containers, cloud automation activities, secure scripting and orchestration sequencing. Finally, you will learn about backup and restore policies as well as backup targets. This course is one of a collection of courses that prepares learners for the CompTIA Cloud+ (CV0-003) certification.

COURSE_DESCRIPTION: Cryptography has long played a role in securing sensitive information. In this course, you'll begin with an overview of cryptography and how it can secure data at rest and data in motion. You'll then learn how to enable EFS and BitLocker to protect data at rest. You'll explore how to identify methods by which cryptography can protect data in transit and configure network security via IPsec. Finally, you'll examine how PKI uses certificates to secure IT systems through HTTPS, SSH remote management, and generating file system hashes. This course is one of a collection of courses that prepares learners for the CompTIA Advanced Security Practitioner (CASP+) CAS-004 exam.

COURSE_DESCRIPTION: Graphic Design is all around us! Words and pictures-the building blocks of graphic design-are the elements that carry the majority of the content in both the digital world and the printed world. As graphic design becomes more visible and prevalent in our lives, graphic design as a practice becomes more important in our culture. Through visual examples, this course will teach you the fundamental principles of graphic design: imagemaking, typography, composition, working with color and shape... foundational skills that are common in all areas of graphic design practice. I don't just want you to watch a video of someone talking about design, I want you to MAKE design! If you want to be a designer you have to be a maker and a communicator, so this course will offer you lots of opportunities to get your hands dirty with exercises and with more practical projects. At the end of this course you will have learned how to explore and investigate visual representation through a range of image-making techniques; understand basic principles of working with shape, color and pattern; been exposed to the language and skills of typography; and understand and have applied the principles of composition and visual contrast. If you complete the course, along with its optional (but highly recommended) briefs, you will have a core set of graphic design skills that you can apply to your own projects, or to more deeply investigate a specialized area of graphic design. To succeed in this course you will need access to a computer. You can complete this course without one but it will be tougher. Access to, and a beginner's level knowledge of Adobe Creative Suite programs, such as Illustrator, Photoshop and InDesign will help you, especially if you want to complete the optional briefs.

COURSE_DESCRIPTION: Security devices and software are the technical aspect of security. An ethical hacker must be familiar with security technology in order to effectively conduct tests of the target organization's network. In this 10-video course, you will explore firewall types and usage, SIEM systems, intrusion detection systems and intrusion prevention systems (IDS/IPS), antivirus strategies, Windows Firewall, and how to implement Snort. Key concepts covered in this course include security devices and software concepts, and how they relate to ethical hacking; learning to correctly deploy firewall solutions, their relevance to ethical hacking, and different types and usage; and learning the role of SIEM (security information and event management) and how to deploy SIEM systems. Next, learners observe how to utilize IDS/IPS and its relationship to ethical hacking; learn antivirus concepts and implement an AV strategy; configure the firewall in Windows 10 and Windows Server 2019; and learn to configure Windows Defender. Conclude by learning how to implement basic Snort network IDS, a tool that can be used for simple packet capture or for IDS.

COURSE_DESCRIPTION: Amazon Web Services (AWS) provides over 100 services. One would assume it gets pretty time-consuming configuring infrastructure and resources for such a volume of services. It doesn't have to be! Using AWS Elastic Beanstalk (EB), deployment details such as capacity provisioning, load balancing, auto-scaling, and application health monitoring are all handled automatically. Use this course to learn how to manage

your AWS applications and environments using EB. Explore features, components, and supported platforms. See how EB applications are monitored and examine how Elastic Beanstalk Command Line Interface (EB CLI) works. Moving along, practice using Elastic Beanstalk to create, manage, and deploy various application types as well as to deploy a Docker environment. Upon completion, you'll be able to use AWS Elastic Beanstalk with confidence. This course helps you prepare for the AWS Certified Developer - Associate 2021 certification exam.

COURSE_DESCRIPTION: Welcome to Course 5 - Strategic Sales Management Final Project. In this course, you'll develop the final project of the specialization, which is an application of the whole set of concepts, models, frameworks, tools, and techniques discussed and practiced through the four previous courses. A business case provides the business context to serve as the reference to support your analyses regarding strategy, marketing, and sales integration. The case is adapted from a real-life experience. Having developed these analyses, you will follow the project instructions that lead you to the application of the concepts you have learned so far, and proceed to the sales planning processes to support the development of a sales guidelines, which will support the sales planning process in a later moment. The primary learning outcome of this course is to master concepts application to create sales guidelines, based on a structured analysis of a business case. The sales guidelines serve as the background of a sales plan structure, and they also connect the sales planning process to the strategy, at the same time that supports the development of a sales plan at a later moment. Whereas the sales plan structure may not be a detailed sales plan, it will provide all the aspects necessary to develop the sales plan later. The project will be peer-reviewed, and the instructions to develop it also bring the rubrics to develop the review.

COURSE_DESCRIPTION: Accounting information is the lifeblood of the organization, as it facilitates and influences operational and strategic decisions intended to achieve organizational goals. Organizations benefit from three decision-oriented roles of accounting: measurement, control, and communication. This course provides an introduction to accounting's role in helping managers develop and implement, and improve the organization's strategy. In particular, you will learn how non-financial and financial information is created, organized, and communicated to help managers make strategic decisions, as well as measure strategic success. This course also provides an introduction to accounting as a control function inside the organization, which helps influence the alignment of managers' and employees' decisions with organizational goals. You will learn about different types of controls, including process controls, budgets, and performance measurement and evaluation tools and techniques. Upon successful completion of this course, you will be able to: • Create and communicate accounting information that facilitates strategic decisions. • Use accounting information to develop, implement, and improve organizational strategy. • Implement controls that align managers' and employees' decisions with organizational goals. • Measure and evaluate manager and employee performance to control and motivate operational and strategic decision-making. If you enjoy this business course and are interested in an MBA, consider applying to the iMBA, a flexible, fully-accredited online MBA at an incredibly competitive price offered by the University of Illinois. For more information, please see the Resource page in this course and onlinemba.illinois.edu.

COURSE_DESCRIPTION: Welcome to this guided project about Configuring and Testing Basic Network Connectivity This project is designed for IT security professionals and aspiring network engineers. To succeed in this project, it's recommended to have a good background in computer networks. A Cisco networking academy ID is also required to use the Packet Tracer in this project. In this project, you will configure and test basic network connectivity by managing configuration on Cisco devices such as IP addresses, virtual interfaces, and DHCP servers and verifying end-to-end network connectivity. By the end of this project, you will be able to configure small-size computer networks and test their end-to-end connectivity. This project is one of a kind because it teaches foundational computer network skills to beginners and professionals alike. Moreover, it is based on an entirely simulated environment where learners can practice as if they have access to real devices.

COURSE_DESCRIPTION: Learners can explore how to secure virtual and cloud environments in this 12-video course, which examines different types of virtualization technologies, including hypervisors, application virtualization, OS (operating system) virtualization, and desktop virtualization. Prepare for the Systems Security Certified Practitioner (SSCP) certification exam by examining hypervisors, a physical host that runs virtual machines, and appropriate software, and uses them to increase server density. You will learn about application virtualization, where the app files are not installed on the host machine, but run on the host machine. Next, you will examine OS virtualization where a virtual machine is assigned virtual hardware, such as virtual CPUs, virtual network adapters, and hard disks. You will learn how to install and configure a Microsoft Hyper-V Virtual Machine. Learn how to configure iSCSI (Internet Small Computer Systems Interface), and secure it by using CHAP (challenge handshake authentication protocol). Then learn to use AWS (Amazon Web Service) to secure data at rest in the cloud. Finally, you will examine laws and regulations to consider when using public cloud services.

COURSE_DESCRIPTION: By the end of this project, you will learn how to create a Mood Board from scratch using the free version of Canva. Mood boards are physical or digital collages that arrange images, materials, text, and other design elements into a format that's representative of the final design's style. Mood boards can be used for creating brand designs, product designs, website designs, and pretty much any other type of design

project. You will be able to incorporate a color scheme, images, and other design elements for aesthetically pleasing and value added business marketing collateral. We can use Canva to complete this project because it provides all the tools you need to create an organized and visually appealing product while offering a variety of options for sharing and collaboration. You will learn how to plan and organize your ideas and utilize graphic design tools as you create a Mood Board template for your next visual experience. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Organisations all around the world are using data to predict behaviours and extract valuable real-world insights to inform decisions. Managing and analysing big data has become an essential part of modern finance, retail, marketing, social science, development and research, medicine and government. This MOOC, designed by an academic team from Goldsmiths, University of London, will quickly introduce you to the core concepts of Data Science to prepare you for intermediate and advanced Data Science courses. It focuses on the basic mathematics, statistics and programming skills that are necessary for typical data analysis tasks. You will consider these fundamental concepts on an example data clustering task, and you will use this example to learn basic programming skills that are necessary for mastering Data Science techniques. During the course, you will be asked to do a series of mathematical and programming exercises and a small data clustering project for a given dataset.

COURSE_DESCRIPTION: Bei der Arbeit begegnen uns unweigerlich irgendwann Menschen mit unterschiedlichen Persönlichkeiten, die Dinge auf ihre ganz eigene Weise erledigen möchten. Zwischenmenschliche Unterschiede und abweichende Sichtweisen - ob bei einem Vorgesetzten oder einem Kollegen - können das Stressniveau erhöhen, Energie kosten und sich auf die Moral, Produktivität und Zufriedenheit auswirken. Es gibt jedoch Strategien zum Abbau von Spannungen und zum Aufbau stärkerer, vertrauensvollere Beziehungen. Dazu gehören zum Beispiel die Anpassung unseres eigenen Verhaltens und das Verständnis für Situationen und Verhaltensweisen anderer, die uns manchmal stören. In diesem Kurs lernen Sie, wie Sie Ihr eigenes Verhaltensmuster beurteilen, identifizieren und beeinflussen können, um Konflikte zu vermeiden und zu kontrollieren, bevor sie auftreten. Außerdem erfahren Sie, wie Sie mit gängigen Situationen umgehen, die bei der Arbeit zu Konflikten führen können, wie Sie effektiv mit verschiedenen Persönlichkeitstypen zusammenarbeiten und wie Sie Gewohnheiten entwickeln, die Ihnen helfen, zwischenmenschliche Konflikte am Arbeitsplatz mit Geduld zu bewältigen.

COURSE_DESCRIPTION: There are almost two billion web sites in the world today. Many of these sites are not sufficiently protected against attacks. In this course, you'll begin by learning how to install a sample vulnerable web application. Next, you'll explore how to use reconnaissance methods, such as nmap scanning and web app scanning using OWASP ZAP, to discover HTTP hosts and vulnerable applications. You'll learn how to execute attacks including XSS, CSRF, file injection, and denial of service. You'll move on to examine how to capture user keystrokes using a hardware keylogger and capture cleartext HTTP transmissions. Lastly, you'll learn how to forge fake TCP/IP packets and then deploy and secure a cloud-hosted web application.

COURSE_DESCRIPTION: Explore the machine learning predictive analytics, exploratory data analytics, and different types of data sets and variables in this 9-video course. Discover how to implement predictive models and manage missing values and outliers by using Python frameworks. Key concepts covered in this course include predictive analytics, a branch of advanced analytics, and its process flow, and learning how analytical base tables can be used to build and score analytical models. Next, you will discover business problems that can be resolved by using predictive modeling; how to build predictive models with the Python framework; and learn the essential features of exploratory data analysis. Then learn about data sets, collections of data corresponding to the content of a single database or a single statistical data matrix, and then learn the variables of the different types of data sets including univariate, bivariate, and multivariate data and analytical approaches that can be implemented with them. Finally, you will learn about methods that can be used to manage missing values and outliers in data sets.

COURSE_DESCRIPTION: Goroutines are foundational components of Go's concurrency model. Goroutines may be considered units of execution in a Go program. Goroutines are very lightweight with small stack sizes. Consequently, millions of Goroutines may be spawned at about the same time on modest hardware. In this course, you'll explore Goroutines and how they implement the packages sync and sync/atomic. You'll investigate race conditions in Goroutines and explore race conditions versus data races. Next, you'll create and work with WaitGroups, implement atomic operations and see how mutexes are used with Goroutines. Lastly, you'll create and explore how to detect and avoid race conditions in Goroutines.

COURSE_DESCRIPTION: In der Öffentlichkeitsarbeit (Public Relations, PR) hielten sich Überzeugungskraft, Informationen und Kommunikation stets die Waage. Diese Definition impliziert jedoch eine einseitige Beziehung. Der Aufstieg der sozialen Medien und die blitzschnellen Nachrichtenzyklen verlangen, dass PR-Profis stärker mit ihrer Zielgruppe interagieren und Beziehungen aufbauen und pflegen. Dieser Kurs vermittelt Ihnen die Grundlagen der modernen Public Relations und stellt Ihnen u. a. die neuen Forschungsmethoden vor. Er erklärt, wie Sie Beziehungen zu Einflussnehmern - "Influencern" - aufbauen und pflegen und was Sie tun müssen, wenn etwas schiefgeht. Sie lernen außerdem, wie Sie eine erfolgreiche PR-Kampagne aufbauen und überwachen.

COURSE_DESCRIPTION: Organizations around the world are now realizing the many advantages of using data to overhaul their business strategies and gain a competitive edge. However, data-driven decision making doesn't mean you have to ignore your intuition or past experience. In fact, when used in

combination with business acumen, building a data-driven decision-making culture can be a powerful tool for change. In this course, you'll learn about the benefits that occur when an organization makes decisions using data as the basis of their choice. You'll explore best practices for taking a balanced approach to decisions that don't rely on a single perspective. And you'll also learn how to avoid common mistakes associated with using data to inform decisions.

COURSE_DESCRIPTION: Template metaprogramming is a powerful computer science technique used to achieve code reuse and some incredibly elegant architectures. In C++, template metaprogramming is achieved via template functions and classes that are instantiated at compile-time, not at runtime. In this course, learn how to define and instantiate function templates to effectively provide compile-time polymorphism. Then, explore how template definitions can make assumptions about the template parameters. Finally, learn how to define and use templates with pointer and reference types to provide function overloading.

COURSE_DESCRIPTION: Storytelling in Branding and Content Marketing is an IE University course for professionals who want to learn how to produce memorable content through quality storytelling. Students will go through a learning process that will start with a deep understanding of the term Branded Content and its main differences with traditional advertising, simultaneously creating an effective storyline based on strong brand values and messages. The course analyses the production of quality journalism and explores how to create memorable and long-lasting connections with a given target audience in a world of constant content surplus. It concludes with a deeper insight into the term of Brand Entertainment, giving them the opportunity to amplify their knowledge about how to produce a good call to action and retain the audience's attention.

COURSE_DESCRIPTION: Az üzleti világ tele van adatokkal. Ezen adatok stratégiai felhasználása komoly versenylőnyöket jelent egy vállalat számára. A trükkös részt az adatok értelmezése, majd az adatok jelentésének közvetítése jelenti. Az adatvizualizáció (angol rövidítéssel "data viz") hasznos betekintést nyújt a bonyolult adathalmazok világába. Ezen a tanfolyamon megismerheti az adatvizualizációk létrehozásának szempontjait, és megtudhatja, hogyan közvetítheti üzenetét az adatvizualizációs eszközök segítségével. A tanfolyamon megismeri majd, hogy miként kommunikálhat egyértelműen az adatvizualizációs technikák segítségével. Emellett betekintést nyerhet abba is, hogyan használhatja a tervezés bevált eljárásait annak biztosítása érdekében, hogy a vizualizációk egyértelműen és pontosan azt a történetet mondják el, amelyet Ön szeretne.

COURSE_DESCRIPTION: Native advertising is a niche form of advertising that leverages the design and format of news and entertainment content. Native advertising is less about selling products and more about producing useful content for consumers who are in the 'consideration' phase of the advertising purchase funnel. Often in the form of news-like stories, native advertising has been shown to persuade consumers. Native advertising is affordable, and doesn't require graphic design to get started. For these reasons, it's a compelling advertising technique for small businesses. This course outlines a case study where a small travel startup used native advertising to drive hotel sales. Execution strategies for a successful, no-creative native campaign are laid out, including: gathering existing news coverage, ethical content seeding, and content generation.

COURSE_DESCRIPTION: In this course you will build an Android app with a Table Layout in Android Studio with the java programming language and will be given an explanation of table layout. This app will have a piece of text asking the user to select their month of birth from a spinner (a type of drop down menu where the user selects from a set of options). There will be an image (ImageView) next to the spinner which will change to match whichever month the user selects. Beneath this the user will be asked to use a special type of button (ToggleButton) to indicate if they prefer cats or dogs. There will be an image (ImageView) next to the button that will change to match the animal which the user selects. Finally, the user will be asked to input a number between one and nine in an input box (EditText). Beneath the input box (EditText) will be an image (ImageView) that will change to match the number input by the user or to an image with "Do not use" on it if the user inputs something that is not a numerical digit between one and nine (1, 2, 3, 4, 5, 6, 7, 8, 9). When the user closes the app the program will remember the choices made by the user in their previous visit. You will upload an APK of the app to a website called Appetize.io to test the app. Projects in Series 1: 1. Build a Simple App in Android Studio with Java 2. Build a Persistent Storage App in Android Studio 3. Build a Linear Layout App in Android Studio 4. Build a Relative Layout App in Android Studio 5. Build a Table Layout App in Android Studio Projects in Series 2: 1. Build an App in Android Studio using Resources 2. Build an App in Android Studio using Static Files 3. Build an App in Android Studio using Read - Write 4. Build an App in Android Studio using onTouch 5. Build an App in Android Studio using Activities

COURSE_DESCRIPTION: Seit Einführung der E-Mail sind das Kommunikationsaufkommen und die Menge an Informationen, die von normalen Büromitarbeitern tagtäglich bewältigt werden müssen, dramatisch gestiegen. Um den Überblick zu behalten, müssen Sie alle E-Mails, die Sie im Laufe eines Arbeitstages erhalten, sortieren, ablegen, beantworten oder löschen. Dieser Kurs stellt Methoden zur effektiven Verwaltung von E-Mails vor. Hier erfahren Sie, wie Sie Ihre E-Mails mit Ordnern und Filtern möglichst effektiv organisieren können und welche E-Mails sofort gelöscht werden können. Im Kurs wird auch beschrieben, wie wichtige Informationen wiederhergestellt werden können, wenn eine E-Mail verloren geht.

COURSE_DESCRIPTION: Word 2019 offers users a series of advanced tools to help your readers find the information they need from your document. In this 10-video course, learners can explore ways to structure text to make it more readable. First, use cover pages, tables of contents, and Quick Parts to set out your ideas more clearly. You will observe simple but effective ways to craft a cover page, always a good way to give a brief, but relevant, summary of your document. Next, learn how to create an effective table of contents, giving your reader a great way to navigate your document; if your document is formatted properly with titles and subtitles, this can be done quickly without manual insertions, but you must confirm that the headings have been formatted correctly. Key topics covered here include how to insert bookmarks and captions, or short descriptions that help readers identify contents of an illustration, graph, or table; using the cross-reference function; and planning and restructuring your document. In order to practice what you have learned, you will find the Word document named Word 2019 for Windows: Shaping Documents Exercise as well as the associated materials in the Resources section.

COURSE_DESCRIPTION: In this one-hour, project-based course, we'll add code to an existing dialog box to make it much more versatile and reusable. This project involves building a custom dialog system that opens on trigger or click, dynamically wiring up GameObjects and behaviours to dialog box choices and making the game environment respond to a player's selection. The guided project will introduce you to the following Unity concepts: - Buttons - Triggers - Unity Events - Interfaces This is Part 3 of a three-part series on creating a good-looking, versatile and reusable dialog box for your game or other Unity application. Part 1 covered how to create a simple dialog box and Part 2 showed you how to use TextMesh Pro for great visual effects. This is a stand-alone guided project, but because this is a continuation of previous parts in the "Dialog Box" series, it is recommended that you complete part 1 before commencing this guided project. This series makes use of the poly-castle Unity project created in Create

Keyboard Movement Mechanics with C# in Unity. It is a complimentary course to this guided project and, although not a prerequisite, is recommended for a more well-rounded understanding of the concepts presented herein. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: This course will introduce you to Amazon Web Services (AWS) serverless architecture. Through demonstrations and hands-on exercises you'll learn skills in building and deploying serverless solutions. Using real-world examples of a serverless website and chat bot, you'll build upon your existing knowledge of the AWS cloud to take advantage of the benefits of modern architectures for greater agility, innovation, and lower total cost of ownership across a range of AWS services, including AWS Lambda, Amazon API Gateway, Amazon DynamoDB, and Amazon Lex. In this course, you'll have the option to complete hands-on exercises. We strongly suggest you take advantage of the AWS Free Tier to follow the lab exercises provided by throughout the course. Be aware that any services used outside of the free tier may result in you incurring charges through your AWS account. Class forums will also allow you to ask questions and interact with AWS training instructors. After completing this course, you'll have the knowledge and skills to build serverless solutions on AWS. This course has been developed by AWS, and is delivered by AWS technical instructors who teach cloud computing courses around the globe.

COURSE_DESCRIPTION: This 12-video course explores DevOps, a practice of managing the development and operational aspects of application development that involves engaging all stakeholders. Learners will explore the principles, processes, and tools used to adopt the DevOps culture, and its benefits. You will learn four important terms when adopting a DevOps culture, Agile, which is a project management methodology involving iterative approaches for software development, test-driven development, unit testing, and to build automation. This course also examines the benefits of adopting a DevOps culture, including production readiness, uncompromised and optimum product quality, repeatable delivery, frequent build and integration, application stack consistency, application monitoring management, and test automation. You will learn how DevOps assessment helps organizations and enterprises to measure and assess the current state of all organizational areas by analyzing the current processes and infrastructure. This course then explores the DevOps template, and how to implement the DevOps process by configuring and collaborating with various DevOps tools. Finally, you will learn how to foster a DevOps oriented organization.

COURSE_DESCRIPTION: Explore ways to set your work preferences in Word 365. First, learn how to manage your account with security preferences, connect services, and application updates. Next, you will explore how to customize your Word interface. Then you will examine some of Word's advanced options to modify many of the program's display settings. You will examine how to customize Word's user and input behavior, including the Mini Toolbar, and instant previews to improve your performance. When working with or switching between languages, you will learn how to access and update language settings in Word. Then learn how to adjust your save and print options to print a document in draft form, adjust scale settings, and how to print a double-sided document. Finally, you will examine the Quick Access Toolbar and the Office ribbon, the most important elements in Word, which have all the tools used when creating a document. In order to practice, you will find the video samples in the Resources section.

COURSE_DESCRIPTION: The modern software development landscape is filled with companies trying to find their space in the global market. To expedite the creation of the best software possible, many companies leverage DevOps tools to help ensure the best code is quickly in front of the customer. In this course, learn the differences between software development and software deployment management, in addition to several software deployment models, such as the waterfall, iterative, spiral, V, big bang, and Agile models. Next, examine DevOps, its benefits, and how it differs from previous methodologies. Finally, discover challenges when embracing a DevOps methodology. Upon completion, you'll be able to define the elements of software management and deployments with a focus on comparing and contrasting DevOps to other methodologies.

COURSE_DESCRIPTION: Explore the business case for using Azure and common management tools. In this course, you'll examine how Azure solutions can address business needs and which tools can be used to achieve this. You'll start by learning about common Azure solutions and which business problems they address. Next, you'll learn how to use the Azure portal and Cloud Shell, PowerShell, and the command line interface to deploy and manage Azure resources. Lastly, you'll learn how Azure services are exposed to developers through APIs. This course is one of a collection of courses that prepares learners for the AZ-303: Microsoft Azure Architect Technologies certification exam.

COURSE_DESCRIPTION: Nicht nur durch Glaubwürdigkeit und Vertrauenswürdigkeit, sondern auch durch Einflussnahme können Sie ohne direkte Autorität Ergebnisse erzielen. Wenn es genau darauf ankommt, sind effektive Beeinflussungsfähigkeiten wahrscheinlich das wichtigste Merkmal. Wenn Sie Einfluss ausüben, beteiligen Sie andere an der Ergebniserzielung - auch ohne offizielle Macht. Beeinflussung hat nichts mit Zwang oder Ausübung eines Rechts zu tun. Es bedeutet, dass man aus guten Gründen Menschen für sich gewinnt. Drei Methoden, um Einfluss auszuüben, sind Sprache/effektive Kommunikation, Gegenseitigkeit/Austausch von "Währungen" und Beharrlichkeit bei Widerstand.

COURSE_DESCRIPTION: Low-code, no-code, and serverless applications are changing the business landscape for technical tasks. Businesses are rapidly adopting these technologies due to the numerous ways they improve business efficiency, like reducing technical overhead and increasing speed and ease of app delivery. With this course, explore alternatives to writing code and using frameworks by focusing on low-code and no-code solutions. Examine

the similarities and differences between low-code and no-code solutions. Next, discover common use cases for popular low-code and no-code platforms and build a web app without writing a single line of code. Finally, learn how to create a workflow for an event-driven application and explore best practices for low-code and no-code platforms. Upon completion, you'll be able to work with low-code and no-code platforms.

COURSE_DESCRIPTION: It is no longer adequate for software developers and engineers to simply write code that works. They also need to know how to optimize applications for best performance. Learn how you can do this in your role through this diverse course. Learn how software modeling can be employed when designing systems with performance in mind. Examine the role memory management plays in application performance. Discover techniques for code optimization and refactoring. Explore the benefits of optimizing code. And investigate the roles garbage collection, heap dumps, and threading management play in application performance. As you progress, study some code optimization best practices and write a multi-threaded program in .NET. Upon course completion, you'll know the best ways to optimize application performance.

COURSE_DESCRIPTION: Learners will discover how virtual networks (VNETs) can be used to isolate Azure cloud resources and how network security groups (NSGs) allow or deny traffic to or from subnets and virtual machine (VM) network interfaces, in this 17-video course, helping prepare for AZ-500 Microsoft Azure Security Technologies certification exam. The course examines use of Secure Shell (SSH) for managing Linux, remote desktop protocol (RDP) for managing Windows, and jump boxes as central, publicly accessible administrative points. Begin the course by creating an Azure VNET using the graphical user interface (GUI), the command-line interface (CLI), and using PowerShell. Next, an overview of NSGs, and how they can allow or deny network traffic. Create an NSG by using the GUI, the CLI, and using PowerShell. Remotely manage Linux VMs with both SSH and RDP. Deploy a jump box remote management point. Explore how Azure Firewall is used, configure Azure Firewall network rules, application rules, and network address translation (NAT) rules. Finally, learn how to configure a route table entry so that traffic is sent to Azure Firewall.

COURSE_DESCRIPTION: By the end of this project, you will Build a MERN application using Next.js by using Next.js to fetch data from an existing REST API and passing props to a React component to present questions and check answers on a form. Next.js is used to provide server-side rendering and routing. React is used for presenting dynamic data on the Client side for such activities as form processing. Next.js may be responsible for fetching data from an API to create props, while the React component handles form creation and event processing. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Welcome to the Full Stack Development with the MEAN Stack Bootcamp channel! A continuation of our Full Stack Developer Bootcamp, the Full Stack Development with the MEAN Stack Bootcamp will build upon the application built in previous FSD Bootcamps. The app will be based on a weight loss competition. Accordingly, we will expect a user to register and then login after that. Each day the user logs in, she will record a weight for that day, this data will be fed into the database and will be displayed in one of two ways. Focus is placed on the building blocks of creating an app like this, so the learner feels comfortable with Angular, MongoDB and NodeJS, the MEAN stack. In terms of Angular specific topics, we will be talking about: ModulesComponentsTemplatesServicesMetadataDirectivesData bindingDependency injection This course does not teach Angular principles but implementing those principles in the building of an app. We expect the learner to be familiar with JS, CSS and HTML as well as some database and jQuery knowledge.

COURSE_DESCRIPTION: The process of creating a complicated data model in Power BI is straightforward. If your data is coming in from more than one transactional system, before you know it, you can have dozens of tables that you have to work with. Building a great data model is about simplifying the disarray. A star schema is one way to simplify a data model, and you'll learn about the terminology and implementation of them in this module. You will also learn about why choosing the correct data granularity is important for performance and usability of your Power BI reports. Finally, you'll learn about improving performance with your Power BI data models.

COURSE_DESCRIPTION: Nachdem du dieses Projekt abgeschlossen hast, wirst du gelernt haben wie du deine Tools in der kostenlosen unternehmens basierten Messaging-App Slack hinzufügen kannst, um dir und deinem Team bestimmte Arbeitsabläufe zu erleichtern. Dieses Produkt ist für Menschen gedacht, die Slack bereits benutzen und ihre Arbeitsabläufe vereinfachen wollen oder produktiver gestalten möchten. Slack ist eine Messaging-App, die sich an Unternehmen richtet, die für eine schnelle und einfache Kommunikation zwischen den verschiedenen Teammitgliedern sorgt. Durch die Kommunikation mit Slack können Ressourcen mit allen entsprechenden mitgliedern effektiv geteilt werden und der Arbeitsprozess somit optimiert werden. Slack gibt es sowohl als Desktop-App als auch als Webbrowserversion und bietet seinen Usern neben effektiver Kommunikation die Möglichkeit andere Apps und Tools miteinander zu verbinden. Nach Abschluss dieses Projektes wirst du gelernt haben, Tools in Slack miteinander zu verbinden, um alle Informationen an einem Ort zusammen zu haben. Die Integration der verschiedenen Tools in Slack Sorgen dafür, dass auf Information und Materialien einfach zugegriffen werden kann und dass wichtige Informationen nicht verloren gegangen werden.

COURSE_DESCRIPTION: In this course, you will: - Explore the applications of GANs and examine them wrt data augmentation, privacy, and anonymity - Leverage the image-to-image translation framework and identify applications to modalities beyond images - Implement Pix2Pix, a paired image-to-image translation GAN, to adapt satellite images into map routes (and vice versa) - Compare paired image-to-image translation to unpaired image-to-image translation and identify how their key difference necessitates different GAN architectures - Implement CycleGAN, an unpaired image-to-image translation model, to adapt horses to zebras (and vice versa) with two GANs in one The DeepLearning.AI Generative Adversarial Networks (GANs) Specialization provides an exciting introduction to image generation with GANs, charting a path from foundational concepts to advanced techniques through an easy-to-understand approach. It also covers social implications, including bias in ML and the ways to detect it, privacy preservation, and more. Build a comprehensive knowledge base and gain hands-on experience in GANs. Train your own model using PyTorch, use it to create images, and evaluate a variety of advanced GANs. This Specialization provides an accessible pathway for all levels of learners looking to break into the GANs space or apply GANs to their own projects, even without prior familiarity with advanced math and machine learning research.

COURSE_DESCRIPTION: Today's workplace pushes managers to explore new strategies to succeed. It's not possible for one person to master everything that's required for success - you need experts. Experts have the knowledge and skill to come up with unique perspectives and explore innovative strategies. And while they have unique perspectives, they have unique needs too. In this course, you'll learn what makes experts so valuable to organizations and what methods will help you get the best results from them. You'll also learn ways to partner with experts to give them what they require and strategies to overcome difficulties that arise from working with challenging experts.

 COURSE_DESCRIPTION: In diesem Kurs werden wissenschaftliche Analysen, Tools und Mathematik dazu genutzt, aus Rohdaten nützliche Erkenntnisse zu gewinnen und diese dann für eine effektive Geschäftsstrategie anzuwenden. Dieser Kurs behandelt die entsprechenden bewährten Verfahren aus der Datenwissenschaft. Unternehmen wenden sich zunehmend der Datenwissenschaft zu. Sie verwenden wissenschaftliche Analysen, Tools und Mathematik, um nützliche Erkenntnisse aus Big Data zu extrahieren, um ihre Entscheidungen zu lenken und geschäftliche Verbesserungen voranzutreiben. In diesem Kurs lernen Sie die Merkmale und Schlüsselemente der Datenwissenschaft sowie die potenziellen Vorteile für Unternehmen kennen. Sie erfahren auch, welche Fähigkeiten in einem Datenmanagement-Team erforderlich sind, und lernen bewährte Verfahren zum Extrahieren nützlicher, umsetzbarer Erkenntnisse aus Daten und allgemeine Herausforderungen kennen, denen sich Unternehmen bei der Verwendung von Datenwissenschaft gegenübersehen.

 COURSE_DESCRIPTION: The networked society is here. Knowing how to navigate such a world is more important than ever and tools such as stakeholder mapping are increasingly relevant to that end. Given this context, in this project you will learn how to enhance the functionalities of a very powerful mapping framework (Kumu), by connecting it to Google Forms. Such a setup allows for the creation of exponential relationship maps, that can grow with inputs from many people, without them having to get familiarized with Kumu or any other mapping tool. This learning journey will be framed around the creation of a "form-fed map" that will be immediately useful for you to map your own network of colleagues, friends, and relatives. Note: This project works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

 COURSE_DESCRIPTION: This free online course is one of 10 courses available in the Goldman Sachs 10,000 Women collection, designed for entrepreneurs ready to take their business to the next level. In this course, you will examine your customers' buying process and explore the benefits of market segmentation. Through competitive analysis and identifying your competitive advantage, you will consider how an understanding of your customers and competitors can help you maximize the value of your offer, enabling you to achieve business growth. By the end of this course, you will have developed a clear Customer Value Proposition (CVP). This will enable you to communicate your business offering to your target audience in a compelling way. You will also have the opportunity to examine how the development of a pricing strategy can best support business growth. The 10,000 Women course collection offers a truly flexible online learning experience. You have the freedom to approach the program in any way that works for you - take any course, or combination of courses, to tailor your learning journey to your individual business growth needs. If you choose to take all 10 courses, you will explore all the key elements of your business and develop a thorough plan for your business's growth. You can find out more about the Goldman Sachs 10,000 Women collection in the FAQs.

 COURSE_DESCRIPTION: Modern C++ offers the use of smart pointers in the C++ standard library, which uses the resource allocation is initialization (RAII) technique to free programmers from the burden of resource management. Take this course to discover the various pitfalls involved in manually managing memory on the free store in C++. Through this course, you'll explore how to automate the management of resources that need to be explicitly acquired and reduce resource management issues through the RAII technique. When you are finished with this course, you should be able to manage memory and other resources in your C++ code using smart pointers from the standard library.

COURSE_DESCRIPTION: In this course, you will develop your data science skills while solving real-world problems. You'll work through the data science process to and use unsupervised learning to explore data, engineer and select meaningful features, and solve complex supervised learning problems using tree-based models. You will also learn to apply hyperparameter tuning and cross-validation strategies to improve model performance. NOTE: This is the third and final course in the Data Science with Databricks for Data Analysts Coursera specialization. To be successful in this course we highly recommend taking the first two courses in that specialization prior to taking this course. These courses are: Apache Spark for Data Analysts and Data Science Fundamentals for Data Analysts.

COURSE_DESCRIPTION: Navigating and setting up your Android 8 device couldn't be easier. During this course, you will learn how to create and configure your user account, as well as navigate Android Oreo and create multiple user accounts to share your tablet. Begin by using finger gestures on the touch screen to navigate the interface, access features, and open applications. Then learn how to access the virtual keyboard and type on the touch screen. Observe how to connect and sync your tablet to your Gmail account, get your emails, shop at the Google Play store, install and access Android apps. The course also covers how to personalize your display, change the wallpaper, adjust screen brightness, resize screen text and objects. Finally, you can select tiles and buttons with Quick Settings.

COURSE_DESCRIPTION: Explore the concept of HotSpot, how to control Java virtual machine (JVM) compiler with directives, the changes introduced in JDK 11, the performance enhancements in Oracle's Virtual Machine, and other topics covered in this 11-video course. Begin with a look at compiler directives, and how to control JVM compilation using compiler directives. Then examine some of the prominent changes introduced in the JDK 11 release from the perspective of JVM. Next, learn how to write directives in order to control compilation in JVM, and also explore the role of class data sharing in reducing application start-up time and memory footprint. Delve into the performance enhancements that were introduced in Oracle HotSpot virtual machine technology and look at the concept, the prominent features, and usage of Native Memory Tracking. Also, explore the concept of HotSpot Provider, along with various VM Lifecycle probes. To complete this course, learn the different approaches of how to transform null or empty strings into empty optional, and examine how to use nest-based access control in Java SE 11. This is one course is a series to prepare for the 120-816: Java SE 11 Programmer II certification exam.

COURSE_DESCRIPTION: Functions remain an important construct for code modularization and reuse in C++, even though C++ is an object-oriented language. Learn how to use functions in C++, focusing on free functions, and examine the distinction between declaring a function, where you specify the function's signature, return type, and name; defining a function, where you create the body of a function; and invoking the function. Then, explore the semantics of passing parameters by value to C++ functions. Finally, compare pass-by-reference semantics to pass-by-value semantics and

investigate the differences. Upon completion of this course, you will be able to use pass-by-value and pass-by-reference semantics in the context of function invocation in C++.

COURSE_DESCRIPTION: The skills and knowledge needed to become a Selenium expert include using Selenium WebDriver to work with security mechanisms, such as controlling user access, securing user input, and preventing attacks, and recognizing how these mechanisms impact test automation. In this course, you'll explore the security mechanisms implemented in applications and their impact on test automation. You'll learn how to handle security certificates in Firefox, Chrome, and Internet Explorer while automating tests with Selenium. Next, you'll learn how to use Selenium WebDriver to add and delete cookies, execute tests in parallel, and handle stale element exceptions. Finally, you'll illustrate how to call cookies, parse results, and return the values of cookies with specific names using Selenium WebDriver.

COURSE_DESCRIPTION: A rendelkezésünkre álló időmennyiség állandó - nem vehetünk többet belőle és nem tehetjük félre, egy későbbi időpontra. Amit viszont megtehetünk, az a produktivitásunk növelése, vagyis azé az értéke, amit a rendelkezésünkre álló idő alatt megtermelünk. És minél jobban megértjük saját személyes produktivitásunkat, annál könnyebb lesz hatékonyan gazdálkodni az időnkkel. Ezen a tanfolyamon megtanulja oly módon kezelni a feladatait, hogy maximalizálni tudja a produktivitását. Fel fogja fedezni a célmeghatározás előnyeit, és azt, hogy a produktivitása hogyan kötődik az Ön időgazdálkodási és prioritizálási képességéhez. Elsjátítja az ideje "blokkokra osztásának" folyamatát, és a hatékony ütemezés alapelveit. Emellett tanulni fog a feladatlisták különböző fajtáiról és azok hatékony alkalmazásáról is.

COURSE_DESCRIPTION: Google Data Studio is a powerful tool that turns data into reports that ease decision-making and lead to better business outcomes. Google Data Studio is easy to use, free and works seamlessly with applications within and outside of the Google Marketing Suite. You can use Google Studio to connect and integrate data from 100's of applications including Facebook, Constant Contact, Google Ads, and more. You do not need an advanced background in data, statistics, or graphic arts to create meaningful reports that tell powerful data stories, improve understanding of complex situations, and allow users of all skill levels to analyze data. By the end of this project, you will learn how to create an account, how to navigate the platform, and how to create a custom click-thru dashboard! Together we will explore the basics of business data and visualization and you will surprise yourself with how easy it is to understand and use data. This course works best for learners who are based in the North American region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: The Budgeting Essentials and Development course focus on an integrative and practical view of concepts, methods, and techniques to develop a budget. After finishing this course, learners will be able to: - Develop the budget with a broad view of the corporate functions; - Integrate the strategic guidelines into the discussions of budgeting process; - Structure the budget planning and development in a logical sequence - Coordinate the project of budget planning with the different areas of the company - Actively promote assumptions discussions to improve the process of developing the budget - Apply financial concepts to support the budget planning process - Design a budget monitoring and control model to support the performance management - Evaluate the performance of the company by managing the results and the budget In this course, learners will have a deeper understanding of the budgeting process, its challenges, common issues, and approaches to mitigate the problems and improve the learning curve of budget planning. It is integrative by emphasizing the transition between the corporate strategy and the budget. It is practical by following a structured process of going through a framework that illustrates and demonstrates how to analyze, develop and control the budget.

COURSE_DESCRIPTION: When designing solutions, CloudOps practitioners need to mitigate typical performance issues. In this course, you'll explore some common performance problems and the systemic tuning approach to improving performance. You'll examine what comprises a performance engineering approach before outlining a practical performance tuning roadmap. Next, you'll identify post-deployment performance diagnostic techniques for large-scale software systems, essential steps when optimizing application performance, and functional and non-functional components and layers to consider when planning performance management. Moving on, you'll outline the steps involved in configuring performance testing and identify critical cloud computing KPIs and metrics. You'll investigate use cases that help identify gaps in hybrid and multi-cloud deployment architectures. You'll examine performance management challenges and recommended solution architecture for cloud-hosted services. Lastly, you'll outline how to measure private and hybrid cloud performance.

COURSE_DESCRIPTION: Learners can explore security planning methods and common security and data breach concerns in this 14-video course. Discover best practices for logging and monitoring data security breaches for full stack development, the OWASP best practices, and how to integrate security into the CI/CD pipeline. Key concepts covered in this course include security planning methods and common database security and data breach concerns; best practices for using DB logs to analyze for security and data breaches; and the OWASP security list and its benefits during software development and deployment. Learn how to incorporate data security testing into the CI/CD pipeline; learn the available data Functional Specification Document (FSD) platforms and strengths and weaknesses of each platform; and learn how to install and configure MySQL database locally. Next, learn how to secure a Microsoft SQL Server deployment; harden a local PostgreSQL installation; and secure a MongoDB Atlas cloud database deployment. Finally, learn to harden a deployment of Apache Cassandra; deploy and secure a SQL database on Azure; and create a MySQL instance and database using Google Cloud.

COURSE_DESCRIPTION: Cybersecurity professionals will often be tasked with studying breaches that have impacted other organizations to protect their own assets. This knowledge helps in identifying potential threats and understanding how threat actors operate in a modern environment. Begin this course by exploring the background of the Facebook data breach and how it was initially discovered. Then, explore how the data breach happened, and the method used to capture the data. Next, explore different tools that could be used to conduct a similar type of attack. Finally, examine the cybersecurity community's response to the breach and the fallout for Facebook from the event. On completing this course, you will have a better understanding of the Facebook data breach, how to conduct a similar attack, and how such a cybersecurity event can impact an organization.

COURSE_DESCRIPTION: This course goes beyond the basic features of Google Chat to help you use the app more efficiently. First, you will see how to find people, spaces, and messages thanks to Chat's powerful search feature. You will also see how to use keyboard shortcuts to control the app, as well as how to format text and insert emojis using Markdown. Next, discover tools for collaborating with colleagues. Learn how to share and create files and take advantage of spaces to work collaboratively on documents and tasks. Finally, the course explores different ways to enhance and personalize your experience in Google Chat. You will find out how it integrates with other Google tools, including Meet and Gmail, as well as with apps, a kind of add-on you can use to perform a wide variety of actions. You will also see how to change your status, configure notifications, and customize the appearance and other aspects of Google Chat.

COURSE_DESCRIPTION: Do you have a solid way to organize your schedule? With Google Calendar and Calendly you will have easy access to your schedule from anywhere and on all of your devices. In this project we will work on setting up your accounts and utilizing these tools to make your schedule flow better. When you use these applications together you will see that Calendly interacts with your Google Calendar so that you can seamlessly schedule meetings for times when you are available. We all need an easy button for more time in our busy lives and this is one of them! By the end of this project you will have that easy button as you are able to invite colleagues and those you want to meet with to use the calendar app to easily schedule a time with you. No more going back and forth comparing your schedules, it is super easy and will save you time. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: This course will focus on manipulating data and performing calculations using basic formulas in Google Sheets. First, discover how to manually select and use formulas in a cell, as well as get access to the full list of functions available in Google Sheets. You will also learn how to perform simple calculations and copy formulas to quickly fill out a table. Other functions will allow you to rank, count, and round values in a sheet. Google Sheets' functions are useful for manipulating text as well. For example, to replace specific characters or a text string. Finally, learn how to create formulas to generate random numbers and remove whitespace.

COURSE_DESCRIPTION: PowerApps give you the possibility to create apps from templates or create apps from scratch. Once you create an app, you will need to know how to navigate the editing interface to identify the key tools to manage your app. You can also use existing data from Excel or SharePoint to import your data and create apps easily within PowerApps. You can also configure app settings such as the auto-save feature or change how you app is displayed. The key concepts covered in this 10-video course include how to create an app from a template; how to create an app from an Excel workbook; and how to generate an app with SharePoint. Next, you will learn how to create a canvas app from scratch; how to access the app editing interface; and how to update and publish an app. Finally, observe how to restore and publish another version of your app; and learn to customize the settings of an app and to manage your apps.

COURSE_DESCRIPTION: A copy constructor in C++ classes is a specialized method used to create an object from another object of the same class. Other specialized C++ methods include nested classes and namespaces, which organize different classes in a logical and coherent manner while avoiding name conflicts. In this course, learn how to specify and use a copy constructor. Next, discover how classes and functions can be marked as friends. Finally, examine how nested classes can be defined and used in C++ and practice using namespaces to modularize your code. After completion of the course, you'll be able to create and implement a custom copy constructor, access private variables using friend functions and classes, and store functions and classes in namespaces.

COURSE_DESCRIPTION: We now live in a truly global, interconnected world in which every manager requires a high level of cultural intelligence. In a diverse work environment, a successful leader must understand the cultural backgrounds, beliefs and attitudes of the people around them - or run the risk of failing to achieve the organisation's goals. This course, via structured learning activities (video lectures, quizzes, discussion prompts, industry interviews and written assessments), will teach you that those with high 'cultural intelligence' - are good at spotting cultural differences and adapt their behaviour accordingly. You'll develop cultural intelligence and sensitivity - key future-focused capabilities required of every leader.

COURSE_DESCRIPTION: In this Skillsoft Aspire course on data science, learners can explore hypothesis testing, which finds wide applications in data science. This beginner-level, 10-video course builds upon previous coursework by introducing simple inferential statistics, called the backbone of data science, because they seek to posit and prove or disprove relationships within data. You will start by learning steps in simple hypothesis testing: the null and alternative hypotheses, s-statistic, and p-value, as each term is introduced and explained. Next, listen to an informative discussion of a specific family of hypothesis tests, the t-test. Then learn to describe their applications, and become familiar with how to use cases including linear regression. Learn about Gaussian distribution and the related concepts of correlation, which measures relationships between any two variables, and autocorrelation, a special form used in the concept of time-series analysis. In the closing exercise, review your knowledge by differentiating between the null and the alternative hypotheses in a hypothesis testing procedure, then enumerating four distinct uses for different types of t-tests.

COURSE_DESCRIPTION: sqlmap is an open-source penetration testing tool used to help security professionals automate the detection and exploitation of SQL injection vulnerabilities in web applications. It fully supports a broad range of databases and six SQL injection techniques. Through this course, learn how sqlmap works with common databases and helps automate common SQL injection techniques. Explore common sqlmap use cases and how to access, download, and install sqlmap. Next, discover the program's dependencies, including its various Python libraries. Finally, learn how to use sqlmap and Burp for database enumeration and dumping and bypass admin logins using sqlmap and SQL injections techniques. Upon completion, you'll be able to use sqlmap for SQL injection testing.

COURSE_DESCRIPTION: While defensive design involves planning for contingencies that might occur in a software development life cycle, defensive programming entails writing code such that it continues to function predictably in the presence of unforeseen circumstances. Through this course, explore the role of defensive programming and defensive design and the implementation of a defensive barrier in your code. You'll investigate various error reporting techniques, recognize scenarios for implementing a technique rather than exceptions, and distinguish between using exceptions and assertions to raise errors. The course will also help you discover how to use preconditions to check for inputs to your code and postconditions to verify the final results returned by your code. At the end of this course, you will have the skills and ability to follow a defensive approach to your software development and use exceptions and assertions to flag preconditions and check for postconditions.

COURSE_DESCRIPTION: Gain an advanced knowledge of cryptographic systems, life cycles, techniques, and methodologies. This course introduces you to cryptography and cryptographic systems. It then examines integrity and hashing in relation to cryptography, explores cryptographic methods and techniques, and discusses the nature of cryptanalytic attacks. You will then learn about the phases of the cryptographic life cycle, digital signatures, and the use and function of public key infrastructure (PKI). From there, you will go on to consider key management practices, such as key stretching, pinning, key escrow, and hardware security modules (HSM). Finally, as a review exercise, you will list three types of ciphers, three types of cryptographic hashing, and three different hashing algorithms.

COURSE_DESCRIPTION: This 13-video course explores data protection for businesses, including devices, social media, and good governance through security principles, policies, and programs. You will examine several types of security threats, the different types of network attacks, the role physical security plays in the protection of corporate data, and the human element of security threats. Next, learners examine the attack surface, including the total combined nodes, users, devices, and any entry points of software, a network, and a business environment. You will examine threats, vulnerabilities, and risks, and learn the importance of network hardening. This course uses real-world examples of several top security threats to businesses today, including malware, social engineering, unpatched software, BYOD (bring your own device), and IoT (Internet of things). You will examine clickjacking and URL spoofing. Finally, this course discusses the legal and financial ramifications of a major security breach, the importance of having a security policy, training personnel, password protection, and managing a company's security.

COURSE_DESCRIPTION: Microsoft Defender offers security services for monitoring and mitigating malware for on-premises and cloud services. Azure Sentinel provides central data ingestion information and event management (SIEM) solution. In this course, you will use Azure Sentinel and Microsoft Defender for Cloud to protect Azure resources. First you will review Defender protection solutions. Next, you will configure Defender to protect Azure and AWS virtual machines. Then, you will evaluate security scanning results. Lastly, you will use the Sentinel services as a central cloud-based SIEM solution to detect security incidents and ensure Azure virtual machines (VMs) have updates applied. This course can be used to prepare for exam AZ-500, Microsoft Azure Security Technologies.

COURSE_DESCRIPTION: Sie haben die Fähigkeit, Ihre aktuelle Balance von Beruf und Privatleben zu bewerten und interne und externe Hindernisse zu überwinden, um eine ausgewogene Balance zu erreichen. Sie kennen Ihre Ausgangssituation und Ihr Ziel, aber was nun? Wie erreichen und bewahren Sie diese Ausgewogenheit? Wie wird sie von äußeren Faktoren und Verhaltensweisen beeinflusst? Dieser Kurs legt den Schwerpunkt auf Techniken zur Bewahrung der Work-Life-Balance. Dazu zählt das Erkennen von passiven, aggressiven und selbstsicheren Verhaltensweisen und wie sie sich auf die Fähigkeit auswirken, die Balance im Leben herzustellen. Zudem werden Techniken diskutiert, mit denen die Balance erreicht und bewahrt werden kann. Materialien, die entwickelt wurden, um Blended-Learning-Aktivitäten in Zusammenhang mit diesem Kurs zu unterstützen, stehen auf der Seite Ressourcen zur Verfügung.

COURSE_DESCRIPTION: Je besser Sie DAX in Power BI beherrschen, desto besser werden die Erkenntnisse und Berichte, die Sie aus den Daten erhalten. Der Filterkontext ist ein DAX-Konzept, das man kennen muss. In diesem Kurs sammeln Sie praktische Erfahrungen mit diesem Aspekt von Power BI. Sie beginnen mit einer Einführung in die Beziehungen zwischen den Tabellen in Power BI. Anschließend befassen Sie sich mit der Funktion "CALCULATE". Danach werden Sie erfahren, wie ein Filterkontext zum Verweisen auf eine Teilmenge der Gesamtdaten eingesetzt werden kann, und wie man Operationen innerhalb dieses Filterkontexts durchführt. Weiter geht es mit einer ganzen Reihe von Optionen, um bestimmte Anwendungsfälle mithilfe von Filterkontexten zu ignorieren. Zum Schluss sind Sie in der Lage, mit DAX-Funktionen Operationen auf einer Teilmenge von Daten durchzuführen. Außerdem sind Sie damit besser auf die Zertifizierungsprüfung PL-300: Datenanalyse mit Microsoft Power BI vorbereitet.

COURSE_DESCRIPTION: Web application security is an essential skill for any software development. OWASP Top 10 is a standard awareness document for developers and web application security. It represents a broad consensus that is used to raise awareness to developers, designers, architects, managers, and organizations about the consequences of OWASP Top 10 most common and most important web application security weaknesses. Organizations that address these flaws greatly reduce the risk of web applications being compromised, and in this Skillsoft Aspire journey we will help learners understand the risks associated with the OWASP Top 10. We will review each of the OWASP Top 10 items and discuss how to discover and exploit web app vulnerabilities. Having OWASP Top 10 awareness across all parts of the organization will go a long way in building secure applications across the entire organization.

COURSE_DESCRIPTION: The network infrastructure in the Azure cloud must be planned in much the same way on-premises networks are planned - the number of networks and subnets, DNS name resolution, IP address ranges, and network routing. Begin this course by reviewing a variety of Azure networking solutions and determining when they should be used. Then, create a cloud-hosted DNS zone using the Azure portal, the CLI and PowerShell. Discover how to configure custom DNS settings for Azure VNet. Next, use the Azure portal, the CLI, and PowerShell to create VNets and subnets. Finally, configure route table resources to control network traffic flow using the Azure portal, the CLI, and PowerShell. This course can be used to prepare for exam AZ-900, Microsoft Azure Fundamentals.

COURSE_DESCRIPTION: To mitigate cyber, data, cloud, and information security risks, you need solid knowledge of the complete network security process, from network design to continuous monitoring and logging. In this course, you'll explore some vital network security concepts and standard techniques for mitigating security risks. You'll start by examining the potential vulnerabilities in a network and how these turn into threats. You'll then explore the decisions you need to make to secure the network infrastructure. Next, you'll investigate different network zones and tools used for monitoring, detection, and logging. You'll finish by outlining a secure network design's characteristics and the recommended guidelines and best practices for network security. On completion of this course, you'll be able to plan for network and infrastructure-related security risks using recommended tools, methods, and best practices.

COURSE_DESCRIPTION: The digital advertising landscape is complex. There are many different types of ads, including: display, video, audio, sponsored, native, social media and search. Consumer data and the ad tech that action on that data are both ubiquitous and complicated. As a result the sheer number of options available to digital marketers is hard to comprehend and manage. This course covers the major forms of digital advertising, from basic display ads to search to cutting-edge programmatic advertising concepts. The Trade Desk, the leading programmatic advertising provider, joins us as our programmatic experts and offers an actionable roadmap on how small businesses can leverage state of the art advertising technologies to accomplish business objectives. In all, this course leaves students with an understanding of digital advertising in its various forms, and how to strategically identify digital advertising opportunities.

COURSE_DESCRIPTION: Your organization depends on its ability to win every customer interaction. User personas - detailed descriptions of archetypal end users - are the gateway to designing customer-centric products and experiences that address customer needs. Building user personas will help you develop products and services your customers truly want. In this course, you'll learn the essential elements of user personas and the business information to be gained from them. You'll also learn how to build a user persona, which data to include in a persona, and the qualities of an effective persona. And you'll discover what customer-centric design can tell you about your customer, and how it will benefit your business.

COURSE_DESCRIPTION: Associative containers provide fast lookup in $O(\log n)$ time by associating each entry with a key. Sets and maps are both associative containers. Algorithms are classes that support container-agnostic operations performed on containers. In this course, learn how to create sets and iterate over them, as well as use ordered and unordered multisets. Next, practice creating maps and indexing into them using keys, as well as inserting key-value pairs into maps. Finally, examine how random access of elements is faster with unordered maps compared to ordered maps, and explore various STL algorithms. Upon completion, you'll be able to differentiate between sequence and associative containers, leverage STL algorithms, and instantiate and use sets, multisets, maps, and multimap.

COURSE_DESCRIPTION: This course will be focusing on the competitive Esport team and individual professional players. Whether you are playing on a team or competing as an individual, you will find that being a professional Esports player is more complex and nuanced than most people realize. We will be talking a lot about the support staff surrounding players, the intricacy of navigating contracts, and the hardships of committing yourself to professional play. We will also be talking about the Esports media. Similar to sports, Esports has developed its own unique ecosystem of articles, videos, streaming, social media, and overall content creation. We will examine the specifics of different types of media and explain how each has its uses in making Esports more popular as a whole.

COURSE_DESCRIPTION: WebLOAD offers various solutions to load test websites, Java, and .NET. During this course, you will explore these techniques, as well as other solutions such as CRM, ERP, Selenium, and Ellucian. You'll start by learning to use WebLOAD's built-in features to connect to SQL Server and perform database commands. Next, perform load tests and reports on SQL Server. From there you will learn how to use built-in features, such as FTP and TCP/IP, and conduct SOAP load tests. Other topics include the following: how to operate built-in commands, such as GET, POST, PUT, DELETE, HEAD, and OPTIONS; how to use scripts and the WebLOAD API; how to run and analyze Selenium scripts, and continuous integration (CI) performance tests. Connect to MS Access via the JET Engine. Use WebLOAD for Ellucian to test campus management platforms. Finally, as a review, you will learn how to implement WebLOAD solutions.

COURSE_DESCRIPTION: Die moderne Geschäftswelt ist international. Egal, in welcher Branche oder welchem Sektor Sie tätig sind, begegnen Ihnen höchstwahrscheinlich Menschen aus anderen Ländern und Kulturen. Und weil jedes Geschäft Kommunikation erfordern, sind gute interkulturelle Kommunikationsfähigkeiten unerlässlich. Für viele Menschen ist es bereits eine Herausforderung, in der eigenen Kultur und Sprache effektiv zu kommunizieren. Im Austausch mit Menschen anderer Kulturen sind die Kommunikationshürden entsprechend größer. In diesem Kurs erkunden wir zwei zentrale kulturelle Dimensionen, die Unterschiede in der Kommunikation hervorrufen, und beleuchten zentrale Begriffe, die Ihnen eine Beschreibung unterschiedlicher Kommunikationsstile ermöglichen. Und Sie lernen, wie Sie Hürden der interkulturellen Kommunikation erkennen und meistern.

COURSE_DESCRIPTION: Positioning is the heart of any Marketing Strategy, the core that you must get right. It does not matter whether you start with a clearly defined target group or with a differential value proposition: you will need end up with a clear segment or segments upon which we build our Marketing Plan. In this course - the second in our Marketing Strategy Specialization - IE professor Ignacio Gafo will guide you through the essential stages of this key marketing process, starting with the basic elements that you will require and deciding on the market segmentation and marketing. The course progresses to examine the key market trends that you will encounter and will provide you with a handy practical toolbox of skills. The course features interviews with industry professionals as well as on location videos where we quiz members of the public on their attitude towards this key concept. After this course you will be in no doubt of where to position your product and which segment you are going to attempt to attract.

COURSE_DESCRIPTION: This is the fourth course in the IBM AI Enterprise Workflow Certification specialization. You are STRONGLY encouraged to complete these courses in order as they are not individual independent courses, but part of a workflow where each course builds on the previous ones. Course 4 covers the next stage of the workflow, setting up models and their associated data pipelines for a hypothetical streaming media company. The first topic covers the complex topic of evaluation metrics, where you will learn best practices for a number of different metrics including regression metrics, classification metrics, and multi-class metrics, which you will use to select the best model for your business challenge. The next topics cover best practices for different types of models including linear models, tree-based models, and neural networks. Out-of-the-box Watson models for natural language understanding and visual recognition will be used. There will be case studies focusing on natural language processing and on image analysis to provide realistic context for the model pipelines. By the end of this course you will be able to: Discuss common regression, classification, and multilabel classification metrics Explain the use of linear and logistic regression in supervised learning applications Describe common strategies for grid searching and cross-validation Employ evaluation metrics to select models for production use Explain the use of tree-based algorithms in supervised learning applications Explain the use of Neural Networks in supervised learning applications Discuss the major variants of neural networks and recent advances Create a neural net model in Tensorflow Create and test an instance of Watson Visual Recognition Create and test an instance of Watson NLU Who should take this course? This course targets existing data science practitioners that have expertise building machine learning models, who want to deepen their skills on building and deploying AI in large enterprises. If you are an aspiring Data Scientist, this course is NOT for you as you need real world expertise to benefit from the content of these courses. What skills should you have? It is assumed that you have completed Courses 1 through 3 of the IBM AI Enterprise Workflow specialization and you have a solid understanding of the following topics prior to starting this course: Fundamental understanding of Linear Algebra; Understand sampling, probability theory, and probability distributions; Knowledge of descriptive and inferential statistical concepts; General understanding of machine learning techniques and best practices; Practiced understanding of Python and the packages commonly used in data science: NumPy, Pandas, matplotlib, scikit-learn; Familiarity with IBM Watson Studio; Familiarity with the design thinking process.

COURSE_DESCRIPTION: Python classes act like blueprints for establishing a new type of object with its own set of properties and methods. In this course, you'll learn how to define and instantiate classes in Python. You'll start by using the init() method to initialize your class's member variables and the self keyword to reference a class's current instance. You'll then illustrate the differences between the self keyword in Python and the "this" keyword in Java. Next, you'll examine how errors in Python can be handled using the try-except-finally block and how the error handling mechanism in Python is similar to Java exception handling. Finally, you'll import other Python libraries into your current Python program, using classes and functions defined in one Python file in another file using the import statement. When you're finished with this course, you'll be able to set up Python classes for various uses in your development projects.

COURSE_DESCRIPTION: Mentoring-Beziehungen sind der Schlüssel für den Unternehmenserfolg. Wenn Mentoren ihre Erkenntnisse und Erfahrungen mit Mentees teilen, stärkt dies das Unternehmen und erhöht die Chance auf anhaltenden Erfolg. Ein gutes Mentoring ist im heutigen komplizierten Umfeld, das von Volatilität, Unsicherheit, Komplexität und Unklarheiten geprägt ist, besonders wichtig. In diesem Kurs lernen Sie, was Sie von einer Mentoring-Beziehung erwarten dürfen und wie Sie die wichtigsten Merkmale eines Mentors identifizieren. Darüber hinaus erfahren Sie, wie Sie eine produktive Mentor-Mentee-Beziehung fördern, und lernen Best Practices für erfolgreiche Mentoring-Beziehungen kennen.

COURSE_DESCRIPTION: For most organizations, processing large amounts of data is an essential task. However, it's often done using unoptimized and difficult-to-maintain solutions. Spring Batch rectifies these constraints, making batch processing a lot more efficient. Use this course as both a theoretical and practical introduction to Spring Batch. After a theoretical overview, learn how to build a batch process to transform CSV data to XML. In doing this, set up an ItemReader to read from a CSV file, an ItemProcessor to transform the data, and an ItemWriter to write the data to an XML file. When you've completed this course, you'll be able to identify how Spring Batch addresses the common limitations of batch processing and set up and run a Spring Batch application.

COURSE_DESCRIPTION: This Bootcamp provides Project Managers with the knowledge and skills needed to attain the Project Management Professional (PMP) certification. This course meets the 35-hour classroom requirement for the PMP(r) Exam. Live attendance is mandatory for those taking the PMP exam. Classes are taught by badged Authorized Training Provider (ATP) instructors. In addition to the 35 classroom hours, students will receive access to a practice exam simulator and mentors who are available to provide guidance and answer questions about the PMP(r) curriculum. Target Audience: This course is designed for individuals who have on-the-job project management experience regardless of whether their formal job title is project manager, who would like to validate their experience with a formal project management certification. Required Learner Kit: All participants in Skillsoft's ATP-authorized PMP Bootcamps who intend to sit for the PMP exam are required to have a PMP Learner Kit prior to submitting their PMP application. For more information check with your training staff or HR Department. If you have an individual subscription to Percipio and your training is not part of an organization, you may need to purchase your own learner kit. Instructions will be provided in class. Before you attend: Before you attend this class, please visit the Project Management Institute (PMI) website at pmi.org to learn more about the Project Management Professional (PMP) certification, including prerequisites, exam costs, and the application process. Learning Objectives: In this course, you will learn how to build and manage a team, and to plan, execute, and complete a project that is aligned to the business environment. You will learn the tools and techniques to:
- Create a high-performing team - Plan and manage the project - Execute and assess the project work - Keep the team on track - Keep the business environment in mind

COURSE_DESCRIPTION: You will focus primarily on actual common software attacks in this 21-video course, which means you will be shown how the SQL format string attack affects your programs and coding mistakes that make software vulnerable to them. In some of these examples, learners will examine the vulnerable code and learn how to correct it. In other examples, learners will explore how someone carries out the attack, which will help lead one to learn how to defend against it. Begin by learning how to code against format string attacks in Java, in Python, and in C#. Then move on to coding against SQL injection attacks in Java, in Python, in C#, and in Javascript. Next, explore coding against buffer overflow attacks in Java, in Python, in C#, and in Javascript. Further tutorials examine how to code against cross-site scripting attacks in Java, in Python, in C#, and in Javascript. Also, learn how to code against password cracking attacks in Java, in Python, in C#, and in Javascript.

COURSE_DESCRIPTION: In this 19-video course, learners will discover how to orchestrate technologies making up the MEAN (MongoDB, Express, Angular, and Node) stack to create a basic authentication application based on Javascript. Begin by examining key considerations followed when planning a MEAN application, and learn how to prepare the environment by installing Node, Express, and dependencies for full-stack Angular application for full stack development. Then learn how to create a new project with Angular CLI (command-line interface); add Angular Material design components; and create a working mock-up with Angular components and templates. Next, watch how to add a Node in Express backend server, build an API (application programming interface) route with Express, and validate request body payloads. Learn to configure JWT (JSON Web Token) authentication, use middleware in a MEAN application, create and execute unit tests, and learn how to handle errors. Next, see how to create a MongoDB Atlas account; connect MongoDB with Mongoose; and use a MongoDB and Mongoose to build data models. Finally, learn to prepare and deploy a MEAN application to Heroku Cloud-based platform-as-a-service.

COURSE_DESCRIPTION: To effectively work with graphs in your daily software engineering operations, you need to expand your knowledge beyond a basic familiarity. To do this, you need to identify which algorithms are used for which tasks and how to implement these algorithms using the Java programming language. In this course, you'll identify how graph nodes can be sorted using the topological sort algorithm, which has many real-life applications, such as course scheduling, as well as modeling tasks and dependencies. Next, you'll explore shortest path algorithms, which are used in mapping applications. You'll move on to identify and implement the shortest path in an unweighted graph. Finally, you'll implement Dijkstra's algorithm to find the shortest path in a weighted graph.

COURSE_DESCRIPTION: The digital economy is revolutionizing the world of work. To stay relevant, individuals across all industries need to be open to continuous learning and developing talent. Through organizational learning, you can start developing employees by ensuring they are learning the necessary skills. In this course, you'll learn some of the key ways in which the world of work is changing and the skills that are in high demand. You'll also explore ways to choose what to learn in order to keep your skill set current, as well as develop people and encourage self-development. And you'll also explore strategies to help advance your career in the digital economy.

COURSE_DESCRIPTION: Anomaly detection can be a critical part of almost any business and can be used for fraud detection, identifying failures, and noticing unusual patterns in logs, records, or any time series based data. In this course, you'll learn the purpose and uses for anomaly detection and how AI anomaly detection can be used to identify unusual patterns, failures, and fraud. You'll then learn about the challenges of detecting anomalies in real world situations and how AI-based anomaly detection can be used to mitigate those challenges. Finally, you'll learn how to build, configure, deploy, and test the Azure Anomaly Detection service to create anomaly detection services you can use in real world scenarios. This course is one of a collection that prepares learners for the Microsoft Azure AI Fundamentals (AI-900) exam.

COURSE_DESCRIPTION: Data, when coming in from a source en masse, is rarely structured the way that data analysts would like it to be. When you consider the multitude of sources that data comes from, it would be highly unrealistic to assume that you could take a tranche of data and begin working with it without some sort of processing to make it more useful. In this course, you will explore data acquisition and cleansing, beginning with data integration and data integration tools, focusing on the roles and characteristics of the extract, transform, load (ETL) and extract, load, transform (ELT) processes. Then you will examine tools and methods such as delta load and data acquisition application programming interfaces (APIs). Next, you will learn how to clean datasets and investigate common data issues, including data redundancy, missing values, non-parametric data, and outliers. Finally, you will take a look at key characteristics of data type validation. This course can be used to prepare for CompTIA Data+ (DA0-001) exam.

COURSE_DESCRIPTION: In this 2-hour long guided project, we will use a ResNet-18 model and train it on a COVID-19 Radiography dataset. This dataset has nearly 3000 Chest X-Ray scans which are categorized in three classes - Normal, Viral Pneumonia and COVID-19. Our objective in this project is to create an image classification model that can predict Chest X-Ray scans that belong to one of the three classes with a reasonably high accuracy. Please note that this dataset, and the model that we train in the project, can not be used to diagnose COVID-19 or Viral Pneumonia. We are only using this data for educational purpose. Before you attempt this project, you should be familiar with programming in Python. You should also have a theoretical understanding of Convolutional Neural Networks, and optimization techniques such as gradient descent. This is a hands on, practical project that focuses primarily on implementation, and not on the theory behind Convolutional Neural Networks. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

 COURSE_DESCRIPTION: In this 2-hour long project-based course, you will learn to create Amazon Aurora Database and will connect to the database using MySQL Workbench. You will create VPC(Virtual Private Network), Subnets and will setup routing using Route Table. You will also create EC2 instance which will act as Bastion Host. By the end of this project you will create your first Amazon Aurora Database and will connect via EC2 instance using MySQL workbench. You will also learn about best practices used to access database. After completing this training, you will be able to provision Amazon Aurora Database and will be able to access it securely using EC2 as Bastion Host. Please note: You will need an AWS account to complete this project. All the resources used in this project comes under AWS free-tier

 COURSE_DESCRIPTION: In this Challenge Lab, you will configure a highly available MySQL database in an Amazon RDS DB instance to store data for a customer-facing website. First, you will create security groups to control access to the database servers, and then you will create subnet groups for the database servers in each region. Next, you will create a MySQL Amazon RDS DB instance, and then you will create an Amazon Elastic Compute Cloud (Amazon EC2) instance that runs a PHP website to connect to the database server. Finally, you will create a read replica of the database in another region for disaster recovery, then you will create a web server in the second region to test access to the read replica. Note: Once you begin the Challenge Lab, you will not be able to pause, save, or exit and then return to your Challenge Lab. Please ensure that you have set aside enough time to complete the Challenge Lab before you start.

COURSE_DESCRIPTION: Delivering applications requires an understanding of the underlying infrastructure components. It also requires support for managed services that public cloud providers offer. Through this course, learn about common components of cloud services and how to deploy them using different methods. Discover key identity management services used to secure access to the cloud and explore virtual machine compute services. Next, learn how to deploy containerized microservices and build event-driven serverless solutions. Finally, examine cloud storage options, virtual networking features for connecting on-premises environments to the cloud, cloud infrastructure deployment management, and big data and analytics services. Upon completion, you'll be able to outline and deploy cloud components.

COURSE_DESCRIPTION: Die Elemente des traditionellen Marketing-Mixes bilden wichtige strategische Eckpfeiler jeder Marketingaktivität. Dieser traditionelle Marketing-Mix umfasst jedoch nicht zwei sehr wichtige Aspekte des Marketings: Planung und Personen. In diesem Kurs lernen Sie etwas über die Bedeutung der Verbindung von Marketingaktivitäten mit den allgemeinen strategischen Zielen eines Unternehmens und über den Unterschied zwischen strategischem und taktischem Marketing. Sie lernen auch die wichtigsten Planungsaktivitäten kennen: Marktforschung, Budgetierung, Entwicklung und Ausführung sowie Evaluierung. Zum Schluss werden auch die Bedeutung des Einsatzes der Mitarbeiter und die interne Markenbildung sowie die Kernaspekte des Personenelements besprochen.

COURSE_DESCRIPTION: This course provides you with an understanding of what Enterprise Systems (also commonly termed as Enterprise Resource Planning Systems, ERPs) are. After learning about what these systems are, we would touch upon why these systems are useful to companies, through which you would get to see the various jobs and positions that are associated with the use and deployment of ERPs. In this course, you would also develop an appreciation of the managerial aspects related to the selection and implementation of ERPs. Specifically, we would touch on the important points to consider when shortlisting and purchasing an ERP, the approaches taken in ERP implementation, and change management techniques to utilize when an organization is undergoing ERP implementation. At the end of this class, you will be endowed with practical knowledge that would help you to address real world business problems associated with ERP usage and implementation.

COURSE_DESCRIPTION: This course provides the essential skills and knowledge that you will need as a supervisor to develop goals and objectives and plans to achieve them, solve problems and make effective decisions, and obtain the best possible people to staff the organization. At its conclusion, you will be able to: • Utilize a systematic approach to make decisions and solve problems. • Apply ethical codes and standards to make decisions that are good for both the organization and society. • Create plans by applying appropriate planning tools and setting SMART goals and objectives. • Identify elements of typical organizational structures. • Describe how to utilize groups and teams for maximum effectiveness and efficiency. • Describe and apply best practices for hiring, training and evaluating employees. Most importantly, you will be able to apply this knowledge immediately to be a more effective, efficient supervisor. If you want to become or are currently working as a supervisor, this course is made for you. You do not need to have management or supervisory. If you have a high school diploma or its equivalent and a few years of work experience, you are qualified for this course. There are no prerequisites for this course, and you do not need any special software.

COURSE_DESCRIPTION: System Validation is the field that studies the fundamentals of system communication and information processing. It is the next logical step in computer science and improving software development in general. It allows automated analysis based on behavioural models of a system to see if a system works correctly. We want to guarantee that the systems does exactly what it is supposed to do. The techniques put forward in system validation allow to prove the absence of errors. It allows to design embedded system behaviour that is structurally sound and as a side effect enforces you to make the behaviour simple and insightful. This means that the systems are not only behaving correctly, but are also much easier to maintain and adapt. 'Model process behaviour' is the follow up MOOC to 'Automata and behavioural equivalences'. This MOOC shows you how to model process behaviour, in particular protocols and distributed algorithms, dive deeper in the properties of system behaviour, and keep things simple to avoid a state space explosion. Reading material. J.F. Groote and M.R. Mousavi. Modeling and analysis of communicating systems. The MIT Press, 2014. This course is part 2 of the set of courses for System Validation. System Validation, as a set of courses, is part of a larger EIT Digital online programme called 'Internet of Things through Embedded Systems'.

COURSE_DESCRIPTION: Reinforcement Learning is a subfield of Machine Learning, but is also a general purpose formalism for automated decision-making and AI. This course introduces you to statistical learning techniques where an agent explicitly takes actions and interacts with the world. Understanding the importance and challenges of learning agents that make decisions is of vital importance today, with more and more companies interested in interactive agents and intelligent decision-making. This course introduces you to the fundamentals of Reinforcement Learning. When you finish this course, you will: - Formalize problems as Markov Decision Processes - Understand basic exploration methods and the exploration/exploitation tradeoff - Understand value functions, as a general-purpose tool for optimal decision-making - Know how to implement dynamic programming as an efficient solution approach to an industrial control problem This course teaches you the key concepts of Reinforcement Learning, underlying classic and modern algorithms in RL. After completing this course, you will be able to start using RL for real problems, where you have or can specify the MDP. This is the first course of the Reinforcement Learning Specialization.

COURSE_DESCRIPTION: Von einem Leben ohne Konflikte kann man nur träumen. Denn die Realität sieht anders aus. Für jeden von uns ist ein Konflikt am Arbeitsplatz leider unvermeidbar. Es gibt unzählige Gründe, aus denen persönliche und berufliche Konflikte unterschiedlichster Art entstehen. Die Konfliktlösung ist daher eine notwendige Kompetenz. Im Geschäftsalltag müssen wir wissen, wie wir mit Konflikten umgehen und Konfliktsituationen bewältigen können. In diesem Kurs erfahren Sie, wie Sie die Quellen und Anzeichen von Konflikten erkennen. Außerdem lernen Sie mögliche Strategien zum Konfliktmanagement und Verfahren zur Konfliktlösung kennen. Darüber hinaus behandelt dieser Kurs Methoden für den Umgang mit schwierigen Personen und gibt Empfehlungen, wie das Konfliktmanagement auf Kurs gehalten wird, wenn Schwierigkeiten auftreten.

COURSE_DESCRIPTION: Preparation for the Amazon Web Services (AWS) Certified Solutions Architect-Associate (SAA-C02) certification exam continues with this 18-video course. In this course, participants explore AWS Identity and Access Management (IAM), including how to use roles, policies, and multifactor authentication (MFA) to secure accounts and how to use the AWS Directory Service. You will examine the role of IAM in the cloud and how to use the graphical user interface (GUI), the command-line interface (CLI), and PowerShell to manage IAM users. Watch demonstrations of configuring the AWS user password policy and perform an AWS IAM user sign-in. Then learn how to manage IAM groups by using the GUI, CLI, and PowerShell, and how to configure both IAM policies and groups. Examine how MFA can enhance user sign-in security, then learn how to enable MFA for the AWS root account. The course concludes with a study of the AWS Directory Service; how to join an EC2 (Elastic Compute Cloud) instance to AWS Directory Service; and how to create users and groups within an AWS Directory Service.

COURSE_DESCRIPTION: Auf den wettbewerbsintensiven Märkten ist es heute wichtiger als je zuvor, zu wissen, wie Produkte entwickelt, deren Absatz gefördert und wie Produkte und Services erfolgreich verkauft werden. Der Marketing-Mix besteht aus einer Reihe von Elementen, die den Kundenbedürfnissen und den Unternehmenszielen dienen. In diesem Kurs machen Sie sich mit mehreren Elementen des Produkts, der Preisgestaltung und Absatzförderung im Marketing-Mix vertraut: Produkt, Preis und Absatzförderung. Sie lernen, wie das Marketing zur Entwicklung neuer Produkte beiträgt und welche Ziele es in den einzelnen Phasen des Produktlebenszyklus verfolgt. Außerdem erfahren Sie mehr über die Preisgestaltung, einschließlich der Herangehensweisen an die Produktpreisgestaltung und die Faktoren, die sie beeinflussen. Schließlich machen Sie sich mit den Techniken der Absatzförderung vertraut, unter anderem mit dem traditionellen Marketing und dem Online-Marketing.

COURSE_DESCRIPTION: SharePoint allows teams to work collectively to achieve better efficiency. In this 11-video course, recorded in a SharePoint Online environment, learners can explore team sites, and discover how to add features, create site and Web Part pages, add content, customize site headers, edit links and use the Recycle Bin. Begin the course by learning how to create a team site, which is a useful way of centralizing your work and encouraging collaboration between team members. Explore how to edit a team site, manage site information and content. Learn how to identify and use site pages. Create a news post, so you can publish news to your team site; add features, or create a wiki page. Also create a Web Part page, which combines apps, different content types, and pooled data. Learn how to add content to your site; customize a site header or image, and edit site links. The course concludes by showing learners how to use the team site Recycle Bin.

COURSE_DESCRIPTION: In this challenge, you will implement Hyper-V on Windows Server 2019. First, you will add the Hyper-V role to a Windows Server 2019 computer, and then you will create a Hyper-V virtual private switch. Next, you will create a Hyper-V virtual hard disk, and then you will deploy a Hyper-V virtual machine. Finally, you will manage the Hyper-V virtual machine by using Windows Admin Center. Note: Once you begin a challenge you will not be able to pause, save, or return to your progress. Please ensure you have set aside enough time to complete the challenge before you start.

COURSE_DESCRIPTION: This is the 3rd Guided Project in the "Programming for Everyone" series. In this Guided Project, we will learn how to work with data. Specifically, we will learn how to organize data in data frames and use the "dplyr" package to process data. We will also learn how Shiny lays out the UI for Web Apps. We will put this knowledge to use to enhance the Shiny app that we created in the 2nd Guided Project. Specifically we will add the ability to support multiple cities. This Guided Project was created by a Coursera community member.

COURSE_DESCRIPTION: With Google Slides, you can create and present professional presentations for sales, projects, training modules, and much more. Google Slides presentations are stored safely in the cloud. You build presentations right in your web browser-no special software is required. Even better, multiple people can work on your slides at the same time, you can see people's changes as they make them, and every change is automatically saved. You will learn how to open Google Slides, create a blank presentation, and create a presentation from a template. You will explore themes, layout options, and how to add and format content, and speaker notes in your presentations. You will learn how to enhance your slides by adding tables, images, charts, and more. You will also learn how to use slide transitions and object animations in your presentation for visual effects. We will discuss how to organize slides and explore some of the options, including duplicating and ordering your slides, importing existing slides, copying slides, and hiding slides. You will learn how to share your presentation with others and will also learn about collaborator permissions, tracking changes, and version management. Google Slides offers many features that make team collaboration easy. You will learn how to collaborate with your team using comments and action items. Presenting your slides is the ultimate goal so you will learn how to present your slides to others and explore the presentation tools available.

COURSE_DESCRIPTION: A Site Reliability Engineer (SRE) must know how to perform load balancing within the data center, both internally and externally. In this course, you'll learn about load balancing, including various methods for balancing loads in the data center. You'll begin by examining what data center load balancing is and its importance to performance, as well as load balancing policies. You'll then learn how to deal with unhealthy tasks using flow control, and tips and tricks for optimizing load balancing. Next, you'll examine methods for limiting connection pools with subsetting, and the various load balancing components. Lastly, you'll learn how to balance loads internally and externally using HTTPS and TCP/UDP, and how to balance loads using SSL and TCP proxy load balancing.

COURSE_DESCRIPTION: A directory service is a central repository of network configuration items, such as user accounts. AWS provides a variety of directory service options to meet customer needs, including identify federation. In this course, compare authentication to authorization and discover how they relate to AWS resource access. Then, explore AWS-specific directory service options and join an Elastic Compute Cloud (EC2) instance to an AWS directory service. Next, create AWS Managed Active Directory (AD) user and group accounts. Finally, deploy Simple AD and examine how identify federation provides a central trusted identity provider for applications. This course can be used to prepare for exam SAP-C02, AWS Certified Solutions Architect - Professional.

COURSE_DESCRIPTION: In this 2-hour long guided project, we are going to create a recurrent neural network and train it on a tweet emotion dataset to learn to recognize emotions in tweets. The dataset has thousands of tweets each classified in one of 6 emotions. This is a multi class classification problem in the natural language processing domain. We will be using TensorFlow as our machine learning framework. You will need prior programming experience in Python. This is a practical, hands on guided project for learners who already have theoretical understanding of Neural Networks, recurrent neural networks, and optimization algorithms like gradient descent but want to understand how to use the Tensorflow to start performing natural language processing tasks like text classification. You should also have some basic familiarity with TensorFlow. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Logging is used to record events that occur within an organization's systems and networks. Oftentimes, logging information can help with the identification and isolation of any intruder or malware. In this course, explore acceptable use policies (AUP) and how they apply to employee monitoring. Discover how monitoring as a service can benefit an organization, and explore devices that can be monitored on a network including routers, switches, laptops, and wireless access points. Explore how retention policies can identify how long different types of data are maintained and discover when to implement a centralized enterprise logging service. Lastly, explore how keystroke loggers can capture and track what is typed on a keyboard and learn the importance of protecting log information. This course was originally created by Global Knowledge (GK).

COURSE_DESCRIPTION: Learners can examine processes of creating and managing Azure resource groups, limits, and quotas in this 16-video course, preparation for the Microsoft Azure Administrator (AZ-103) exam. Begin by taking a look at the Azure Resource Manager and benefits it provides. Next, create a management group using all methods-Azure Portal, PowerShell, and CLI (command-line interface-and then create a source group at the subscription level. Learn how to manage Azure resource groups using the Azure Portal, Azure PowerShell, and Azure CLI. Discover how to remove Azure resource groups, move them, and move Azure resources across resource groups and identify the limitations. Organize Azure resources by using tags, and add and configure an Azure resource lock. Then examine how to use the price calculator to estimate costs for different Azure services, describe spending limits, and remove the Azure spending limit in the Account Center. Identify subscription limits in Azure Service Management and Azure Resource Manager. Finally, look at resource tags and use them to group and categorize costs. The exercise involves managing resource groups.

COURSE_DESCRIPTION: In this course, learners will be introduced to the field of statistics, including where data come from, study design, data management, and exploring and visualizing data. Learners will identify different types of data, and learn how to visualize, analyze, and interpret summaries for both univariate and multivariate data. Learners will also be introduced to the differences between probability and non-probability sampling from larger populations, the idea of how sample estimates vary, and how inferences can be made about larger populations based on probability sampling. At the end of each week, learners will apply the statistical concepts they've learned using Python within the course environment. During these lab-based sessions, learners will discover the different uses of Python as a tool, including the Numpy, Pandas, Statsmodels, Matplotlib, and Seaborn libraries. Tutorial videos are provided to walk learners through the creation of visualizations and data management, all within Python. This course utilizes the Jupyter Notebook environment within Coursera.

COURSE_DESCRIPTION: By the end of this project you will implement a function using C that raises each element of an array to a given power and then call the function using the Python ctypes package. The C programming language is the basis for many other programming languages. Its performance cannot be matched in any other language. Python is known for its simplicity, allowing the programmer to focus on the application. Sometimes it is useful to take advantage of the speed of C in a Python application. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Data visualization is a critical part of any data science project. Once data have been imported and wrangled into place, visualizing your data can help you get a handle on what's going on in the data set. Similarly, once you've completed your analysis and are ready to

present your findings, data visualizations are a highly effective way to communicate your results to others. In this course we will cover what data visualization is and define some of the basic types of data visualizations. In this course you will learn about the ggplot2 R package, a powerful set of tools for making stunning data graphics that has become the industry standard. You will learn about different types of plots, how to construct effect plots, and what makes for a successful or unsuccessful visualization. In this specialization we assume familiarity with the R programming language. If you are not yet familiar with R, we suggest you first complete R Programming before returning to complete this course.

COURSE_DESCRIPTION: With huge amounts of log and metric data, today's distributed cloud environments are too complex to monitor manually, which is why AWS offers many tools for automating the process of monitoring the system. Discover why it is crucial to automate cloud logging and monitoring. Learn how to monitor your environment with AWS Virtual Private Cloud (VPC) Flow Logs, user activity using AWS CloudTrail, and security threats using AWS Enterprise Security Manager (ESM). Explore the AWS tools available for automating all aspects of system monitoring. Use the AWS Personal Health Dashboard to get an overview of events in the system and enable data event logging in AWS S3. Finally, examine autoscaling groups in AWS and how they can improve failover and reliability. This course is one of a collection that prepares learners for the AWS Certified DevOps Engineer - Professional (DOP-C01) certification exam, covering objectives from Domain 3 of the exam topics.

COURSE_DESCRIPTION: In this course, you will explore various approaches to building and implementing machine learning (ML) models and pipelines and will learn how to manage classification and regression problems. Begin this 11-video course by taking a look at the differences between ML models and ML algorithms. You will go on to learn about the different types of ML models and will then explore the approaches to developing and building them. Discover how to create and save ML models by using scikit-learn, and learn to recognize the various models that can be used to manage classification and regression problems. Explore how to build ML pipelines and then examine the prominent tools that can be used. You will learn how to implement scikit-learn ML pipelines, and in the final tutorial, learners will recall the steps involved in iterative machine learning model management and the associated benefits. In the concluding exercise, you will be asked to build ML models and pipelines by using scikit-learn.

COURSE_DESCRIPTION: Learners will discover how to use Log Analytic workspaces to centralize Azure resource logged data from a variety of sources and how to run log queries in this 11-video course. Prepare for the AZ-500 Microsoft Azure Security Technologies certification exam by examining how to

configure Azure Monitor centralized alert and notification settings. You will begin by examining how to identify performance and security baselines and how to view and filter Azure Cloud resource activity logs. Next, learn how to create a Log Analytics workspace, which is an Azure resource that must be configured to gain insights about activity and usage of your Azure resources. Then discover how to manage Log Analytics workspace data sources and run log queries. Take a look at using the Azure monitor tool in the portal, in order to have a centralized way of monitoring a variety of aspects of your Azure environment. Then learn about Azure monitor network packet capturing, and capturing Azure VM network traffic; create an action group, and finally, explore how to configure alert notifications.

COURSE_DESCRIPTION: This four-week Capstone of the Digital Marketing Specialization is designed to help you apply the principles you have learned in the previous courses. This capstone course is designed to give you hands-on experience in executing a digital marketing campaign for a fictitious firm selling electronics. In the previous courses on analytics and channels, you came up with strategies to identify a firm's objectives, specify a few key ones, research alternatives to reaching the customer in their decision journey and finally propose a multi-channel digital marketing plan. In

this capstone, you will execute a campaign, rather than creating another "plan". You will use an online simulation to do this. You will be a marketing manager for a firm selling digital cameras online through their webstore. You will be reviewing the products, pricing, margins, and historical sales. You will create a targeted ad campaign after researching appropriate keywords for the products you are selling. You will also review the basics of landing page design and search engine optimization. You will then create and execute an email campaign. Once these campaigns are executed, you get feedback on the KPI's such as revenue, profits, traffic, conversions. You will get an opportunity to redo this campaign, with new strategies, to improve your KPI's in the second round. This course is part of the iMBA offered by the University of Illinois, a flexible, fully-accredited online MBA at an incredibly competitive price. For more information, please see the Resource page in this course and onlineimba.illinois.edu.

COURSE_DESCRIPTION: Desktop apps have been replaced by web applications in many cases, but remain widely used in many areas such as financial applications. Building desktop apps in Python is an important skill for many quantitative developers and financial data modelers. Python has many great libraries to create desktop applications including Tkinter, PyQt, and wxWidgets. You will focus on the Tkinter library which is a wrapper over the Tk library. Start this course by understanding some benefits and limitations of desktop applications. Explore some commonly-used libraries for GUI programming in Python, including PyQt, wxWidgets and PySimpleGUI, and contrast their strengths and weaknesses. After that, you will explore the Tkinter library. As you shall learn, this is a wrapper over the Tk library, which in turn is a wrapper of sorts over the tcl programming language. Tcl is a high-level programming language used to create Desktop GUIs. Explore the app you aim to build with Tkinter, demonstrating the use of database connectivity, interactive plotting widgets, as well as a complex GUI with many different widgets. Finally, install Tkinter and get up-and-running with deploying apps. To round out this course, you will create a simple app with a clock text label which automatically updates every second. After completing this course, you'll be able to identify the strengths and weaknesses of various Python UI libraries including Tkinter, PyQt, and wxWidgets and be ready to configure interactive widgets such as buttons and text entries.

COURSE_DESCRIPTION: AI is transforming the practice of medicine. It's helping doctors diagnose patients more accurately, make predictions about patients' future health, and recommend better treatments. As an AI practitioner, you have the opportunity to join in this transformation of modern medicine. If you're already familiar with some of the math and coding behind AI algorithms, and are eager to develop your skills further to tackle challenges in the healthcare industry, then this specialization is for you. No prior medical expertise is required! This program will give you practical experience in applying cutting-edge machine learning techniques to concrete problems in modern medicine: - In Course 1, you will create convolutional neural network image classification and segmentation models to make diagnoses of lung and brain disorders. - In Course 2, you will build risk models and survival estimators for heart disease using statistical methods and a random forest predictor to determine patient prognosis. - In Course 3, you will build a treatment effect predictor, apply model interpretation techniques and use natural language processing to extract information from radiology reports. These courses go beyond the foundations of deep learning to give you insight into the nuances of applying AI to medical use cases. As a learner, you will be set up for success in this program if you are already comfortable with some of the math and coding behind AI algorithms. You don't need to be an AI expert, but a working knowledge of deep neural networks, particularly convolutional networks, and proficiency in Python programming at an intermediate level will be essential. If you are relatively new to machine learning or neural networks, we recommend that you first take the Deep Learning Specialization, offered by deeplearning.ai and taught by Andrew Ng. The demand for AI practitioners with the skills and knowledge to tackle the biggest issues in modern medicine is growing exponentially. Join us in this specialization and begin your journey toward building the future of healthcare.

COURSE_DESCRIPTION: In this course you will learn how to apply the functional programming style in the design of larger Scala applications. You'll get to know important new functional programming concepts, from lazy evaluation to structuring your libraries using monads. We'll work on larger and more involved examples, from state space exploration to random testing to discrete circuit simulators. You'll also learn some best practices on how to write good Scala code in the real world. Finally, you will learn how to leverage the ability of the compiler to infer values from types. Several parts of this course deal with the question how functional programming interacts with mutable state. We will explore the consequences of combining functions and state. We will also look at purely functional alternatives to mutable state, using infinite data structures or functional reactive programming. Recommended background: You should have at least one year programming experience. Proficiency with Java or C# is ideal, but experience with other languages such as C/C++, Python, Javascript or Ruby is also sufficient. You should have some familiarity with using the command line. This course is intended to be taken after Functional Programming Principles in Scala: <https://www.coursera.org/learn/scala2-functional-programming>.

COURSE_DESCRIPTION: Explore the concept of Behavior-Driven Development (BDD) and its important features in this 14-video course. View the differences between BDD and test-driven development (TDD) from the perspective of the advantages and disadvantages, and why BDD is selected over TDD. Next, receive an introduction to Cucumber, its features and advantages, and differences between Cucumber, Selenium, and application lifecycle management (ALM). Look at Cucumber Workflow and the Cucumber testing stack, then move on to Gherkin, and why it needs to be taken into account, with focus on Gherkin syntax, important terms, and best practices. Learn about configuring Cucumber for BDD testing, and the Cucumber feature file with testing. Discover how to work with Runner, Step definition, Parameter, and testing with Gherkin script in Cucumber, and perform data-driven testing with Cucumber by using data tables. Delve into Cucumber report generation; using different hooks in Cucumber, and running Cucumber feature file with TestNG. In the final tutorial, you will discover how to write Gherkin script, and application programming interface (API) testing with Gherkin script.

COURSE DESCRIPTION: Millions of companies in the world today are processing endless documents in various formats. Although Robotic Process Automation (RPA) thrives in almost every industry and is growing fast, it works well only with structured data sources. What about the data that's not fully structured and comes in varying layouts? To address this problem, there is another aspect of RPA that is taking the industry by storm: cognitive automation. While implementing RPA, you can deploy automations with "cognitive" capabilities. Cognitive automation uses Artificial Intelligence (AI) to learn and understand the same way the human brain works. Thus, it assists humans in making decisions, completing tasks, or meeting goals. Using cognitive automation, you can extract semi- or unstructured data-which is 80% of all data! Data is a precious asset. Businesses struggle to make sense of large volumes of available data and to generate a tangible value from them. Manual business processes barely contain any data that is available for capture. This is where Robotic Process Automation (or RPA) Analytics comes in. RPA bots don't just automate business processes; they also digitize them. They take the large volume of data and interpret it in near real-time to provide actionable information. In this course, you will be introduced to cognitive automation, the role that AI plays in it, and Automation Anywhere's cognitive solution, IQ Bot. You will also be introduced to RPA analytics and explore how Automation Anywhere's Web Control Room and Bot Insight can provide this functionality. As you begin this course, you will learn the six steps to deploy cognitive automation. Next, you will explore the IQ Bot portal - Automation Anywhere's web-based application for developing the cognitive IQ bots. You will then learn to use the portal by following the IQ Bot workflow. Next, you will learn how RPA analytics help interpret and improve automated business processes. You will see how Bot Insight functions as an RPA analytics platform. You will also explore the different types of RPA analytics and learn how to generate RPA analytics via two mechanisms - the Web Control Room for Operational Analytics and Bot Insight for Business Analytics and CoE Analytics. Finally, you will learn how to use the RPA mobile app to study and edit the default CoE dashboard that is published via Bot Insight.

COURSE_DESCRIPTION: How do consumers see your brand relative to your competitors? How should a new product be positioned when it's launched? Which customer segments are most interested in our current offerings? For these questions and many others, surveys remain the tried and true method for gaining marketing insights. From one-off customer satisfaction surveys to brand tracking surveys that are administered on a continuous basis, they provide the information that marketers need to understand how their products, services and brands are seen by consumers. In Analytic Methods for Survey Data, learners will become familiar with established statistical methods for converting survey responses to insights that can support marketing decisions. Techniques discussed include factor analytics, cluster analysis, discriminant analysis and multi-dimensional scaling. These techniques are presented within the STP (Segmentation, Positioning, Targeting) Framework, enabling learners to apply the analytic techniques to develop a marketing strategy. It is recommended that you complete the Meaningful Marketing Insights course offered by Coursera before taking this course. Note: This course would require using XL Stat, an Excel Add-on that students would need to purchase. XL Stat offers a 30-day free trial, so students could complete this course without incurring additional expense.

COURSE_DESCRIPTION: This 3-course Specialization from Google Cloud and New York Institute of Finance (NYIF) is for finance professionals, including but not limited to hedge fund traders, analysts, day traders, those involved in investment management or portfolio management, and anyone interested in gaining greater knowledge of how to construct effective trading strategies using Machine Learning (ML) and Python. Alternatively, this program can be for Machine Learning professionals who seek to apply their craft to quantitative trading strategies. By the end of the Specialization, you'll understand how to use the capabilities of Google Cloud to develop and deploy serverless, scalable, deep learning, and reinforcement learning models to create trading strategies that can update and train themselves. As a challenge, you're invited to apply the concepts of Reinforcement Learning to use cases in Trading. This program is intended for those who have an understanding of the foundations of Machine Learning at an intermediate level. To successfully complete the exercises within the program, you should have advanced competency in Python programming and familiarity with pertinent libraries for Machine Learning, such as Scikit-Learn, StatsModels, and Pandas; a solid background in ML and statistics (including regression, classification, and basic statistical concepts) and basic knowledge of financial markets (equities, bonds, derivatives, market structure, and hedging). Experience with SQL is recommended.

COURSE_DESCRIPTION: Ako niste izravno nadređeni, rezultate osim kredibilitetom i vjerodostojnošću možete ostvariti i svojim utjecajem. Učinkovite vještine utjecanja vjerojatno čine najveću razliku u ostvarivanju rezultata kada niste u položaju autoriteta. Kada se koristite svojim utjecajem, angažirate druge osobe i uključujete ih u ostvarivanje rezultata, a da pritom nužno nemate formalnu moć. Utjecaj se ne temelji na prisili ili pritisku, već na tome da ljude pridobijete na svoju stranu iz valjanih razloga. Postoje tri načina širenja utjecaja: jezikom/učinkovitom komunikacijom, reciprocitetom/razmjenom "valuta" i ustrajanjem unatoč otporu.

COURSE DESCRIPTION: The imbalanced-learn library that integrates with Pandas ML (machine learning) offers several techniques to address the imbalance in datasets used for classification. In this course, explore oversampling, undersampling, and a combination of techniques. Begin by using Pandas ML to explore a data set in which samples are not evenly distributed across target classes. Then apply the technique of oversampling with the RandomOverSampler class in the imbalanced-learn library; build a classification model with oversampled data; and evaluate its performance. Next, learn how to create a balanced data set with the Synthetic Minority Oversampling Technique and how to perform undersampling operations on a data set by applying Near Miss, Cluster Centroids, and Neighborhood cleaning rules techniques. Next, look at ensemble classifiers for imbalanced data, applying combination samplers for imbalanced data, and finding correlations in a data set. Learn how to build a multilabel classification model, explore the use of principal component analysis, or PCA, and how to combine use of oversampling and PCA in building a classification model. The exercise involves working with imbalanced data sets.

COURSE DESCRIPTION: From self-driving cars to predicting stock prices, machine learning has an exciting range of applications. BigML, due to its ease of use, makes these algorithms widely accessible. This course outlines machine learning fundamentals and how these are applied in BigML. You'll start by examining various machine learning algorithm categories and the kinds of problems they're used to solve. You'll then investigate the classification problem and the process involved in training and evaluating such models. Next, you'll examine linear regression and how this can help predict a continuous value. Moving on, you'll explore the concept of unsupervised learning and its application in clustering, Principal Component Analysis (PCA), and generating associations. Finally, you'll recognize how all of this comes together when using BigML to significantly simplify the building and maintenance of your machine learning models.

COURSE_DESCRIPTION: Explore how to secure applications in the cloud, including training and awareness, assurance and validation, the secure software development lifecycle (SDLC), federated services, single sign-on (SSO), and advanced managed services from cloud providers, in this 8-video course. Begin by learning to define training and awareness in application security, and then learn about cloud software assurance and validation. The next tutorial concerns using verified secure software, focusing on two methodologies for security testing or application security testing (AST), in your organization. You will then learn about applying the secure software development lifecycle. You will take a look at comparing cloud application architectures, which includes the five key steps to building a secure cloud-ready application. You will discover federation and SSO solutions, and finally, observe how to compare advanced cloud security products. In the concluding exercise, you are asked to list methods of creating security awareness, methods for enhancing application security in the cloud, and the steps of successful software validation.

COURSE_DESCRIPTION: Ein erfolgreicher Führungsstil erfordert in der modernen Geschäftswelt zahlreiche Fähigkeiten und Kompetenzen. Dazu gehört die Fähigkeit, verschiedene Teams von Personen mit unterschiedlichen Hintergründen, Erfahrungen und Fachkenntnissen zu managen. Das Moderieren effektiver Workshops erfordert eine fein abgestimmte Mischung aus didaktischer, proaktiver Führung und strukturierter Interaktion, die den Teams hilft, kreative, innovative Ideen zu generieren und zu diskutieren und Strategien zu entwickeln, um Geschäftsprobleme zu lösen und neue Geschäftsmöglichkeiten zu erkunden. Effektive Workshops ermöglichen es dem Team, von den Erfahrungen und dem Fachwissen seiner Mitglieder zu profitieren. In diesem Kurs lernen Sie spezifische Techniken und Strategien kennen, um einen erfolgreichen Workshop zu moderieren, die Herausforderungen verschiedener Persönlichkeiten und Prioritäten zu bewältigen und Ihr Geschäftsteam durch die Verwendung von Anleitungen und strukturierten Aktivitäten fokussiert und aufgabenorientiert zu halten.

COURSE_DESCRIPTION: This 13-video course explores software protection by applying secure development and coding practices. Learners will examine secure coding key concepts, including early and frequent testing, and how to validate to ensure it is the proper kind of data, and the proper size, type, and format. First, the course demonstrates how to set up a simple filtering statement to improve software security. You will learn how to constrain user input, by implementing a drop-down box or radio buttons. You will also learn the top 10 rules established by CERT (Computer Emergency Response Team) for secure programming, and how to operationalize secure software deployments, as well as continuous secure delivery to quickly update changes and upgrades. Learners will explore verification, and secure validation software metrics to measure and improve software. You will learn to use C# code, evaluate both secure and unsecure parts, for the web and Windows code, and learn to secure code with Python. Finally, you will learn to secure code with Java.

COURSE_DESCRIPTION: There is no such thing as a perfect project, no matter how great your planning and management skills are. Taking time to reflect on outcomes - both throughout the initiative and after it is complete - is important for capturing ways to improve. In this course, you will learn about the distinct differences between retrospectives and reviews, including purpose, timing, style considerations, and focus. Next, you will explore common mistakes made in retrospectives and reviews so you can avoid them. Finally, you will investigate best practices for conducting both reviews and retrospectives so you can effectively capture and apply insights gained. Upon course completion, you will be able to recognize key characteristics and best practices for reflecting on and improving project and process quality.

COURSE_DESCRIPTION: Two central goals of marketing are reducing customer acquisition costs and increasing customer lifetime value. Customer segmentation is an important step towards both of these goals - by learning more about present and prospective customers, marketing practitioners can focus on tailoring strategies to acquire and retain these different types of customers more effectively. Explore the regency, frequency, and monetary value (RFM) framework of customer interactions by performing K-means clustering and using the silhouette score to pick the optimal number of clusters. Next, switch to two alternative clustering techniques, known as agglomerative clustering and DBScan. Finally, perform market basket analysis, also known as affinity analysis, to predict what items that customers will purchase together, such as bread and jam. Use the a priori algorithm for computing frequent itemsets, and the calculation and implications of metrics such as support, confidence, lift, and conviction.

COURSE_DESCRIPTION: Since the introduction of Windows Vista and Server 2008, Windows deployment has been image-based. In this 10-video course, learners explore tools, methods, and server roles required to manage deployment strategies. The course opens by examining editions of Windows available in order to make informed buying choices for any scenario based on your ability to differentiate between Windows editions. Next, hear an introduction to Microsoft's principal deployment tools and how to distinguish between them, their various uses, and scenarios that demand specific toolsets. Learn about leveraging the Windows Assessment and Deployment Kit (ADK) to prepare for scaled deployments of Windows 10 build 1809, and how to automate scaled deployments of Windows 10 build 1809 with lite touch and zero touch deployments by using Microsoft Deployment Toolkit (MDT). Explore how to install native Windows Deployment Services (WDS) to scale deployments of Windows 10 build 1809, and configure native WDS implementation. Adding WIM (Windows Imaging Format) files to the WDS server and configuring multicast transmissions are also covered. The concluding exercise involves performing Windows 10 deployments. This is one course in a series to help learners prepare for the MD-100: Windows 10 certification exam.

 COURSE_DESCRIPTION: This 10-video course explores advanced features of Python testing uses of the unit-test Framework, and will examine several ways to optimize tests. A labs-only course using Linux Shell, it explores the unit-test framework, the pytest, and the doctest, and how to use them to automate the testing of all the functions in Python applications. You will learn how to bundle common operations for multiple tests into a special function or fixture, which make test scripts easier to view and maintain. Next, you will learn to adjust the scope of fixture functions to execute before each individual test, or to execute just once for the entire test case. Learners will examine how to create and execute a collection of test cases called test suites. You will explore the PyCharm IDE (integrated development environment), which includes support for several different testing frameworks. Finally, you will explore how PyCharm IDE simplifies the creation of tests by generating boilerplate code for test scripts with just a few clicks.

COURSE_DESCRIPTION: In your role as a certified SysOps Admin, you'll need to monitor IT services and data to ensure the efficient, secure, and proper usage of IT systems. In this course, you'll learn how to monitor deployed AWS resources using AWS tools. You'll begin with exposure to how CloudWatch is used to monitor AWS resources. Next, you'll work with CloudWatch alarms, AWS dashboards, and the AWS Health service. You'll then work with EC2 instances, S3 bucket event monitoring, VPC flow logs, and CloudTrail audit events. Additionally, you'll explore how to monitor S3 storage and tiers. And lastly, you'll tag AWS resources using the GUI, CLI, and PowerShell. This course is one of a collection that prepares learners for the AWS Certified SysOps Administrator - Associate (SOA-C01) exam.

COURSE_DESCRIPTION: Configuration as code (CaC) can save time and reduce human error by keeping configs consistent, manageable, traceable, and secure. AWS developers need to comprehend what's meant by configuration as code (CaC) and the AWS services that enable it. Through this course, learn about the features and benefits of configuration as code. Examine the features of the AWS Elastic Container Service (ECS), Amazon Elastic Container Registry (ECR), Amazon Elastic Kubernetes Service (EKS), Amazon App2Container, and AWS OpsWorks. As you advance, learn how to create a cluster with Fargate, an Amazon ECS service, a Docker container on an Amazon ECS service, a container image to an Amazon ECR repository, and an Amazon EKS cluster. Upon completion, you'll be able to start implementing CaC in your own work. This course helps prepare learners for the AWS Certified Developer - Associate 2021 certification exam.

COURSE_DESCRIPTION: In real-world app development, tests ensure that bugs and other issues can be found and fixed early in the development and release cycle. Flutter offers a range of testing and debugging tools that make it easy to write tests and debug Flutter applications. Through this course, learn about the types of tests that can be written for Flutter applications. Explore the test types and how to choose between them. Next, practice writing tests for use cases, using mocks to eliminate external dependencies in code, and writing widget tests to test stateless and stateful widgets. Finally, discover Flutter tools for debugging and profiling apps. Upon completion, you'll be able to implement tests and debug a Flutter application.

COURSE_DESCRIPTION: This Specialization enables learners to successfully apply core Java programming languages features & software patterns needed to develop maintainable mobile apps comprised of core Android components, as well as fundamental Java I/O & persistence mechanisms. The Capstone project will integrate the material from throughout the Specialization to exercise and assess the ability of learners to create an interesting Android app by applying knowledge and skills learned in previous MOOCs, including Java programming features, Android Studio tools, Android Activity components, Material Design, file I/O and data persistence, unit testing, and software patterns. The project itself will be similar in design goals to previous assignments, however it will provide less of the skeleton code than earlier MOOCs provide to enable more creativity to learners and greater opportunity for learners to customize the app.

COURSE_DESCRIPTION: Bidirectional Encoder Representations from Transformers (BERT), a natural language processing technique, takes the capabilities of language AI systems to great heights. Google's BERT reports state-of-the-art performance on several complex tasks in natural language understanding. In this course, you'll examine the fundamentals of traditional NLP and distinguish them from more advanced techniques, like BERT. You'll identify the terms "attention" and "transformer" and how they relate to NLP. You'll then examine a series of real-life applications of BERT, such as in SEO and masking. Next, you'll work with an NLP pipeline utilizing BERT in Python for various tasks, namely, text tokenization and

encoding, model definition and training, and data augmentation and prediction. Finally, you'll recognize the benefits of using BERT and TensorFlow together.

COURSE_DESCRIPTION: By the end of this project, you will understand the principles of load forecasting used by power companies to balance the supply and load demand of energy. You will also be able to conduct a load forecast in Google Sheets. To do this, you will work in the free-to-use software Google Sheets while exploring how load forecasting provides the building block for planning efforts decades into the future. You will also understand how load forecasting influences more than energy planning efforts because it also informs financial and operational planning and rate setting by governments through weather normalization techniques. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Public-key infrastructure (PKI) is the framework of encryption and cybersecurity used to safely distribute, verify and revoke certificates in an organization and manage public-key encryption. In this course, you will learn the fundamentals of PKI and explore considerations when implementing trust structures through technology and public key-based digital certificates. Explore PKI components including certification authorities, certificates, revocation lists, registration authorities, entities and certificate templates, and discover how certificate authorities (CA) are used to issue certificates to entities and manage trust relationships. Discover how to differentiate between root and subordinate CAs as well as internal and external PKIs, and explore public key certificates and how they can represent the digital identity of the subject. Lastly, explore common certificate acquisition methods including web, auto-enrollment, MMCs, and native consoles, and explore use cases for common access cards (CAC). This course was originally created by Global Knowledge (GK).

COURSE_DESCRIPTION: Dieser Kurs beschäftigt sich mit den Werkzeugen von Word 365 für die Verwendung von Tabellen. Sie erfahren, wie Sie eine Tabelle erstellen und wie Sie Elemente in eine Tabelle einfügen und löschen können. Sie werden auch lernen, wie Sie die Größe Ihrer Tabelle, Zeilen und Spalten ändern und den Text in Ihrer Tabelle ausrichten können, damit Sie Ihre Tabelle entsprechend den Informationen anpassen können. Word bietet außerdem verschiedene Tools zum Anpassen des Tabellenlayouts und der Rahmen, zum Zusammenführen und Teilen von Tabellen und zum Formatieren Ihrer Tabelle. Sie lernen, wie Sie die Daten in Ihrer Tabelle sortieren und eine Berechnung durchführen können. Schließlich erfahren Sie, wie Sie Elemente aus Excel einfügen können. So können Sie beispielsweise eine Tabelle in Excel erstellen und diese Daten dann schnell in Ihr Word-Dokument übertragen.

COURSE_DESCRIPTION: AWS CodePipeline is one of the major cloud platforms used by technical support engineers to model and configure the different software release process stages. In this course, you'll examine the concept of continuous integration and its implementation in AWS CodePipeline. You'll explore the key terms and processes associated with pipeline stages, recognize how to set up continuous deployment and delivery, and outline methods for processing pipeline executions. Next, you'll learn to integrate CodePipeline with AWS CodeCommit and GitHub, configure Amazon CloudWatch Events to trigger pipelines, and set up CodePipeline to deploy various deployment groups. You'll then create pipelines to retrieve source applications from Amazon S3 Bucket and deploy them to Amazon EC2 instances. Finally, you'll configure pipelines to deploy customized product templates and use the AWS CloudFormation console service to create infrastructures.

COURSE_DESCRIPTION: Continue preparing for the MS-300 deploying Microsoft 365 Teamwork certification exam focuses on teamwork administrator abilities to configure and manage SharePoint Online, OneDrive for business, Teams, and workload integrations with this 14-video course, which explores capabilities of Microsoft's Enterprise Video service Stream. First, you will learn how to use Microsoft Stream, including how to configure, manage, and integrate it into other Office 365 Services. You will also learn how to plan, implement, and set up a new live event in Teams from your calendar. Then learn how to make Stream video content available to Teams' users, through the Teams' application, and through a SharePoint site. Next, the course demonstrates how to use Teams Admin Center to configure live events settings and policies. You will learn to share content in Stream directly to a Yammer site. Finally, learners will look at configuring administrative settings in Stream to control which users are able to create and upload content in Stream, and/or create companywide channels in Stream.

COURSE_DESCRIPTION: In this 13-video course, learners can explore Microsoft 365 pricing and support, including the benefits of Microsoft 365 subscription options and licensing, payment, and best practices. Key features covered in this course include the Microsoft productivity library, filled with relevant topics, articles, and training for organizations; collaboration; and security and compliance. Become familiar with the Microsoft 365 information page and its product information for business, enterprise, and education. Next, explore subscription options for various organizations, including Microsoft 365 Business, Microsoft 365 Enterprise, Microsoft 365 F1, and Microsoft 365 Education, and payments. A concluding exercise asks learners to describe Microsoft 365 pricing and support; to list three key issues when considering unexpected on-premises costs and two key issues when considering spend; to describe three key considerations for cloud adoption, four main collaboration tools of Office 365, and two Cloud Solution Provider (CSP) licensing models. The course can be used as part of preparations for the Microsoft 365 Fundamentals (MS-900) exam.

COURSE_DESCRIPTION: The categorization of security risks is essential for effectively assessing and managing risk. In this course, you'll explore the assessment, classification, and prioritization of security risks. You'll begin by outlining the concept of risk assessment and the advantages of

different risk assessment techniques. You'll also investigate the features of security assessment methods, such as vulnerability assessment and penetration testing, and discover how to assess security vulnerability. Moving on, you'll recognize the significance of risk categorization and how to update a risk register in Microsoft Excel using a four-quadrant risk classification matrix. Finally, you'll identify the purpose and process of risk prioritization, and the role of a probability-impact matrix in determining risk levels. You'll then investigate how to use the matrix to prioritize risks on a security risk register.

COURSE_DESCRIPTION: This 13-video course explores various standards and frameworks that can be adopted to build, deploy, and implement machine learning (ML) models and workflows. Begin with a look at the critical challenges that may be encountered when implementing ML. Examine essential stages of ML processes that need to be adopted by enterprises. Then explore the development lifecycle exclusively used to build productive ML models, and the essential phases of ML workflows. Recall the critical processes involved in training ML models; observe the various on-premises and cloud-based platforms for ML; and view the approaches that can be adopted to model and process data for productive ML deployments. Next, see how to set up a ML environment by using H2O clusters; recall various data stores and data management frameworks used as a data layer for ML environments; and specify the processes involved in implementing ML pipelines and using visualizations to generate insights. Finally, set up and work with Git to facilitate team-driven development and coordination across the enterprise. The concluding exercise concerns ML training processes.

COURSE_DESCRIPTION: Mit dem zunehmenden Einsatz künstlicher Intelligenz und intelligenter Geräte sind Unternehmensnetzwerke unter der hohen Datenlast stark beansprucht. Edge Computing versucht, die Datenverarbeitung, -erfassung und -bereitstellung näher an den Endbenutzer zu bringen - an den sogenannten Rand ("Edge") des Netzwerks. Edge-Daten und lokale Verarbeitung werden in modernen Unternehmensnetzwerken schnell zu Standardfunktionen. Edge Computing kann Kosten und Latenzprobleme reduzieren, das Datenmanagement und Data Warehousing sowie die Geschäftskontinuität verbessern. In diesem Kurs lernen Sie die Vorteile und Herausforderungen des Edge Computing kennen. Außerdem erfahren Sie, wie Sie ein Data Warehouse ordnungsgemäß nutzen und seine Implementierung in Ihre betrieblichen Abläufe planen. Des Weiteren machen Sie sich mit den Überlegungen und Best Practices für die Implementierung und Verwendung von Edge Computing in Ihrem Unternehmen vertraut.

COURSE_DESCRIPTION: In the business world, modern organizations conduct corporate retreats on a regular basis to consider their strategic direction, review progress, and set up goals and objectives for the year. In this course you will use the same approach to organize, strategize, re-energize, and re-invigorate your career building activities. The final Capstone Project is designed as an annual retreat aimed at facilitating your ability to step back from day-to-day demands and strategically focus on gaining a competitive edge on the job market by investigating new opportunities for career growth, conducting a thorough audit of your skill-building and self-marketing strategies, and developing new ways to enhance and showcase your marketable skills. The Capstone Project will allow you to integrate concepts and tools from the entire Career Brand Management specialization to effectively manage your career brand and increase personal effectiveness. Some unique program highlights: • The Capstone Project is designed as a virtual training and development facility where you will engage in career investigation research, self-audit, and creating evidence-based portfolios, professional development plans, self-marketing and personal branding strategies, presentations, and public profiles; • You'll be actively working with your cohort (study group members) to review their work and receive peer feedback; • You may also use the Capstone as a "career fitness gym" and work independently on a project where you will share your results with others and receive peer feedback. Examples of these projects include but are not limited to developing a self-marketing plan, creating a new digital artifact, developing communication strategy, working on a job application, creating a selection criteria statement, and looking for best practices and self-assessment tools; • It is completely self-paced; you may want to either do it as a 4-week course, or focus and complete in just 3-4 days. Overall, the Capstone Project will help you organize yourself, fine tune your self-management information system, provide a framework for strategic self-management, and serve as an effective self-coaching support system. In the end, you will be well positioned to succeed in the marketplace as the CEO of your own career!

COURSE_DESCRIPTION: We all will have a time where we need to evaluate and select a software solution. This moment can seem daunting when we need to be confident in making the best decision. We do not want to choose poorly for our personal use and can experience a career impact when we do so professionally. Thus, we need a process that we can lean on to help us be thorough and focused on the things that matter. In this presentation on evaluating software, we look at steps to take that will help you make (and defend) the best decision. Please note that this course material includes content gathered from external websites which may fall outside your company network. Please consult with your IT department policies with respect to any restrictions in viewing content from external websites.

COURSE_DESCRIPTION: Explore the Constructor, Factory, and Abstract Factory creational patterns in Javascript. In this 15-video course, learners examine how to use constructors to create and initialize objects and how to use Factory and Abstract Factory to create different kinds of objects. Key concepts covered in this course include features of the constructor pattern, which allows construction or creation of objects that meet a specific use case; how to use object literal notation to construct objects; and how to assign properties and functions to objects. You will learn how to use Object.create() and new Object() to create objects; learn how to create objects using functions and ES6 classes; and examine Factory and Abstract Factory patterns, two design patterns closely related to one another. Next, learn about helper functions for the Factory pattern; how to set up helper methods to implement the Factory pattern; and how to set up constructs and factories for the Abstract Factory pattern. Finally, learn about immediately-invoked functions for Factory pattern and how to implement Abstract Factory pattern.

COURSE_DESCRIPTION: In this challenge lab, you will handle exceptions by using try/catch blocks. First, you will add a try/catch block to handle a FileNotFoundException, and then you will display a message that provides information about the exception. Next, you will add a try-with-resources block, and then you will add a catch block to handle an IOException. Finally, you will verify that the methods return the expected results when there are no exceptions, and then you will verify that the exceptions provide the expected output. Note: Once you begin the challenge lab, you will not be able to pause, save, or exit and then return to your challenge lab. Please ensure that you have set aside enough time to complete the challenge lab before you start.

COURSE_DESCRIPTION: This course will walk you through how to create an online employee onboarding course. By the end of this project, you will create an Eduflow course to assist in your employee onboarding process. Eduflow is a free, easy-to-use online course builder that allows you to build an interactive learning experience for your team. In this project, you will open an Eduflow account and begin creating an interactive employee onboarding course. You will then learn how to mix and match different learning activities including content, submissions, and videos. Furthermore, you will learn how to invite employees to the course, keep track of their progress, and gain valuable insight and feedback from your learners. The onboarding process is extremely important in developing your company brand and culture. Using Eduflow allows you to create an innovative, customized, and engaging onboarding experience for your employees. Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.

COURSE_DESCRIPTION: Amazon Web Services offers high availability configurations for its services, an obvious area of interest for AWS SysOps admins. In this course, you'll begin with an overview of how AWS aids in disaster recovery and how load balancing improves app performance while increasing app availability. Next, you'll learn how to manage a network balancer and deploy an application load balancer using the AWS GUI and CLI. You'll then work with EC2 placement groups and MySQL database replicas, learning how to carry out tasks like registering EC2 instances with existing load balancer target groups, configuring database replicas for MySQL, and creating MySQL database snapshots. This course is one of a collection of courses that prepares learners for the AWS Certified SysOps Administrator - Associate (SOA-C01) exam.

COURSE_DESCRIPTION: Course Description Looking to dive into the world of Alibaba Cloud with a comprehensive introduction to the range of products and solutions offered by Alibaba Cloud? Fundamental Architecting on Alibaba Cloud is a course designed for users looking to start this journey with a look into Alibaba Cloud's core products. Fundamental Architecting looks into storage, networking, auto-scaling, and security solutions as well as scenarios to best combine these products to create a complete cloud-based architecture. After completing this course the learner should: Have general knowledge of Cloud Computing, Network Security, and the IT industry. Able to develop general solutions and enterprise best practices based on Alibaba Cloud's products. Knowledge in the use and operation of Alibaba Cloud's ECS, Server Load Balancers, OSS, VPC, Auto Scaling, CDN, Alibaba Cloud Security, and CloudMonitor products. To earn an official Alibaba Cloud certificate please join the Cloud Computing courses on the Academy's website: Operate and Manage a Cloud Server: <https://edu.alibabacloud.com/certification/cloudserver> Operate and Manage Object Storage on the Cloud: <https://edu.alibabacloud.com/certification/cloudoss> Handle Large Traffic with Load Balancer: <https://edu.alibabacloud.com/certification/cloudslb>

COURSE DESCRIPTION: In this 13-video course, discover the browser features that are important to full stack developers and how CSS (Cascading Style Sheet) preprocessors make adding styles to a web page and web site easier, especially when the site becomes large. Begin with custom elements and creating new HTML tags. Then take a look at the Shadow DOM (Document Object Model), and avoid conflict by creating separate DOM elements. Next, explore HTML templates, and writing markup that is not rendered. Learn about Cross-Origin Resources Sharing (CORS), which leads to setting up and installing Sass preprocessor, and using variables and nesting to speed up CSS development. Learn how to set up and install LESS, a CSS preprocessor, and then examine workings of LESS variables and mixins (functions allowing reuse of properties). Discover how to use LESS Scope to confine variables, add an operation, and implement a function. Then learn how to install Stylus by using Node.js, and then write simple markup with Stylus. Close the course with an exercise on using LESS mixins to combine styles into a nest pattern.

COURSE_DESCRIPTION: Explore the general theory of concurrent programming, and examine how to have multiple tasks active at any given point in time. This 14-video course offers an in-depth examination of concurrent programming by using the Python programming language. First, learners will examine the two main forms of concurrent programming, multithreading and multiprocessing, and examine their differences and use cases. Next, you will examine executing multitask sequentially, and with multithreading to save time, and how to use multiprocessing to manage a collection of tasks efficiently. Continue by exploring challenges that programmers encounter when adopting concurrency such as synchronization issues and deadlocks, and how to address these issues. You will examine issues that arise when writing concurrent code, and you will learn how to fix these by using the built-in objects available in Python. Finally, this course examines several of the objects available in the Python language such as queues and pools, which simplify the task of building multithreading and multiprocessing applications.

COURSE_DESCRIPTION: Case Study - Predicting Housing Prices In our first case study, predicting house prices, you will create models that predict a continuous value (price) from input features (square footage, number of bedrooms and bathrooms,...). This is just one of the many places where regression can be applied. Other applications range from predicting health outcomes in medicine, stock prices in finance, and power usage in high-performance computing, to analyzing which regulators are important for gene expression. In this course, you will explore regularized linear regression models for the task of prediction and feature selection. You will be able to handle very large sets of features and select between models of various complexity. You will also analyze the impact of aspects of your data -- such as outliers -- on your selected models and predictions. To fit these models, you will implement optimization algorithms that scale to large datasets. Learning Outcomes: By the end of this course, you will be able to: -Describe the input and output of a regression model. -Compare and contrast bias and variance when modeling data. -Estimate model parameters using optimization algorithms. -Tune parameters with cross validation. -Analyze the performance of the model. -Describe the notion of sparsity and how LASSO leads to sparse solutions. -Deploy methods to select between models. -Exploit the model to form predictions. -Build a regression model to predict prices using a housing dataset. -Implement these techniques in Python.

COURSE_DESCRIPTION: In this hands-on project, we will build and train a simple artificial neural network model to detect spam/fake Instagram accounts. Fake and spam accounts are a major problem in social media. Many social media influencers use fake Instagram accounts to create an illusion of having so many social media followers. Fake accounts can be used to impersonate or catfish other people and be used to sell fake services/products. By the end of this project, you will be able to: - Understand the applications of Artificial Intelligence and Machine Learning techniques in the banking industry - Understand the theory and intuition behind Deep Neural Networks - Import key Python libraries, dataset, and perform Exploratory Data Analysis. - Perform data visualization using Seaborn. - Standardize the data and split them into train and test datasets. - Build a deep learning model using Keras with Tensorflow 2.0 as a back-end. - Assess the performance of the model and ensure its generalization using various Key Performance Indicators (KPIs). Note: This course works best for learners who are based in the North America region. We're currently working on providing the same experience in other regions.
